Gender Integration in NATO Military Forces Lana Obradovic, 2016-04-15 Numerous states have passed gender integration legislation permanently admitting women into their military forces As a result states have dramatically increased women s numbers and improved gender equality by removing a number of restrictions Yet despite changes and initiatives on both domestic and international levels to integrate gender perspectives into the military not all states have improved to the same extent Some have successfully promoted gender integration in the ranks by erasing all forms of discrimination but others continue to impede it by setting limitations on equal access to careers combat and ranks Why do states abandon their policies of exclusion and promote gender integration in a way that women s military participation becomes an integral part of military force By examining twenty four NATO member states this book argues that civilian policymakers and military leadership no longer surrender to parochial gendered division of the roles but rather support integration to meet the recruitment numbers due to military modernization professionalization and technological advancements Moreover it proposes that increased pressure by the United Nations to integrate gender into security and NATO seeking standardization and consistency on the international level and women s movements on the domestic level are contributing to greater gender integration in the military Winner of the 2015 ERGOMAS Best Book in Civil Military Relations Award

Men Under Fire Jiří Hutečka, 2019-12-03 In historical writing on World War I Czech speaking soldiers serving in the Austro Hungarian military are typically studied as Czechs rarely as soldiers and never as men As a result the question of these soldiers imperial loyalties has dominated the historical literature to the exclusion of any debate on their identities and experiences *Men under Fire* provides a groundbreaking analysis of this oft overlooked cohort drawing on a wealth of soldiers private writings to explore experiences of exhaustion sex loyalty authority and combat itself It combines methods from history gender studies and military science to

reveal the extent to which the Great War challenged these men's senses of masculinity and to which the resulting dynamics influenced their attitudes and loyalties

Decoding a Royal Marine Commando Mark Burchell, 2018-10-25 With a heritage dating back to the mid-seventeenth century the Royal Marines have accrued a rich history of rituals, artefacts and material culture that is consciously deployed in order to define and shape the institution both historically and going forward into an uncertain future. Drawing upon this heritage Mark Burchell offers a unique method of understanding how the Royal Marines draw upon this material culture in order to help transform ordinary labour power to political agency comprising acts of controlled and sustained violence. He demonstrates how a barrage of objects and items including uniforms, weapons, landscapes, architecture, personal kit, drills, rituals and iconography are deployed in order successfully to integrate the recruits into the Royal Marines culture. It is argued that this material culture is a vital tool with which to imprint the military's own image on new recruits as they embark on a process of de-individualisation. Having been granted unprecedented access to the Commando Training Centre at Lympstone as an anthropologist Burchell observed an intake of recruits throughout their demanding and exhausting year-long training programme. The resulting book presents to the academic community for the first time a theorised in-depth account of a relatively unexplored social community and how its material culture creates and reifies new military identities. This path-breaking interdisciplinary analysis provides fresh understanding of the multiple processes of military enculturation through a meticulous revision of the relationships that exist between disciplinary and punishment practices, violence and masculinity, narratives and personhood and will explore how these issues are understood by recruits through their practical application of body to physical labour and by the cues of their surrounding material culture.

The Men We Loved Danny Kaplan, 2006-11-01 Some semi-public, exclusive male settings, most noticeably in the military, encourage the production of intimacy and desire. Yet whereas in most instances this desire is displaced through humor and aggressive gestures, it becomes acknowledged and outright declared once associated with sites of heroic death. In his provocative study of interrelations between friendship in everyday life and national sentiments in Israel, the author follows selected stories of friendship ranging over early childhood, school, the workplace and some unique war experiences. He explores the symbolism of friendship in rituals for the fallen soldiers, the commemoration of Prime Minister Yitzhak Rabin and the national infatuation with recovering bodies of missing soldiers. He concludes that the Israeli case offers an extreme instance of a much broader cultural phenomenon: declaring the friendship for the dead epitomizes the political blood pact between men taking precedence over the traditional blood ties of kinship and heterosexual unions. The book underscores nationalism as a homosocial-based emotion of commemorative desire.

Binaries in Battle Noora Kotilainen, Marja Vuorinen, 2014-10-16 Defining things through binary opposition: male/female, familiar/foreign, life/death forms the base of human thinking. Adding moral assessment to logic, we often represent binaries even as divisions into good and evil. Exclusions based on the division of Us vs Them make their presence felt during any conflict and become crucial in times of war. However

binary thinking is inherent also in peaceful everyday conversation when politics social issues ethnicities and religious identities are described and debated Binaries in Battle Representations of Division and Conflict is a wide ranging multidisciplinary anthology that presents the fundamental rationale of binary thinking from many different angles The evidence is drawn from cases ranging from historical to contemporary and near future covering both wartime and peacetime conflicts The writers apply a wide variety of methods including linguistics visual semiotics ethnography and leadership and organisational analysis Seemingly unconnected topics such as humanitarianism and warfare or death and tourism appear strangely connected and the relevance of speed to cyber warfare is revealed to contain a paradox Mass immigration is observed from several mutually exclusive angles to provide a 360 degree view Despite its multifaceted baselines the book provides a solid understanding of the manifestations of binary thinking By deconstructing ideological discourses it dispels black and white imageries replacing them with softer shades of grey The Sociology of Privatized Security Ori

Swed, Thomas Crosbie, 2018-10-04 The first book dedicated to the sociology of privatized security this collection studies the important global trend of shifting security from public to private hands and the associated rise of Private Military and Security Companies PMSCs and their contractors The volume first explores the trend itself making important historical and theoretical revisions to the existing social science of private security These chapters discuss why rulers buy rent and create private militaries why mercenaries have become private patriots and why the legitimacy of military missions is undermined by the use of contractors The next section challenges the idea that states have a monopoly on legitimate violence and questions our legal and economic assumptions about private security The collection concludes with a discussion of the contractors themselves focusing on gender race ethnicity and other demographic factors Featuring a mix of qualitative and quantitative methods and a range of theoretical and methodological innovations this book will inspire sociologists to examine with fresh eyes the behind the scenes tension between the high drama of war and conflict and the mundane realities of privatized security contractors and their everyday lives **Physical Control, Transformation and Damage in the First**

World War Simon Harold Walker, 2020-11-12 From enlistment in 1914 to the end of service in 1918 British men's bodies were constructed conditioned and controlled in the pursuit of allied victory Physical Control Transformation and Damage in the First World War considers the physical and psychological impact of conflict on individuals and asks the question of who in the heart of war really had control of the soldier's body As men learned to fight they became fitter healthier and physically more agile yet much of this was quickly undone once they entered the fray and became wounded died or harmed their own bodies to escape Employing a wealth of sources including personal testimonies official records and oral accounts Simon Harold Walker sheds much needed light on soldiers own experiences of World War I as they were forced into martial moulds and then abandoned in the aftermath of combat In this book Walker expertly synthesizes military sociological and medical history to provide a unique top down history of individual soldiers experiences during the Great War giving a voice to the

thousands of missing mutilated and muted men who fought for their country The result is a fascinating exploration of body cultures power and the British army *Engendering Emotions* A. Petersen, 2004-10-11 *Engendering Emotions* examines the production and promotion of the idea of sex gender difference in emotional experience and expression in the contemporary West Focusing on the psychology of emotions and on the spheres of aggression and war and love intimacy and sex it explores how the idea of emotional difference serves to define and govern relations between men and women The book draws on diverse theoretical work and recent empirical data to chart new territory in the study of sex gender differences
