Military Transports And Training Aircraft Of The World:

Military Transports and Training Aircraft of the World Gordon Swanborough, 1965 *Surviving Trainer & Transport Aircraft of the World* Don Berliner, 2013-05-20 This final volume in the three volume set covering more than 300 types of Surviving World War II aircraft includes the less glamorous ones that couldn't qualify for two volumes on Fighters and Bombers. They were the ones that served absolutely vital purposes like the Army's Jeeps and trucks and the Navy's freighters and landing craft. Clearly they made the great machine work for without the transports and trainers and gliders and helicopters and the scout airplanes and the others the fighters and bombers wouldn't have had fuel for their engines nor bullets for their guns nor food for their crews. Their pilots and navigators and radio operators and ground crews may not have had as many stories to tell of narrow escapes from massed enemy guns but they knew that they played roles that can never be ignored. They wore the same uniforms and shed as many tears for their departed comrades. That scores of their aircraft have been lovingly restored to like new condition and placed on display is a tribute to their sacrifices. *American Military Transport Aircraft Since 1925* E.R. Johnson, 2013-04-23 Without the support of airlift the modern American military machine would be brought to a standstill. Since World War II beginning with the Cold War and continuing up to the present day the U.S. armed forces have come increasingly to rely upon airlift for mobility. The power to rapidly move and thereafter support a military operation anywhere in the world at any time has become a foundational element of American defense policy. This work provides the reader with a comprehensive historical survey including technical specifications, drawings, and photographs of each type of fixed wing aircraft used by U.S. military forces over a nearly 90 year period to carry out the airlift mission. *Air University Library Index to Military Periodicals*, 1999 *The Modern Weaponry of the World's Armed Forces* Col. Y. Udaya Chandar (Retd.), 2017-04-24 The Modern Weaponry of the World's Armed Forces is a treatise of military weaponry. It depicts about forty present day weapon systems possessed by various nations describing three to four weapons of each category with images, specifications, origin, development, and design briefly. The weapon systems presented are almost all from the twenty-first century or the weapons presently under development. Only a very few officers in the three services know the finer distinctions between say cruise missile and ballistic missile, fourth generation jet fighter and fifth generation jet fighter, and howitzer and a field gun. All such nuances are explained clearly. The beginning explains the history of military weapons briefly and ends with information on the missile shield erected by most countries including India. The missile shield destroys the hostile incoming aircraft or missile automatically. The missile shield presented is real, exists on the ground today, and is not fictitious. The militaries win the war with the help of the man who stands erect in the face of the enemy fire and the weapon that is in his hands. All the students of military science must read this invaluable book about the gun in the hands of a soldier, what exactly it is, and how much it matters. **The Literature of Aeronautics, Astronautics, and Air Power** Richard Hallion, 1984 *Air University Periodical Index*, 1958 American Military Training Aircraft E.R.

Johnson,2015-02-12 The U S did not become the world s foremost military air power by accident The learning curve World War I World War II the Korean War the Vietnam War the Gulf War and more recently the war on terror has been steep While climbing this curve the U S has not only produced superior military aircraft in greater numbers than its foes but has in due course out trained them too This book provides a comprehensive historical survey of U S military training aircraft including technical specifications drawings and photographs of each type of fixed and rotary wing design used over a 98 year period to accomplish the first step of the learning process the training of pilots and aircrews *American Military Helicopters and Vertical/Short Landing and Takeoff Aircraft Since 1941* E.R. Johnson,Ted Williams,2021-11-29 Over the past eight decades developments in vertical lift aircraft both helicopters and vertical short takeoff and landing V STOL planes have given the American military unparalleled capabilities on the modern battlefield The U S has led the world in vertical lift technologies with the help of some of the brightest minds in this field Igor I Sikorsky Arthur M Young Frank N Piasecki Charles H Kaman and Stanley Hiller Jr to name a few and by having the industrial prowess to make their concepts reality This book provides a concise historical survey including technical specifications drawings and photographs of every type of helicopter and V STOL aircraft developed for the U S military from the earliest examples tested in 1941 and 1942 up to the newest prototypes
