Mab Media And New Horizons:

New Horizons in Allergy Immunotherapy Alec Sehon, Kent T. HayGlass, Dietrich Kraft, 2012-12-06 One of the main attractions of research into hypersensitivity disorders is that it brings together scientists from a very broad range of disciplines As the most common human immunologic disorder it excites the interest and concern of clinicians geneticists basic and clinical immunologists molecular biologists biochemists and physiologists General agreement has been forged on the pathophysiology of the disease and the mechanisms responsible for its maintenance but many areas remain as black boxes for which we have only hypotheses In 1992 Vienna hosted an international symposium to consider the explosion of information being generated by the identification cloning and expression of common environmental allergens The present second international conference on the MOLECULAR BIOLOGY OF ALLERGENS AND THE ATOPIC IMMUNE RESPONSE again jointly organized and co chaired by Professors Alec Sehon Winnipeg and Dietrich Kraft Vienna provided an exciting opportunity for many leaders in this field to share data argue hypotheses and seek future opportunities to enlarge our understanding of these very complex diseases This symposium was co sponsored by the International Union of Immunological Societies I U I S and the International Association of Allergology and Clinical Immunology It was held in the hospitable and comfortably elegant surroundings of Quebec City

New Horizons in Predictive Toxicology Alan G. E. Wilson, 2012 The sophistication of modelling and simulation technologies have improved dramatically over the past decade and their applications in toxicity prediction and risk assessment are of critical importance The integration of predictive toxicology approaches will become increasingly necessary as industrial chemicals advance and as new pharmaceuticals enter the market In this comprehensive discussion of predictive toxicology and its applications leading experts express their views on the technologies currently available and the potential for future developments The book covers a wide range of topics including in silico in vitro and in vivo approaches that are being used in the safety assessment of chemical substances It reflects the growing and urgent need to strengthen and improve our ability to predict the safety and risks posed by industrial and pharmaceutical chemicals in humans The reader will find extensive information on the use of current animal models used for various toxicities and target mediated toxicities Also discussed are the recent regulatory initiatives to improve the safety assessment of chemicals The book provides an expert and comprehensive discussion on the current status and future directions of predictive toxicology and its application The various chapters in the book also reflect the growing need for improvements in our technologies and abilities to predict toxicities of pharmaceutical and industrial chemicals to ensure product safety and protect public health

New Horizons of Tumor Immunotherapy Motomichi Torisu, Takeshi Yoshida, 1989 Papers of the Nov Dec 1988 meeting held as a follow up to that which took place in Fukuoka in 1983 The title has changed to therapy from immunobiology owing to our clearer grasp of the basic mechanisms of antitumor immunity through our increasing knowledge of various effector cells and their soluble mediators such as lymphokines and cytokines The

participants were largely Japanese and Americans The former have had the advantage of some ten years of use of many biological response modifiers BRM They have developed much data on the basic mechanisms of action through clinical trials The papers deal with tumor cell biology effector cells and molecules approaches to immunotherapy experiments with BRMs and their clinical use Lacks a subject index Annotation copyrighted by Book News Inc Portland OR

Prostate Cancer: New Horizons in Research and Treatment Michael L. Cher, Kenneth V. Honn, Avraham Raz, 2006-04-11 In recent years the pace of research in prostate cancer has increased dramatically Creative ideas in combination with new and emerging technologies have led to an explosion of discovery These types of advances in prostate cancer research presage an era of new treatment strategies based on an understanding of the cellular and molecular mechanisms of disease In creating this book we aimed to cover a broad bench to bedside research spectrum ranging from genetic molecular and cellular analyses to epidemiological studies refinements in local treatment strategies and new biologically based non hormonal treatments for systemic disease Researchers and clinicians will find in this book a group of timely and clinically relevant chapters on prostate cancer research and treatment
