**The Mosin-Nagant Rifle** Bill Harriman, 2016-10-20 The Mosin Nagant is the world's longest surviving and most widely distributed military rifle having armed the forces of Russia and many other countries for more than five decades. It has seen action from World War I to the present day but is most famous for its role during World War II when it proved to be an excellent sniping weapon in the hands of marksmen such as Vasily Zaitsev and Simo Häyhä. This study covers the rifle's entire combat history from its early development through to its service in combat and the impact it has had on modern firearms. Dramatic battle reports and specially commissioned artwork complement the meticulously researched examination of the Mosin Nagant provided by author Bill Harriman as he delves into the history of one of the most iconic rifles of World War II.

*Sniping Rifles on the Eastern Front 1939-45* Martin Pegler, 2019-03-21 The Soviet Union had developed a significant sniping force by 1939 but the extraordinary skill and cunning displayed by Finnish snipers during the Winter War forced the Soviets to innovate. On the other side, German sniping suffered from a lack of standardization of weapons and a lack of marksmen deployed at the start of the Great Patriotic War 1941-45. There were few heroes in the conflict but on both sides the snipers were idolized, especially on the Soviet side, gaining almost mythical status. As well as traditional bolt action weapons, both sides used several types of semi-automatic rifle such as the SVT 38 and the Gew 41. Offering greater firepower at the expense of long range accuracy, such weapons would be profoundly influential in the postwar world. Fully illustrated, this absorbing study investigates the development of sniping weapons and techniques on World War II's Eastern Front.

The Arisaka Rifle Bill Harriman, 2019-08-22 Entering service in 1897, the Arisaka family of bolt action rifles armed Japanese troops and others through two world wars and many other conflicts including the Russo Japanese War of 1904-05. Issued in long and short versions, the latter for cavalry and specialists, the Type 30 was the first main Arisaka model arming Imperial Japan's forces during the Russo Japanese War, though after the war it was refined into the Type 38 which would still be in use in 1945. The main Arisaka rifle of World War II though was the Type 99. Lighter and more rugged than the US M1903 Springfield rifle, it would face in the initial battles in the Pacific. It was produced in four main variants including a sniping model and a take down parachutist's rifle. Featuring full colour artwork as well as archive and close up photographs, this is the absorbing story of the rifles arming Imperial Japan's forces from the trenches of Mukden in 1905 to the beaches of Okinawa 40 years later.
