**The Lives of Sharks** Daniel Abel, R. Dean Grubbs, 2023-09-19 A richly illustrated and

comprehensive introduction to the world's sharks. Sharks are the top predators in many marine ecosystems. But tales of the killer instincts and fearsomely sharp senses of these hunters can obscure their full life histories. In fact, sharks are characterful exhibit surprisingly complex behaviors and lead secretive lives full of interest in every type of marine habitat. *The Lives of Sharks* is a fascinating and beautifully illustrated guide to these iconic marine creatures from two world renowned experts. This book explores shark physiology, anatomy, behavior, ecology, and evolution, as well as conservation and the impact of human activity on shark populations. With stunning photographs and illustrations, as well as profiles of selected species, this is a comprehensive, authoritative, and inviting introduction to global shark life today. **Climate change:**

**Unpacking the burden on food safety** Food and Agriculture Organization of the United Nations, 2020-03-01. Climate change is causing unprecedented damage to our ecosystem. Increasing temperatures, ocean warming, and acidification, severe droughts, wildfires, altered precipitation patterns, melting glaciers, rising sea levels, and amplification of extreme weather events have direct implications for our food systems. While the impacts of such environmental factors on food security are well known, the effects on food safety receive less attention. The purpose of *Climate change: Unpacking the burden on food safety* is to identify and attempt to quantify some current and anticipated food safety issues that are associated with climate change. The food safety hazards considered in the publication are foodborne pathogens and parasites, harmful algal blooms, pesticides, mycotoxins, and heavy metals, with emphasis on methylmercury. There is also a dedicated section on the benefits of forward-looking approaches such as horizon scanning and foresight, which will not only aid in anticipating future challenges in a shifting global food safety landscape but also help build resilient food systems that can be continually updated as more knowledge is assimilated. By building a more widespread and better understanding of the consequences climate change has on food safety, it is hoped that this document will aid in fostering stronger international cooperation in making our food safer by reducing the global burden of these concerns. *Doctors and Demonstrators* Drew Halfmann, 2011-07-15. Since *Roe v*

*Wade*, abortion has continued to be a divisive political issue in the United States. In contrast, it has remained primarily a medical issue in Britain and Canada despite the countries' shared heritage. *Doctors and Demonstrators* looks beyond simplistic cultural or religious explanations to find out why abortion politics and policies differ so dramatically in these otherwise similar countries. Drew Halfmann argues that political institutions are the key. In the United States, federalism, judicial review, and a private health care system contributed to the public definition of abortion as an individual right rather than a medical necessity. Meanwhile, Halfmann explains the porous structure of American political parties gave pro-choice and pro-life groups the opportunity to move the issue onto the political agenda. A groundbreaking study of the complex legal and political factors behind the evolution of abortion policy, *Doctors and Demonstrators* will be vital for anyone trying to understand this contentious issue. *Practical Aspects of Rape Investigation* Ann Wolbert Burgess, 2025-04-15.
