**Militarisation and Demilitarisation in Contemporary Japan** Glenn D. Hook, 2003-12-16 The intertwined issues of Japanese identity and normality are at the centre of the tension between internal and external pressures on Japanese defence and security policies With chapters on peace thought the militarisation and demilitarisation of language as well as the hard aspects of the Japanese military build up in the 1980s and the response to the Gulf War in the 1990s this study challenges many of the preconceived notions on Japanese defence and security policies and the policy making process in Japan

*Rethinking Japanese Public Opinion and Security* Paul Midford, 2011-01-24 Rethinking Japanese Public Opinion and Security argues that Japanese public opinion matters and has acted to prevent overseas military deployments involving combat while increasingly supportive of a more normal military establishment capable of autonomously defending Japanese territory

*Japan's Middle East Security Policy* Yukiko Miyagi, 2013-05-13 This study examines how Japanese policy toward Middle East security issues is shaped by the need to both maintain Japan's security alliance with the US and its oil relationship with states in the Middle East Yukiko Miyagi introduces the historic roots of Japan's policy and then focuses on the major contemporary cases the Iraq war the Iranian nuclear crisis and the Arab Israeli conflict to expose and explain how clashing interests and dilemmas were negotiated to arrive at policy outcomes The author also sheds light on the utility of mainstream International Relations theories for understanding Japan's behaviour How do we understand the policy of a self declared anti militarist state forced to operate in a realist world and for whom energy supplies are a matter of vital national security This study shows how neither realism nor its rivals such as constructivism can wholly explain Japan's behaviour and suggests a theoretical framework for doing so Filling a major gap in our understanding of an increasingly important area of study Japan's Middle East Security Policy is an essential read for those interested in Japan's International Relations Middle East politics security studies and foreign policy

*Japan's Threat Perception during the Cold War* Eitan Oren, 2023-02-10 Oren re examines Japan's threat perception during the first two decades of the Cold War using a wide range of source materials including many unavailable in English or only recently declassified There is a widely shared misconception that during the Cold War the Japanese were largely shielded from threats due to the American military protection the regional balance of power Japan's geographical insularity and domestic aversion to militarism Oren dispels this showing how security threats pervaded Japanese strategic thinking in this period By dispelling this misconception Oren enables us to more accurately gauge the degree to which Japan's threat perception has evolved during and after the end of the Cold War and to enhance our understanding of Tokyo's strategic calculus in the current situation of rivalry between China and the United States This book will be of great value to both scholars of Japanese history and contemporary international relations

*Children and Violence* Bina D'Costa, 2016-10-04 Children's diverse experiences during periods of conflict post conflict and peacetime reveal that their roles in society and political communities are complex Based on this premise this book suggests

that understanding children's roles involves a critical analysis of where the child is situated within her/his family within socio-political networks and within the state. Through examining various case studies in South Asia, a region that is marked as much by its homogeneity as by its immense diversity, the book observes that significant tensions exist between universal and local approaches to childhood. It reflects how the development of international and national discourses on children's rights and protection is relevant to children's everyday lives in situations of conflict.

**Comprehensive Security in Asia** Kurt Werner Radtke, Raymond Feddema, 2000. The term comprehensive security goes beyond simplifications such as 'us and them'; it accounts for all aspects vital to national stability: food, energy, environment, communication, and social security. Confidence building methods, preventive diplomacy, energy security, second-order cybernetics, transparency of financial markets are all means to enhance overall stability. Comprehensive Security has become a concept particularly suited for a continent with many powerful countries. An important contribution to one of the key issues of contemporary Asian politics.

Written by a multidisciplinary team of contributors from the fields of political science, international relations, development, economics, public opinion, and Japan studies, this book sets out to be innovative in capturing the essence of the changing patterns of development cooperation and more importantly, Japan's role in within it in an era of great change.

Security, Arms Control and Defence Restructuring in East Asia Bjørn Møller, 2019-01-22. First published in 1998, this volume examines East Asia, especially Northeast Asia, which has been a region of considerable political security of importance for several key reasons. It features several great and medium powers: China, Japan, and Russia, as well as North and South Korea. Even though no arms race is yet discernible among these states, with the partial exception of the two Koreas, it is conceivable that one might commence. If it did, the level of militarization could become quite alarming, if only because of the tremendous and rapidly growing economic potential of the regional states. Even though relations among regional states, except the two Koreas, are currently peaceful, the region features several unresolved issues, e.g. concerning territory and a historical legacy of enmity between several states. To prevent such conflicts of interest from erupting into armed conflict is of the

utmost importance A stabilizing factor is that the military potentials in the region are still predominantly defensively oriented i e most states lack the requisite power projection or invasion capabilities to inflict serious harm on each other However this might change in the not so distant future Hence the importance of confidence building measures of an institutionalization of regional relations and of a strengthening of commitments to defensive military strategies and postures

Japan's Postwar Military and Civil Society Tomoyuki Sasaki,2015-08-27 Japan s so called peace constitution renounces war as a sovereign right of the nation and bans the nation from possessing any war potential Yet Japan also maintains a large world class military organization namely the Self Defence Forces SDF In this book Tomoyuki Sasaki explores how the SDF enlisted popular support from civil society and how civil society responded to the growth of the SDF Japan s Postwar Military and Civil Society details the interactions between the SDF and civil society over four decades from the launch of rearmament in 1950 These interactions include recruitment civil engineering disaster relief anti SDF litigation state financial support for communities with bases and a fear mongering campaign against the Soviet Union By examining these wide range issues the book demonstrates how the militarization of society advanced as the SDF consolidated its ideological and socio economic ties with civil society and its role as a defender of popular welfare While postwar Japan is often depicted as a peaceful society this book challenges such a view and illuminates the prominent presence of the military in people s everyday lives

*Cascades of Violence* John Braithwaite, Bina D'Costa, 2018-02-01 As in the cascading of water violence and nonviolence can cascade down from commanding heights of power as in waterfalls up from powerless peripheries and can undulate to spread horizontally flowing from one space to another As with containing water conflict cannot be contained without asking crucial questions about which variables might cause it to cascade from the top down bottom up and from the middle out The book shows how violence cascades from state to state Empirical research has shown that nations with a neighbor at war are more likely to have a civil war themselves Sambanis 2001 More importantly in the analysis of this book war cascades from hot spot to hot spot within and between states Autesserre 2010 2014 The key to understanding cascades of hot spots is in the interaction between local and macro cleavages and alliances Kalyvas 2006 The analysis exposes the folly of asking single level policy questions like do the benefits and costs of a regime change in Iraq justify an invasion We must also ask what other violence might cascade from an invasion of Iraq The cascades concept is widespread in the physical and biological sciences with cascades in geology particle physics and the globalization of contagion The past two decades has seen prominent and powerful applications of the cascades idea to the social sciences Sunstein 1997 Gladwell 2000 Sikkink 2011 In his discussion of ethnic violence James Rosenau 1990 stressed that the image of turbulence developed by mathematicians and physicists could provide an important basis for understanding the idea of bifurcation and related ideas of complexity chaos and turbulence in complex systems He classified the bifurcated systems in contemporary world politics as the multicentric system and the statecentric system Each of these affects the others in multiple ways at multiple levels and in ways that make events enormously hard to predict Rosenau 1990 2006 He replaced the idea of events with cascades to describe the event structures that gather momentum stall reverse course and resume anew as their repercussions spread

among whole systems and subsystems 1990 299 Through a detailed analysis of case studies in South Asia that built on John Braithwaite's twenty five year project Peacebuilding Compared and coding of conflicts in different parts of the globe we expand Rosenau's concept of global turbulence and images of cascades In the cascades of violence in South Asia we demonstrate how micro events such as localized riots land grabbing pervasive militarization and attempts to assassinate political leaders are linked to large scale macro events of global politics We argue in order to prevent future conflicts there is a need to understand the relationships between history structures and agency interest values and politics global and local factors and alliances
