**Military Conversion** D.B. Rao,2002-09 The concept of establishing global peace is dramatically changing the functions of military industry Many changes are occurring in this industry which have a bearing on science and technology The articles appearing in this book are dealing with the impact of military conversion on science and technology This book will be useful to the military experts and scientists in analysing and directing the activities of military industry **Changes in India's**

**foreign policy towards Pakistan** Dr. Nitin Prasad,2017-02-01 For years the centre of India s foreign policy was Pakistan Love it or hate it This was the country that the external affairs ministry had to break its head over most of the times You can t brush off four wars 1947 48 1965 1971 and 1999 two conflicts Rann of Kutch and Siachen militancy in Kashmir that claimed tens of thousands of lives and terrorist attacks all over India Pakistan and India literally split on an ideological basis due to the notion of the two nation theory and that Muslims cannot live as a minority in Hindu India Dispute over Kashmir emphasises this divide and it is still brought up even to this day India has had to fight 4 wars with Pakistan and since 1980 s when Soviets started to get involved in Afghanistan USA and Pakistan started anti Soviet terrorism and Pakistan had the bright idea to use it against India further worsening relations between the two nations especially when military coup has meant that the war hungry military has been in power and this led to the 1965 war and the Kargil War The foreign policy of Narendra Modi concerns the policy initiatives made towards other states by the current Modi government after he assumed office as Prime Minister of India on 26 May 2014 The Ministry of External Affairs headed by External Affairs Minister Sushma Swaraj the first woman to hold the office since Indira Gandhi is responsible for carrying out the foreign policy of India Although the book has involved considerable empirical research it is not simply fact finding enterprise It is also a prescriptive and analytical study intended to create and influence opinion regarding the essentials of policy making process that would minimize the chances of non rationality in Indian Foreign Policy **War and the Market Economy** Lester B

Stone,2017-02-01 War has influenced economic history profoundly across time and space Winners of wars have shaped economic institutions and trade patterns Wars have influenced technological developments Above all recurring war has drained wealth disrupted markets and depressed economic growth The role of war in the world economy is complex yet pervasive The shadow of war lies across economic history influencing its pace and direction and war continues to both shape economic developments and respond to them The market economy involves peaceful cooperation The division of labor cannot function effectively amidst a war Warfare among primitive tribes did not suffer this drawback because the warring parties had not been engaged in trade before the hostilities Thus they engaged in total war Modern wars are won with material Capitalist countries defeat their socialist rivals because private entrepreneurs are more efficient in churning out products whether consumer goods during peacetime or weapons for their governments Even so ultimately war and the market economy are incompatible as the market relies on peaceful cooperation This concise and legible book will provide key text to

all students teachers and researchers      **Checkmating Chinas Growing Influence** Jonatan Rudolph, 2018-11-01 The rise of China as an emerging power and as the most likely challenger to the global preponderance of the US is already having a significant impact across the globe This phenomenon is being debated and analysed at various levels In India too it is generating a lot of excitement On the one hand it is considered to be an opportunity and on the other a challenge China represents the most impressive and because of its size the most important development success story in the world history Increasingly look east will mean looking to China Within a generation China is likely to become the largest economy in the world and in that position it has much to contribute to developed and developing countries in terms of trade and investment and above all in terms of ideas on development In Asia the rise of China has translated into increased assertiveness both in the South China Sea and now in the Indian Ocean Region China s formidable naval presence in the Indian Ocean all weather friendship with Pakistan growing influence in Nepal and Bangladesh and increasing border skirmishes in Arunachal Pradesh all are glaring indicators of China s intentions The much traded liberal argument that the deep rooted economic engagements between the two countries would limit the possibility of the confrontation doesn t seem to convince anymore Instead an increasingly assertive China is likely to arrest India s geostrategic and national interests The most decisive counter therefore is to prepare for a disguised cold war in the region which is imminent by its early signs The book covers China s role in Global power dynamics competition or cooperation with major powers and its neighbours and its power status Strategic implications of China s Rise dictate the courses of action to be adopted by the United States whom it intends to displace and its immediate neighbour India      Army Research and Development , 1968      **World Encyclopaedia of Nations and Nationalities** E.G. Ravenstein & A.H. Keane, Elisee Reclus, 1997 The origins and development of the fascinating variety of continents countries and communities of the world are the engrossing subjects of the present prize set of 17 Vols in 34 Parts of the encyclopaedia With marvelously lucid text and equally graphic illustrations the writers and editors present a panoramic account of the splendid variety of the family of mankind its numerous and varied habitations its physical human and economic geography of man and his activities and the living dynamic relation that mankind had with fellow communities across land and sea as well as with the planet that sustains all of them The World Encyclopaedia of Nations and Nationalities opens to students teachers and general readers a vast and beautiful window onto the great as well as the little known customs manners and cultures of the world reveals the universal geographical features and singularities of all countries in the continents the introduces in vivid detail the many kind of inhabitants that are found world wide Not only is this brilliantly conceived encyclopaedia the pride of many libraries across the world but it is also regarded as an apt companion and complement to the earlier historic work of Darwin namely Origin of the Species In its comprehensive sweep and vibrant treatment the present the present volumes of this encyclopaedia will be an essential part of all libraries

National Aeronautics and Space Administration,1975 *Army RD & A Bulletin* ,1974 **Secret Weapons and World War II** Walter E. Grunden,2005 Grunden s analysis of this fundamental flaw in the Japanese war effort seamlessly weaves together science technology and military history to provide an entirely unique look at a crucial but understudied aspect of World War II Comparing the science and weapons programs of all the major combatants he demonstrates that Japan s failure was nearly inevitable given its paucity of strategic resources an inadequate industrial base the absence of effective centralized management to coordinate research military hostility toward civilian scientists and bitter interservice rivalries In the end Japan could not overcome these obstacles and thus failed to make the transition to the kind of Big Science it needed to ward off its enemies and dominate the Far East BOOK JACKET *Technical Abstract Bulletin* , *Peace and the Sciences* ,1992 **NBS Special Publication** ,1970
