Ultimate Allied Fighters of the Second World War Justo Miranda, 2024-01-07 During the five years of the Second World War the power of engines and speed of aircraft increased as much as it did during twenty years of peacetime Conventional aircraft and engines reached the limits marked in the original design and surpassed them very fast The basis for this huge achievement was exotic fuels short lived artificially overpowered engines propellers with four five and even six blades and thinner wings with special sections of laminar flow Then the faster Allied fighters began to be attacked by a demon that lived in the air scientists called it compressibility buffeting and different type of aircraft suffered it at different speeds and manifested itself in different ways The American and British designers never understood the true causes behind the aerodynamic phenomenon They were forced to adopt brute force solutions by increasing engine power on the turbojet powered fighters leaving in the background the research on the last projects of fighters driven by monster piston engines The purpose of this book is to present them to the public for its notable interest

Airplane Design: Preliminary

configuration design and integration of the propulsion system Jan Roskam,1985 **A Scientist's War** Sir Clifford Paterson,1991 This book contains the diary he kept from 1939 until 1945 recording work in the laboratories and his own wider role in the planning and organisation of the scientific war effort against the background of the progress of the war problems of members of his staff A recurring theme is the development and production in the laboratories of more than 300 000 thermionic valves of 45 new types **An Aerospace Bibliography** ,1978 Open Cockpit over Africa Victor Smith,2001-06-07 This intimate account of what it was like to fly open cockpit single engined aircraft over the length and breadth of primitive Africa in the early 1930s has been written by one of the pioneers of the African air routes Victor Smith is in fact the last of that intrepid breed of pilots who risked their lives and their machines in a determined bid to open up the Darkest Continent and to reduce traveling times between Africa and Europe Civil Aviation Joint Committee on Civil Aviation of the U.S. Department of Commerce and the American Engineering Council,1926 **Air Carrier Traffic Statistics Monthly** ,2000 *CAB Air Carrier Traffic Statistics* ,1984-03 **Flight** ,1926 The Aeroplane ,1924

Speedbird Robin Higham,2013-05-30 Between 1939 and 1946 BOAC the British Overseas Airways Corporation was the nationalised airline of Great Britain and between 1946 and 1974 as such it exclusively operated all long haul British flights With its iconic Speedbird logo and its central role in the glamorous jet age of the 1950s and 1960s BOAC achieved a near cult status with admirers around the globe Yet to date there has been no comprehensive history of the organisation covering its structure fleet and the role it played in the critical events of the age from World War II to the end of empire a period when BOAC played a pivotal part in projecting British political power even as that power was waning During World War II BOAC operated a limited wartime service and prepared for the return of commercial flight in the postwar era But it was in the service of Britain's colonies and latterly the process of decolonisation that BOAC achieved its most pivotal role The development of flight technology enabled much faster connections between Britain and her imperial possessions as the colonies prepared for independence BOAC ferried diplomats politicians and colonial administrators between London and the far flung corners of Africa and Asia in much faster times than had previously been possible In this book acclaimed historian Robin Higham presents a unique comprehensive study of BOAC from the early jet travel of the de Havilland Comet and the Vickers VC10 to the dawn of supersonic passenger aviation Highly illustrated and meticulously researched using previously unseen sources this book will be essential reading for all aviation enthusiasts and anyone interested in the history of modern Britain
