Military Conflicts Upon Taiwan Strait:

Sources Of Conflict And Cooperation In The Taiwan Strait Yongnian Zheng, Raymond Ray-kuo Wu, 2006-07-18 This volume is the first attempt to systematically analyze issues and challenges confronting the Taiwan Strait after the March 2004 election. The volume focuses on internal politics on both sides of the Taiwan Strait and their impact on cross Strait ties and international responses. It also reflects different perspectives namely China, the United States, Singapore and Taiwan. Consolidating these perspectives, the volume suggests directions for continued research on a potentially volatile area where many view as the world's next hot spot. *Cooperation Or Conflict in the Taiwan Strait?* Ralph N. Clough, 1999 The 1996 deployment of two U.S. carrier battle groups to the waters off Taiwan in response to the firing of Chinese missiles close to Taiwan's shores brought home suddenly the genuine danger of a military clash between the United States and China over the Taiwan issue. In this timely book, distinguished analyst Ralph N. Clough assesses the intractable differences between Beijing and Taipei over the status of Taiwan, the rise and growing strength of an opposition party advocating Taiwan independence, and Beijing's threat to use military force to prevent independence. At the same time, he weighs the moderating influence of investment and trade across the Taiwan Strait and the reopening of cross strait dialogue. The author warns against a U.S. commitment to intervene militarily against any Chinese use of force which could encourage Taiwan to expect U.S. backing if it declared independence, nor should Washington renounce military intervention which would give the PRC a free hand. Instead, Clough argues for a policy of ambiguity providing the United States the flexibility to intervene militarily or not as circumstances dictate and at the same time giving more active approval and support to cooperation between the people and governments on both sides of the strait.

Libicki Why Cyberdeterrence is Different *The Costs of Conflict: The Impact on China of a Future War* Andrew Scobell, It is increasingly important for Americans to think carefully about the vast complexities of the U S China relationship and the calculations that go into forming courses of action The key question is will China s so called first priority of economic development and its resulting influence on domestic social stability curtail China s continuing reliance on military force as a means of exerting its influence In addition will economic development enhance China s comprehensive national power and thus contribute to some of China s more unhealthy goals such as dominating the South China Seas seizing Taiwan by force or grabbing the Senkaku Islands from Japan Is the China Taiwan economic dynamic strong enough to offset military adventurism How this dilemma is managed by the United States China and Taiwan will affect the future of Asia and perhaps the world We have tried to present in this book factual and analytical essays which stress the need for squarely addressing these questions China's Use of Military Force Andrew Scobell,2003-09-08 In this unique study of China s militarism Andrew Scobell examines the use of military force abroad as in Korea 1950 Vietnam 1979 and the Taiwan Strait 1995 1996 and domestically as during the Cultural Revolution of the late 1960s and in the 1989 military crackdown in Tiananmen Square Debunking the view that China has become increasingly belligerent in recent years because of the growing influence of soldiers Scobell concludes that China s strategic culture has remained unchanged for decades Nevertheless the author uncovers the existence of a Cult of Defense in Chinese strategic culture The author warns that this Cult of Defense disposes Chinese leaders to rationalize all military deployment as defensive while changes in the People s Liberation Army s doctrine and capabilities over the past two decades suggest that China s twenty first century leaders may use military force more readily than their predecessors New Dynamics in Cross-Taiwan Strait Relations Weixing Hu,2013-04-02 Relations between mainland China and Taiwan have improved markedly in recent years giving rise to the key question How far can the current rapprochement go This book focuses on how mainland China Taiwan relations are likely to develop in future It considers economic relations including the many recent trade agreements the political sphere where there has been little progress the impact of increasing personal social contacts and the role of international actors especially the United States The book concludes by arguing that the present circulatory dialogue is likely to continue without a transformative breakthrough *International Armed Conflict Since 1945* Herbert K.
