groups that espouse such norms may seem weak in comparison with states corporations and such international agencies as the World Bank Yet they became progressively more effective at altering the policies and practices of these historically more powerful actors and organizations from the 1970s on Khagram develops these claims in a detailed ethnographic account of the transnational struggles around the Narmada River Valley Dam Projects in central India a huge complex of thirty large and more than three thousand small dams He offers further substantiation through a comparative historical analysis of the political economy of big dam projects in India Brazil South Africa and China as well as by examining the changing behavior of international agencies and global companies The author concludes with a discussion of the World Commission on Dams an innovative attempt in the late 1990s to generate new norms among conflicting stakeholders
