On Asian Streets and Public Space Hee Limin,Low Boon Liang,Heng Chye Kiang,2010-01-01 The rapid urbanization of the Asian continent and transformation of its cityscapes have incited many professionals and scholars to pay urgent attention to the study of Asian streets and public spaces in the hope of recording them learning from their complex nature and even applying distilled principles in new environments before they disappear under the assault of rapid urban transformation This volume presents articles focusing on four prevalent themes namely transformation and modernity the culture of streets experiencing the street and finally design and quality of streets However these themes inevitably overlap pointing out again the complexity of what we call the street and the necessity for interdisciplinary research Finally adding Asian to street opens up the discussion about spaces in the Asian city and even concepts of Asian ness if indeed such a concept can be defined Believing in the importance of understanding Asian streets and streets in general for future design and planning of our cities this collection of essays encourages greater interest in this subject and therefore more interdisciplinary research Accordingly this book should interest not only urban planners architects and other design and building professionals but also environmentalists sociologists anthropologists geographers and historians as well as the general public
