Military Psychiatry Including Terrorism:

Military Psychiatry Including Terrorism D. J. Power, 1991 **Military Psychiatry**, 1994 *Textbooks of Military Medicine, Pt. 1, Warfare, Weaponry, and the Casualty* Franklin D. Jones, 2000-04 Textbook of Military Medicine Pt 1 Warfare Weaponry and the Casualty Specialty editors Franklin D Jones et al Addresses the multiple mental health service provided by the military during peacetime , The Integration and Management of Traumatized People After Terrorist Attacks Suat Begec, 2007 This book brings together papers from academics and experts to develop a concept on the treatment of traumas and depression caused by terrorist attacks and the integration of the victims into society Even though the topic is closely related to psychology at the same time it has strong links with social and economic matters Therefore the psychological impact of trauma together with sociological and economic impacts are analyzed and reflected in this book This publication deals with overcoming the harmful effects of trauma caused by terrorist attacks and sustaining the integration of traumatized people into society The aim of the editors is to provide an international guide to facilitate the integration of terror victims into society and the book is beneficial for academicians government officials and anyone who have studies in this area *US Army Psychiatry in the Vietnam War* Norman M. Camp, 2014 NOTE NO FURTHER DISCOUNT FOR THIS PRODUCT OVERSTOCK SALE Significantly reduced list price This book tells the mostly forgotten story of the accelerating mental health problems that arose among the troops sent to fight in South Vietnam especially the morale discipline and heroin crisis that ultimately characterized the second half of the war This situation was unprecedented in U S military history and dangerous and reflected the fact that during the war America underwent its most divisive period since the Civil War and as a result the war became bitterly controversial The author is a career Army psychiatrist who led a psychiatric unit in Vietnam In the years following his return he was dismayed to discover that the Army had conducted no formal review of this alarming situation including from the standpoint of military psychiatry and had lost or destroyed all of the pertinent clinical records In addition to permitting a study of the psychological wounds and their treatment in Vietnam these records would have been priceless in the treatment of the legions of veterans who presented serious adjustment problems and Post traumatic Stress Disorder As a consequence Dr Camp has been relentless in combing the professional civilian and surviving military literature including unpublished documents to construct a compelling narrative documenting the successes and failures of Army psychiatry and the Army leadership in Vietnam in responding to these psychiatric and behavioral challenges The result is a book that is both scholarly and intensely personal includes vivid case material and anecdotes from colleagues who also served there and is replete with illustrations and correspondence It presents the story of Vietnam in a fresh manner through the psychiatrist's eyes and sensibilities **Terrorism and Disaster Paperback with CD-ROM** Robert J. Mental Health in the War on Terror Neil Krishan Aggarwal,2015-01-13 Neil Krishan Aggarwal s timely study finds that mental health and biomedical professionals have created new forms of knowledge and practice in their desire to understand and fight terrorism In the process the state has used psychiatrists and psychologists to furnish knowledge on undesirable populations and psychiatrists and psychologists have protected state interests Professional interpretation like all interpretations is subject to cultural forces Drawing on cultural psychiatry and medical anthropology Aggarwal analyzes the transformation of definitions for normal and abnormal behavior in a vast array of sources government documents professional bioethical debates legal motions and opinions psychiatric and psychological scholarship media publications and policy briefs Critical themes emerge on the use of mental health in awarding or denying disability to returning veterans characterizing the confinement of Guant namo detainees contextualizing the actions of suicide bombers portraying Muslim and Arab populations in psychiatric and psychological scholarship illustrating bioethical issues in the treatment of detainees

and supplying the knowledge and practice to deradicalize terrorists Throughout Aggarwal explores this fascinating troublesome transformation of mental health science into a potential instrument of counterterrorism Russian/Soviet Military Psychiatry 1904-1945 Paul Wanke,2005-07-08 Psychiatry like most professional fields in Russia gained its legitimacy from its ability to serve the Tsar and later the Bolshevik party The militarised nature of these governments meant that psychiatry would have to prove its worth to the military This study will cover Russian Soviet military psychiatry from its first practical experience during the Russo Japanese war to its greatest test during the Great Patriotic War 1941 45 Throughout this study the continuity between Russian and Soviet military psychiatry will be emphasised For example psychiatry s materialist school dominated throughout this period and that Russia s acceptance that psychiatric casualties will occur allowed them to focus their resources on treatment rather than prevention *Massachusetts General Hospital Comprehensive Clinical Psychiatry - E-BOOK* Theodore A. Woburn,2005-11-25 Terrorism is to create a state of terror and fear Therefore it is important to study the psychological factors and to understand and mitigate our response to terrorism It is the creation of states of mind of reducing people s resilience and will to resist and causing such psychological and social pressure that eventually the political aims of a terrorist group will be fulfilled This book is not about the prevention of terrorism but concerned with the consequences of acts of

terror and their impact on populations It describes what citizens professionals and governments can do to mitigate the consequences The focus is less on the timeless or universal trauma reactions captured by labels such as post traumatic stress disorder but more on culture and place specific reactions A comparison is made between the responses visible in Russia large scale adversity and the western reaction a cultural shift towards an age of anxiety and risk aversion Also new terrorism chemical biological and nuclear terrorism is discussed but in practice most terrorist attacks remain steadfastly conventional A last topic is communication such as communication between government and its citizens between terrorists themselves between terrorists and citizens and between citizens themselves People talking to each other in the immediate aftermath of terrorist incidents gives much needed support and reassurance More attention needs to be given to assisting these normalising processes and more needs to be done to safeguard such communications in the immediate aftermath of a terrorist attack *Kaplan and Sadock's Comprehensive Text of Psychiatry* Robert Boland, Marcia L.
