Military And Society In 21st Century Europe A Comparative Analysis:

Military and Society in 21st Century Europe Jürgen Kuhlmann, Jean M. Callaghan, This compendium on Europe's military situation is written by leading analysts of military studies representing every major nation of Europe. Also included are three overview chapters that set the tone for this volume. These chapters: Martin Shaw on the evolution of a common risk society; Christopher Dandeker on the military in democratic societies; and Wilfried von Bredow on the re-nationalization of military strategy provide an introduction to the work. Although the Cold War is now two decades removed from Europe, the challenges of transition to new defense systems and institutional structures still confront those who plan the future for military establishments. The country studies as well as the final analysis of the trends and probable future developments in Europe should be required reading throughout the national security structure for politicians and decision makers seeking to understand the dilemmas facing European militaries and the societies they defend. The chapters cover a wide range of nations. Jean Callaghan, Christo Domoztov, and Valery Ratchcev examine the Bulgarian armed forces after the 1997 elections; and Marie Vlachova and Stefan Sarvas review civil-military relations in the Czech Republic. Janos Szabo studies the defense sector in Hungary. Adriana Stanescu sees Romania as a case of delayed modernization. Vladimir Rukavishnikov studies the military in post-communist Russia. Paul Klein and Jürgen Kuhlmann review the German armed forces in the context of a peace dividend. Bernard Boene and Didier Danet consider France and the post-draft situation. Marina Nuciari and Giuseppe Caforio consider the Italian military in a democratic context. Jan van der Meulen and his colleagues look upon the Netherlands' military as a case study in post-modernization. The final contribution summarizes lessons learned in assessing the contemporary civil-military complex.

Military and Society in 21st Century Europe Jürgen Kuhlmann, Jean Callaghan, 2000

After the Cold War came to an end European countries in both East and West faced the common question of how their military organizations and those of their neighbors would respond to shifts in international relations affecting their economies their perception of globalized threats and cross national security management It is undisputed for example that in well developed democratic societies the challenge to the legitimacy of the military in society the decreasing subjective apprehension of threat and growing opposition to systems of universal conscription have been linked to gains in wealth and living standards This volume seeks by empirically measuring social indicators to assess the current state of civil military relations in a number of countries in Eastern Europe Bulgaria Czech Republic Hungary Romania Russia as well as the state of relations in several of their Western European counterparts France Germany Italy the Netherlands The country studies describe and analyze the differing positions of the military in their specific national settings

Forster, 2005-10-31 In the post Cold War era European militaries are engaged in an ongoing adaptation which is challenging relations between armed forces and the societies that they serve This book offers an innovative conceptual framework to critically evaluate contemporary civil military relations across the continent of Europe It analyzes eight key issues in armed forces and society relations to explore the scale and intensity of these changes **The Risk Society at War** Mikkel Vedby Rasmussen, 2006-12-14 In the globalised world of the twenty first century security policy in Western societies is driven by a wish to prevent future threats from becoming reality Applying theories of risk society to the study of strategy this book analyses the creation of a new approach to strategy The author demonstrates that this approach creates new choices for policy makers and challenges well established truths within the study of security and

strategy He argues that since the seventeenth century the concept of strategy has served to rationalise new technologies doctrines and agents By outlining the history of the concept of strategy in terms of rationality Rasmussen presents a framework for studying strategy in a time of risk and uses this framework to analyse how new technologies of war pre-emptive doctrines globalisation and the rise of the terrorist approach to warfare can formulate a new theory of strategy

Bruneau, 2021-11-01 This second edition of The Routledge Handbook of Civil Military Relations offers a wide ranging internationally focused overview of the field of civil military relations The armed forces are central actors in most societies and are involved in many different roles Amongst other activities they engage in peace operations support the police in fighting crime support civilian authorities in dealing with natural disasters and fight against terrorists and in internal conflicts The existing literature on this subject is limited in its discussion of warfighting and thus does not do justice to the variety of roles This second edition not only fills this important lacuna but offers an up to date comparative analysis and provides a conceptual framework to analyze how strategies can realistically be implemented Amalgamating ideas from key thinkers in the field the book is organized into three main thematic parts Part I Civil Military Relations in Non Democratic States and Illiberal Democracies Part II Civil Military Relations in New Democracies Part III Civil Military Relations in Established Democracies This handbook will be essential reading for students and practitioners in the fields of civil military relations defense studies war and conflict studies international security and IR in general
