**The Thermodynamic Machinery of Life** Michal

Kurzynski,2006-07-09 Thermodynamics was created in the first half of the 19th century as a theory designed to explain the functioning of heat engines converting heat into mechanical work In the course of time while the scope of research in this field was being extended to a wider and wider class of energy transformations thermodynamics came to be considered as a general theory of machines identified with energy transducers Important progress in biochemistry in the first half of the 20th century and in molecular biology in the second half made it possible to think of treating even living organisms as machines at least on the subcellular level However success in applying thermodynamics to elucidate the phenomenon of life has been rather mitigated Two reasons seem to be responsible for this unsatisfactory situation Nineteenth century thermodynamics dealt only with simple homogeneous systems in complete equilibrium Although during the 20th century a nonequilibrium thermodynamics was developed starting with the Onsager theory of linear response and ending with the Prigogine nonlinear theory of dissipative structures these theories still concern the originally homogeneous systems Because living organisms are complex systems with a historically frozen spatial and functional structure a thermodynamics of both nonequilibrium and complex systems is needed for their description The first goal of the present book is to formulate the foundations of such a thermodynamics *girl machine. Across its seven chapter span, Marden's treatise offers a compelling argument for the transformative power of cheerfulness. Written with a blend of narrative finesse and psychological insight, the book is at once a self-help manual and a work of philosophical contemplation, firmly entrenched in the tradition of Nineteenth Century American transcendentalist thought. It is a piece that resonates with an unshakeable belief in mankind's capability for improvement through the adoption of an optimistic outlook, and it is framed within the literary context of moral and intellectual betterment typical of its era.
