John Portera, D.M.D.,2013-11 The killer left nothing visible on the teenager s body nothing the attack was silent and unsuspecting No fingerprints no DNA not a clue was left at the scene or on the boy s body Three teenagers entered an environment wherein dwelled a deadly killer They left it laughing and full of life Two weeks later one was dead His body bore no marks only symptoms of a sickness progressively worsening each day Physicians relentlessly sought identifying cause of symptoms Each drug known to counter what the laboratory results reflected proved

to be ineffective Finally the teenager lapsed into a coma then cardiac arrest Death had dropped its darkened drape Death came ten days after Terry s first symptom a stiff neck upon awakening and only four days after the threesome cheerfully walked away from where the killer cleverly concealed itself a perfect place for enticing the boys to enter It struck its unsuspecting blow at a precise moment one when the victim s involuntary action between man and matter favored the killer the sudden silent strike was lethal enough to create Terry s lingering death the irresistible setting the boys entered was on an unusually warm February day in Florida Indisputable identification of the killer came from a medical pathologist His words were the young man died of Primary Amebic Meningoencephalitis PAM It s rather uncommon but it s a fatal infection of the brain I believe Terry inhaled a deadly parasitic pathogen while in the lake a single celled organism known as Naegleria fowleri Water containing this amoeba if inhaled deeply into the nasal passageways causes an inevitable death the doctor didn t describe the autopsy sight of the boy s brain Had he done so he would have described a brain resembling moth eaten wool more than human brain tissue Doctors treated a similar fatality the previous December eighteen year old standout athlete Earl Baley of Orlando But physicians declined public disclosure of an enigma concerning the PAM deaths But after the third death they reached a reasonable conclusion one as unreasonable as imagination could remove them from intellect Finally a female Immunologist and Microbiologist publicly explained the enigma of her peers It s apparent we have reached a consensus of opinion Today I m compelled to tell you two elements are missing from the proposition that proposes accidental death through Naegleria fowleri One is the fatalities were at a time of year when our waters are not consistently seventy two degrees or higher in order for Naegleria to thrive the other is the only other sensible conclusion is perhaps something more evil and sinister *The Life and Times of the Rev.
