Catholic Church Milestones William Frank Smith, 2010 Catholic Church Milestones is a concise easy to read introduction to the people and events that have shaped the Institutional Catholic Church from its beginning to the present day Counting over one billion members worldwide the Catholic Church is the world's largest Christian denomination and over the course of the last two thousand years has played a significant role on the world stage Milestones presents the reader

with both the good and not so good people and events in the church's history. Included are brief summaries of all twenty one ecumenical councils, the highlights of several of the most notable papacies, introductions to several of the spiritual mystics who have enriched the church, and descriptions of some of the world events that played a role in moving the church to where it is today. This is an ideal book for shared group discussion as well as for personal reading and reference. Milestones starts with a basic understanding that Jesus did not found a church; rather, his apostles and followers began small communities of believers after Jesus' Resurrection. In each of eight discrete time periods, the principle people and events are listed and discussed. Starting with the early local communities founded by the apostles, the first time period encompasses the early persecutions faced by the followers of Jesus and the transition of this new Way from a sect of the Jewish faith into a completely separate, mostly gentile religion. By the fourth century, we see the dramatic change as this new belief system becomes the official religion of the Roman Empire, followed by the even more dramatic changes as the Roman Empire splits and then falters, leaving the Pope in Rome as a major player in the political life of the western part of the former Empire throughout the middle ages. At the beginning of the eleventh century, the first major split occurs in the Catholic Church as most of the Eastern Churches reject the leadership of the Pope and form a new Orthodox union that exists to this day. Followed some five hundred years later by a major split in the West as Martin Luther and other reformers call for changes in the church which Rome soundly rejected. Instead, the Catholic Church turned inward and put up further walls of separation in its counter reformation attitudes; it would staunchly hold for the next four hundred years, even as the world changed with the industrial revolution, scientific breakthroughs, communism, and then two world wars during the first half of the twentieth century. Finally, we look at the changing face of the church following the Second Vatican Council.

Origins of the Salvation Army Norman Murdoch, 2014-09-19. The Salvation Army is today one of the world's best known and best regarded religious and charitable movements. In this deeply researched study, Norman Murdoch offers some surprising new insights into the denomination's origins and its growth into an international organization. Murdoch follows the lives and work of the Army's founders, William and Catherine Booth, from their beginnings as Wesleyan evangelists in the 1850s to their inauguration of a Utopian social plan in 1890. In particular, Murdoch identifies quick accommodation to failure as a persistent theme in the Army's early history. When the Booths' East End mission faltered in the mid 1870s, Booth took his preaching to the provincial towns. The failure of that ministry led him in 1878 to reorganize his efforts along then popular military lines, and the Salvation Army was born. With women as its shock troops, this Christian imperium would spread beyond Britain's boundaries to become as international in scope as Victoria's empire. Challenging various notions popularized in the denomination's official histories, this book will be of special interest to historians of nineteenth century social reform, scholars of evangelical Protestantism, and readers interested in the relationship between class and religion in the Anglo American world.
