**MILITARY AND POLITICAL SUCCESSION IN CHINA - LEADERSHIP INSTITUTIONS BELIEFS.** Rand Corporation, **The Military & Political Succession in China** Michael D. Swaine, 1992 These are turbulent times for The People's Republic of China How will the Chinese military play a pivotal role in the changing of the guard **Political Mobility of Chinese Regional Leaders** Liang Qiao, 2017-07-14 A monarch is usually born a member of parliament or a president is usually elected but a regional leader in China is usually orchestrated to replace his or her predecessor through an opaque process and for reasons not normally made public The professional trajectories of Chinese regional leaders are mysterious in many ways Their promotions and demotions can be predictable in terms of their age gender nationality education factions and previous engagements in the political system Yet speaking of their capability performance opportunities and arrangements their future can also be unexpected Such arrangements are always originated from the Organization zuzhi which represents the Chinese Communist Party What are the factors the organization considers in order to make its final decisions on nominating and appointing a regional leader Today's regional leaders of China will very likely become the central leaders of China in the future By making an empirical analysis of Chinese regional leaders political mobility Qiao establishes a descriptive political mobility model that reveals leadership trajectories in Chinese politics

*Civil-Military Change in China Elites, Institutes, and Ideas after the 16th Party Congress* Larry Wortzel, In November 2002 the Chinese Communist Party held its 16th Congress and formally initiated a sweeping turnover of senior leaders in both the Party and the People's Liberation Army PLA The meeting heralded not merely a new set of personalities in positions of political and military power but also the emergence of a new generation of leaders Who are these individuals and what does their rise mean for the future of China and its military The group of China specialists who have written this book have applied their research talents intelligence and hands on experience to clarify and explain the most important issues of the day in China China obviously matters to the United States because of its size its spectacular patterns of growth its profound problems linked to rapid growth and its military intentions These specialists have avoided the diseases of bias demagoguery predispositions and showmanship which infect so many of the analyses of China Rather they have examined the facts and the trends to explain the divisions and cohesions in the Chinese leadership and their potential significance to the United States and the rest of the world These annual conferences have a long continuity stretching back to the early 1990s Hence there is a common database for the books produced each year The writers revisit major problems in China's development particularly in the military sphere They also examine how Chinese policies have evolved over the years and how important the United States has been in influencing China's strategy What for instance will the emerging leadership with its factious differences do about Taiwan and North Korea The conference took place at the Carlisle Barracks in September 19 21 2003 and was sponsored by the American Enterprise Institute the Heritage Foundation and the Army War College The exchanges were

frank the atmosphere was filled with camaraderie and tension      **China's Military Procurement in the Reform Era**

Yoram Evron,2015-06-26 The decisions that shape the policy of weapons procurement are an important area of national security policy This is all the more true for China which during recent decades has vacillated between different sources and directions of military build up This book explores the politics of military procurement in China under the successive leaderships of Deng Xiaoping Jiang Zemin and Hu Jintao It shows how China s political and military leaders have sought to adjust military procurement policy to meet China s strategic objectives to relate it to non military needs to strike a balance between the import of weapons and indigenous production and to determine the connections between hardware and other components of military power Exploring in detail five major shifts in the nation s military procurement it traces the considerations and negotiations among China s civilian and military leaderships By doing so it offers both a conceptual framework and empirical grounds for evaluating the factors that shape China s military procurement directions as well as their limitations prospects and operational implications As the first book to study comprehensively and systematically the attributes shaping China s military procurement it will be of great interest to students and scholars of Chinese politics Chinese history and military and strategic studies      **Interpreting China's Military Power** Ka Po Ng,2005-08-09

Although inter state tensions have generally been easing after the Cold War military power remains a dominant factor in Asian regional politics As China operating the world s largest army grows stronger there are ongoing debates over the implications for Asia s regional security This book argues that it is imperative to look beyond the empirical observations and conventional materialist reading of Chinese military development to understand its dynamics and directions in doctrinal terms and put it in a readiness context for evaluation Military doctrine has long been under studied and is often treated as a subject separate from force development But as this study contends this factor is necessary for interpreting the making and purposes of China s military power because it forms the intellectual foundation of military structural and hardware development When loaded with political rhetoric it also communicates to us the intended uses of the military power The role of doctrine is reinforced in the context of military readiness which defines what for and how the army is getting ready Force development is evaluated in structural operational and directional terms The importance of this analytical framework based on military doctrine and readiness is demonstrated in a survey of the evolution of Chinese military doctrine and force development As the Chinese People s Liberation Army has continued to adjust its military structure and operation to follow the doctrinal lead its switches between the doctrines of local war and total war have seen corresponding changes to the emphasis between operational and structural readiness      **China and International Security** Donovan C. Chau,Thomas M. Kane,2014-04-17

The first work of its kind this strategic assessment of China s national security reveals the nation s intentions capabilities and threats and their implications for the United States and the world As China continues to develop the strategic means to advance its national interests in Asia and around the world assessing its role in international security is the greatest strategic challenge now

faced by the United States and its allies China and International Security facilitates this critically important understanding analyzing topics that range from strategic geography and orientation to gender ratios Using detailed case studies and sharing expert insights the work provides historical internal and contemporary analyses that reveal the nature and character of China's national security This three volume set is written for scholars students and policymakers The volumes offer in depth articles penned by intelligence professionals and journalists as well as entries by scholars in fields as diverse as international politics history and strategic studies While other works may attempt to predict the future of China's rise or the nature of China's future bilateral relationships none so thoroughly examines the totality of China's domestic regional and international security and their implications

*Burying Mao* Richard Baum, 2018-06-05 For almost two decades after Mao Zedong's death an epic no holds barred contest was waged in China between orthodox Marxists and reformers With Deng Xiaoping's strong support the reformers ultimately won but they and China paid a heavy price Here Richard Baum provides a lively comprehensive guide to the intricate theater of post Mao Chinese politics He tells the intriguing story of an escalating intergenerational clash of ideas and values between the aging revolutionaries of the Maoist era and their younger more pragmatic successors Baum deftly analyzes the anatomy of the reformers ultimate victory in his brilliant reconstruction of the twists and turns of the reform process

**China's Leaders** Cheng Li, 2001-02-28 Who will govern China at the dawn of the twenty first century What are the social backgrounds and career paths of the new generation of leaders How do they differ from their predecessors in their responses to perplexing economic and sociopolitical challenges Drawing upon a wealth of both quantitative and qualitative data on the so called fourth generation of leaders those who were young during the Cultural Revolution Cheng Li sheds valuable light on these key questions He shows that this group is more diversified than previous generations of CCP leaders in formative experiences political solidarity ideological conviction and occupational background The author explores the contradictions between political leaders and non elite peers in the same generation those approaching middle age who were barred from education during the Mao era and now often are unemployed and disenchanting with the government The book concludes with the intriguing notion that this generation of leaders may have a better understanding of its peers needs and concerns and therefore may make the regime more accountable to its people thus contributing to rather than opposing democratic development

**China's Security State** Xuezhi Guo, 2012-08-29 China's Security State describes the creation evolution and development of Chinese security and intelligence agencies as well as their role in influencing Chinese Communist Party politics throughout the party's history Xuezhi Guo investigates patterns of leadership politics from the vantage point of security and intelligence organization and operation by providing new evidence and offering alternative interpretations of major events throughout Chinese Communist Party history This analysis promotes a better understanding of the CCP's mechanisms for control over both Party members and the general population This study specifies some of the broader implications for theory and research that can help clarify the nature of

Chinese politics and potential future developments in the country's security and intelligence services China's Changing Political Landscape Cheng Li, 2009-08-01 While China's economic rise is being watched closely around the world the country's changing political landscape is intriguing as well Forces unleashed by market reforms are profoundly recasting state society relations Will the Middle Kingdom transition rapidly slowly or not at all to political democracy In China's Changing Political Landscape leading experts examine the prospects for democracy in the world's most populous nation China's political transformation is unlikely to follow a linear path Possible scenarios include development of democracy as we understand it democracy with more clearly Chinese characteristics mounting regime instability due to political and socioeconomic crises and a modified authoritarianism perhaps modeled on other Asian examples such as Singapore Which road China ultimately takes will depend on the interplay of socioeconomic forces institutional developments leadership succession and demographic trends Cheng Li and his colleagues break down a number of issues in Chinese domestic politics including changing leadership dynamics the rise of business elites increased demand for the rule of law and shifting civil military relations Although the contributors clash on many issues they do agree on one thing the political trajectory of this economic powerhouse will have profound implications not only for 1.3 billion Chinese people but also for the world as a whole

**Chinese Foreign Policy** Suisheng Zhao, 2016-07-22 This volume explores how China is adapting to international norms and practices while still giving primacy to its national interests It examines China's strategic behaviour on the world stage particularly in its relationships with major powers and Asian neighbours *Chinese Regionalism* Richard H Yang, 2021-11-28 As China is poised to become a global economic force its leadership is on the brink of imminent and potentially sweeping change With Deng Xiaoping's demise seemingly at hand the inevitable redistribution of power within this vast land has become a crucial concern for China and the world alike How will China cope with this changing of the guard Will a centralized government remain or will the country break apart This comprehensive volume brings specialists from East and West together to assess the key issue of regionalism and its effect on shifting power in the PRC Focusing specifically on the pivotal role of the People's Liberation Army the contributors address a wide range of topics including economic reform the possible reprise of warlordism and regional security and they present a variety of case studies

*China's Use of Military Force* Andrew Scobell, 2003-09-08 In this unique study of China's militarism Andrew Scobell examines the use of military force abroad as in Korea 1950 Vietnam 1979 and the Taiwan Strait 1995 1996 and domestically as during the Cultural Revolution of the late 1960s and in the 1989 military crackdown in Tiananmen Square Debunking the view that China has become increasingly belligerent in recent years because of the growing influence of soldiers Scobell concludes that China's strategic culture has remained unchanged for decades Nevertheless the author uncovers the existence of a Cult of Defense in Chinese strategic culture The author warns that this Cult of Defense disposes Chinese leaders to rationalize all military deployment as defensive while changes in the People's Liberation Army's doctrine and

capabilities over the past two decades suggest that China's twenty-first century leaders may use military force more readily than their predecessors

**China's Rising Sea Power** Peter Howarth, 2006-04-18 This is a fascinating insight into China's strategic abilities and ambitions probing the real depths of its plans for the twenty-first century China's Rising Sea Power explores similarities between China's strategic outlook today and that of earlier continental powers whose submarine fleets challenged dominant maritime powers for regional hegemony Germany in two World Wars and the Soviet Union during the Cold War Using insights from classical naval strategic theory Peter Howarth examines Beijing's strategic logic in making tactical submarines the keystone of China's naval force structure He also investigates the influence of Soviet naval strategy and ancient Chinese military thought on the PLA Navy's strategic culture contending that China's increasingly capable submarine fleet could play a key role in Beijing's use of force to resolve the Taiwan issue This book will be of great interest to all students and scholars of security and strategic studies Asian politics geopolitics and military naval strategy

**China - U.S. Relations in the 21st Century**, 1996

**China - U.S. relations in the 21st century fostering cooperation preventing conflict.**

**Foreign Investment in China** Peter Corne, 2023-09-20 The author a practitioner in Shanghai contends that all foreign investment in China will remain totally at risk until a broad range of enormous administrative lacunae are filled with responsible reliable legal norms These gaps in the system all clearly analyzed and measured here for the reader include the lack of clear delineation between legal and policy norms the breadth of discretion accorded to bodies charged with legal interpretation and implementation the limited scope of judicial review and resulting problems of legislative inconsistency and haphazard legal enforcement Published under the Transnational Publishers imprint

**PLA Influence on China's National Security Policymaking** Phillip C. Saunders, Andrew Scobell, 2015-09-09 In recent years there have been reports of actions purportedly taken by People's Liberation Army PLA units without civilian authorization and of Chinese Communist Party CCP civilian leaders seeking to curry favor with the military suggesting that a nationalistic and increasingly influential PLA is driving more assertive Chinese policies on a range of military and sovereignty issues To many experienced PLA watchers however the PLA remains a party army that is responsive to orders from the CCP PLA Influence on China's National Security Policymaking seeks to assess the real relationship between the PLA and its civilian masters by moving beyond media and pundit speculation to mount an in-depth examination and explanation of the PLA's role in national security policymaking After examining the structural factors that shape PLA interactions with the Party State the book uses case studies to explore the PLA's role in foreign policy crises It then assesses the PLA's role in China's territorial disputes and in military interactions with civilian government and business exploring the military's role in China's civil military integration development strategy The evidence reveals that today's PLA does appear to have more influence on purely military issues than in the past but much less influence on political issues and to be more actively engaged in policy debates on mixed civil military issues where military equities are at stake
