## **Military Power Conflict And Trade:**

**Military Power, Conflict and Trade** Michael P. Gerace, 2012 Wherever international commerce flows in world politics military power often flows with it sometimes as a protector of commerce sometimes as its promoters and sometimes as a tool of aggression against it How are military power and international trade related Do military power and commerce expand together or does military power decline as commerce and perhaps interdependence increases Does this relationship vary across countries and if so how Power Conflict and Trade is a study of the relationship between military power and international commerce among the Great Powers prior

**Military Power, Conflict, and Trade** Michael P. Gerace, 2004  
**Power and Stability** Erik Goldstein, Brian McKercher, 2004-06-01 The pursuit of stability drove British foreign policy even before 1865 These papers assess the implications of such a policy during the following 100 years when Britain slid from being the only global power to a regional European state

**Ideology and Foreign Policy in Early Modern Europe (1650-1750)** Gijs Rommelse, 2016-05-13 The years 1650 to 1750 sandwiched between an age of wars of religion and an age of revolutionary wars have often been characterized as a de ideologized period However the essays in this collection contend that this is a mistaken assumption For whilst international relations during this time may lack the obvious polarization between Catholic and Protestant visible in the proceeding hundred years or the highly charged contest between monarchies and republics of the late eighteenth century it is forcibly argued that ideology had a fundamental part to play in this crucial transformative stage of European history Many early modernists have paid little attention to international relations theory often taking a Realist approach that emphasizes the anarchism materialism and power political nature of international relations In contrast this volume provides alternative perspectives viewing international relations as socially constructed and influenced by ideas ideology and identities Building on such theoretical developments allows international relations after 1648 to be fundamentally reconsidered by putting political and economic ideology firmly back into the picture By engaging with and building upon recent theoretical developments this collection treads new terrain Not only does it integrate cultural history with high politics and foreign policy it also engages directly with themes discussed by political scientists and international relations theorists As such it offers a fresh and genuinely interdisciplinary approach to this complex and fundamental period in Europe's development

**Who Benefits from Global Violence and War** Marc Pilisuk, 2007-12-30 Military economic and environmental violence in the era of globalization cause immense suffering and may ultimately threaten the existence of life as we know it but author Pilisuk explains that the future can change if we understand and act upon the roots of violence A professor emeritus of psychology and human and community development Pilisuk explains how most violence is the product of a human built social order in which some people and institutions control most of the resources make the decisions that necessitate violence and operate with minimal accountability The common root of war poverty environmental destruction and other forms of violence is spotlighted Such violence says Pilisuk is a natural consequence of a

system inordinately influenced by a relatively small interconnected group of corporate military and government leaders with the power to instill fear to increase their excessive fortunes and to restrict information particularly about their own clandestine dealings This text includes scholarship hailing from across disciplines combined with information from investigative journalism and insights from nonprofit watchdog groups all shedding light on centralized power and its effects Pilisuk presents material including the range of tactics used to manipulate and destroy adversaries the human capacity to kill as a challenge and how media is used by powerful groups to manipulate fear and maintain their power Here readers find solid social science to support what whistleblowers and social critics are observing about a system that needs change
