

Military Motor Transportation

Benjamin King, Richard C. Biggs

Military Motor Transportation:

Army Motor Transport Units and Operations ,1980 Motor Transportation for the Army, a Lecture United States. Quartermaster General of the Army,1917 **Military Motor Transportation** Coast Artillery School (U.S.),1923 *Army motor transport units and operations* United States. Department of the Army,1980 Military Motor Transport, 1950-1954 ,1958 **Military Motor Transport, 1950-1954** Joseph Bykofsky,1958 *Motor Transportation for the Army* Chauncey Brooke Baker,1917 **Spearhead of Logistics** Benjamin King,Richard C. Biggs,2016-02-25 *Spearhead of Logistics* is a narrative branch history of the U S Army s Transportation Corps first published in 1994 for transportation personnel and reprinted in 2001 for the larger Army community The Quartermaster Department coordinated transportation support for the Army until World War I revealed the need for a dedicated corps of specialists The newly established Transportation Corps however lasted for only a few years Its significant utility for coordinating military transportation became again transparent during World War II and it was resurrected in mid 1942 to meet the unparalleled logistical demands of fighting in distant theaters Finally becoming a permanent branch in 1950 the Transportation Corps continued to demonstrate its capability of rapidly supporting U S Army operations in global theaters over the next fifty years With useful lessons of high quality support that validate the necessity of adequate transportation in a viable national defense posture it is an important resource for those now involved in military transportation and movement for ongoing expeditionary operations This text should be useful to both officers and noncommissioned officers who can take examples from the past and apply the successful principles to future operations thus ensuring a continuing legacy of Transportation excellence within Army operations Additionally military science students and military historians may be interested in this volume **Motor Transports in War (Illustration)** Horace Wyatt, We have been told and rightly many times within the last few weeks that the present war is unique not merely on account of the vastness of the contending armies but also on account of the power of the weapons employed In fact the war has very properly been described as an engineer s war and such indeed it is as the engineer is wholly responsible for the tremendous development in every warlike instrument which has taken place since 1870 He is responsible too not merely for the development but for the invention of wholly new methods of offence and defence But his influence does not end here and it is not merely in the firing line that one sees the influence of the engineer even as this war is the first occasion on which modern weapons explosives and projectiles have been tested on the grand scale so too is it even more emphatically the first occasion on which motor transport has been thoroughly tested at all While the recent Balkan war provided a practical test of many of the weapons used in the great war to day motor transport played only a very small part in it and it is very extraordinary that an innovation of this kind should be truly tested for the first time upon such a stupendous scale It is the motor car the motor van and the motor lorry which have rendered the rapid movements of the present war possible it is not yet realised to the full how great have been the services of motor transport in the supply of ammunition and food to the

troops and in the rapid conveyance of the wounded to the hospitals No one is better qualified than Mr Horace Wyatt to deal with this new and important branch of modern warfare In his capacity formerly as Editor and now as Consulting Editor of Motor Traction he has studied the question from its inception from its small beginnings in British army man uvres many years ago right up to the present time he has followed the subject with the closest attention Not only so he has personally investigated the work performed by motor transport in the grandes man uvres on the Continent I have had the good fortune to work closely with him for many years and it puts me in a position to say that his knowledge of the subject is unique both in detail and in general so that readers of the present volume may rest assured that facts and facts alone are dealt with in its pages

Motor Transportation in the Theater of Operations United States. Quartermaster School, Camp Lee, Va, 1943

On the Road to Victory Michael Harrison, 2020-02-19 The story of a revolution in moving troops and supplies A rare gem that will fill a gap in your World War I library Highly recommended Indy Squadron Dispatch The Great War produced many innovations in particular the spectacular development by the British and French armies of motor transport The age old problem of moving soldiers and their supplies was no different in 1914 than it had been some 2 400 years ago when the great Chinese military thinker Sun Tzu informed his readers that the further an army marched into enemy territory the more the cost of transport increased even to the point that more supplies were consumed by the transportation of men and their horses than was delivered to the troops Using many previously unpublished illustrations including artists impressions this book tells the story of the men and women who made motor transport work for the victorious British Army on the Western Front so that in 1918 the humble lorry did indeed help propel the British Army forward on the road to victory
