Military Withdrawal from Politics Talukder Maniruzzaman, 1987 **Routledge Handbook of Comparative Political Institutions** Jennifer Gandhi, Rubén Ruiz-Rufino, 2015-04-10

The Routledge Handbook of Comparative Political Institutions HCPI is designed to serve as a comprehensive reference guide to our accumulated knowledge and the cutting edge of scholarship about political institutions in the comparative context. It differs from existing handbooks in that it focuses squarely on institutions but also discusses how they intersect with the study of mass behaviour and explain important outcomes drawing on the perspective of comparative politics. The Handbook is organized into three sections. The first section, consisting of six chapters, is organized around broad theoretical and empirical challenges affecting the study of institutions. It highlights the major issues that emerge among scholars defining, measuring and analyzing institutions. The second section includes fifteen chapters, each of which handles a different substantive institution of importance in comparative politics. This section covers traditional topics such as electoral rules and federalism as well as less conventional but equally important areas including authoritarian institutions, labor market institutions and the military. Each chapter not only provides a summary of our current state of knowledge on the topic but also advances claims that emphasise the research frontier on the topic and that should encourage greater investigation. The final section, encompassing seven chapters, examines the relationship between institutions and a variety of important outcomes such as political violence, economic performance and voting behavior. The idea is to consider what features of the political, sociological and economic world we understand better because of the scholarly attention to institutions. Featuring contributions from leading researchers in the field from the US, UK, Europe and elsewhere, this Handbook will be of great interest to all students and scholars of political institutions, political behaviour and comparative politics.

Jennifer Gandhi is Associate Professor, Department of Political Science, Emory University. Rubén Ruiz-Rufino is Lecturer in International Politics, Department of Political Economy, King's College London.

Turkish Politics and the Military William Hale, 2013-09-13

Turkey's geographical position between the Middle East and Europe and at the centre of the current upheavals in the USSR and the Balkans has led to a reawakening of interest in its international standing. Meanwhile its domestic politics are of increasing interest and Turkey seems to have become a model for Liberal Democracy in Central Asia. David Hale focuses on the role of the military in contemporary politics. He argues that the military has behaved quite differently from its counterparts in other third world states; it has acted in some degree as a guardian of the state committed to economic and social modernisation. The book places contemporary politics in perspective by looking at the evolution of the armed forces in Turkey from the end of the eighteenth century. The author traces the role of the military through the establishment of the Republic, the military coups of 1960 and 1980, the gradual return to civilian government of the sixties and seventies and the military disengagement from politics of 1983 onwards. Hale is interested in the army as an actor in the political drama rather than in the professional functions of soldiers and his historical exposition
