Mill and Town in South Carolina, 1880-1920 David Lee Carlton, 1982 **Modern Baptists** David L. Carlton, 1982-11-01 The Fulton Bag and Cotton Mills Strike of 1914-1915 Gary Fink, 2019-06-30 Mill operatives walked off their jobs at Atlanta's Fulton Bag and Cotton Mills complex in the spring of 1914 initiating a strike that involved ethnic confrontations gender divisions social and economic reforms regional and sectional differences and the textile industry's rendition of the gospel of efficiency In this richly documented account Gary Fink explores the year long strike that followed using the reports of labor spies who were paid by management to gather information about striking employees and to disrupt union organizing activities African American Life in South Carolina's Upper Piedmont, 1780-1900 W. J. Megginson, 2022-08-03 A rich portrait of Black life in South Carolina's Upstate Encyclopedic in scope yet intimate in detail African American Life in South Carolina's Upper Piedmont 1780 1900 delves into the richness of community life in a setting where Black residents were relatively few notably disadvantaged but remarkably cohesive W J Megginson shifts the conventional study of African Americans in South Carolina from the much examined Lowcountry to a part of the state that offered a quite different existence for people of color In Anderson Oconee and Pickens counties occupying the state's northwest corner he finds an independent brave and stable subculture that persevered for more than a century in the face of political and economic inequities Drawing on little used state and county denominational records privately held research materials and sources available only in local repositories Megginson brings to life African American society before during and after the Civil War Orville Vernon Burton Judge Matthew J Perry Jr Distinguished Professor of History at Clemson University and University Distinguished Teacher Scholar Emeritus at the University of Illinois provides a new foreword **Race, Class, and Community in Southern Labor History** Gary M. Fink, Merl E. Reed, 2003 As evidence by the quality of these essays the field of southern labor history has come into its own *Organized Labor in the Twentieth-century South* Robert H. Zieger, 1991 **The Company Town** John S. Garner, 1992 Company towns those associated with textiles mining or tool manufacturing for example are found worldwide and have been in existence for many centuries But with the coming of the Industrial Revolution what had been isolated instances of town building became a veritable phenomenon With explosive growth virtually hundreds of them appeared in the Western World until about the time of the Great Depression with development most intensive and homogenous in Europe and the Americas Although the technological experience of the Industrial Revolution has been widely chronicled and the stories of misplaced banking and exploited labor well documented until now the actual settings of company towns and the overall achievement in industrial architecture and town planning have been largely ignored The Company Town describes the concurrent development and building of selected towns in Europe and the Americas assessing technical advances in factory building worker housing and the public buildings that owner industrialists in their capacity as philanthropists bestowed upon such towns In many instances the company town

came to symbolize the wrecking of the environment especially in places associated with extractive industries such as mining and lumber milling Some resident industrialists however took a genuine interest in the welfare of their work forces and in a number of instances hired architects to provide a model environment Overtaken by time these towns were either abandoned or caught up in suburban growth The most thorough going and only international assessment of the company town this collection of essays by specialists and authorities of each region offers a balanced account of architectural and social history and provides a better understanding of the architectural and urban experiences of the early industrial age China Voyager William Joseph Haas, 1996 A biography of the scientist who spent 30 years in China as a Methodist educator a Rockefeller official in Beijing and as a biological researcher exemplifies Sino American interaction during the first half of the century Haas history Fort Lewis College surrounds his themes with the rich atmosphere of China during the period detailing the interplay between religious and secular belief systems encountered by Gee in the educational institutions and in the culture Annotation copyright by Book News Inc Portland OR Plain Folk of the South Revisited Samuel C. Greenville Archie Vernon Huff, Jr., 2020-05-26 The history of South Carolina s thriving upstate Since the Cherokee Nation hunted the verdant hills in what is now known as Greenville County South Carolina the search for economic prosperity has defined the history of this thriving Upstate region and its expanding urban center In a sweeping chronicle of the city and county A V Huff traces Greenville s business tradition as well as its political religious and cultural evolution Huff describes the area s Revolutionary War skirmishes early settlement and mix of diversified agriculture small manufacturing operations and summer resorts Calling Greenville atypical of much of the antebellum South the author tells of the strong Unionist sentiment relative unimportance of slavery and lack of staple agriculture in the region He recounts Greenville s years of Reconstruction textile leadership depression and postwar industrial diversification In addition fo tracing Greenville s economic growth Huff identifies the region s other hallmarks including the fierce independence of its residents He assesses Greenville s peaceful end to segregation strong evangelical Protestant tradition conservative arts programs and influential role in South Carolina politics **Reading Southern Poverty Between the Wars, 1918-1939** Richard Godden, Martin Crawford, 2006 Franklin D Roosevelt once described the South as the nation s number one economic problem These twelve original interdisciplinary essays on southern indigence between the World Wars share a conviction that poverty is not just a dilemma of the marketplace but also a cultural and political construction Although previous studies have examined the web of coercive social relations in which sharecroppers wage laborers and other poor southerners were held in place this volume opens up a new perspective These essays show that professed forces of change and modernization in the South writers photographers activists social scientists and policymakers often subtly upheld the structures by which southern labor was being exploited Planters politicians and others who enforced the southern economic and social status quo not only relied on bigotry but also manipulated deeply held American beliefs about sturdy yeoman nobility and the sanctity of farm and family

Conversely any threats to the system were tarred with the imagery of big cities northerners and organized labor The essays expose vestiges of these beliefs in sources as varied as photographs from the Farm Security Administration statistics for incarceration and child labor and the writings of Grace Lumpkin Ellen Glasgow and Erskine Caldwell This volume shows that those who work to eradicate poverty and even victims of poverty themselves can hesitate to cross the line of race gender memory or tradition in pursuit of their goal

The American South and the Great War, 1914-1924 Matthew L. Downs, M. Ryan Floyd, 2018-11-11 Edited by Matthew L Downs and M Ryan Floyd The American South and the Great War 1914 1924 investigates how American participation in World War I further strained the region's relationship with the federal government how wartime hardships altered the South's traditional social structure and how the war effort stressed and reshaped the southern economy The volume contends that participation in World War I contributed greatly to the modernization of the South initiating changes ultimately realized during World War II and the postwar era Although the war had a tremendous impact on the region few scholars have analyzed the topic in a comprehensive fashion making this collection a much needed addition to the study of American and southern history These essays address a variety of subjects including civil rights economic growth and development politics and foreign policy women's history gender history and military history Collectively this volume highlights a time and an experience often overshadowed by later events illustrating the importance of World War I in the emergence of a modern South

To Raise Up the South Sally G. McMillen, 2001-12-01 In the half century after the Civil War evangelical southerners turned increasingly to Sunday schools as a means of rejuvenating their destitute region and adjusting to an ever modernizing world By educating children and later adults in Sunday school and exposing them to Christian teachings biblical truths and exemplary behavior southerners felt certain that a better world would emerge and cast aside the death and destruction wrought by the Civil War In **To Raise Up the South** Sally G McMillen offers an examination of Sunday schools in seven black and white denominations and reveals their vital role in the larger quest for southern redemption McMillen begins by explaining how the schools were established detailing northern missionaries collaboration in their creation and the eventual southern resistance to this northern aid She then turns to the classroom discussing the roles of church officials teachers ministers and parents in the effort to raise pious children the different functions of men and women and the social benefits of such participation Though denominations of both races saw Sunday schools as a way to increase their numbers and mold their children white southerners rarely raised the race issue in the classroom Black evangelicals on the other hand used their Sunday schools to discuss and decry Jim Crow laws rising violence and widespread injustices Integrating the study of race class gender and religion **To Raise Up the South** provides an exciting new lens through which to view the turbulent years of Reconstruction and the emergence of the New South It charts the rise of an institution that became a mainstay in the lives of millions of southerners

The Mind of the South Charles W. Eagles, 2011-08-23 This probing collection of essays assesses the wide influence of W J Cash and the

profound effect of his classic dissection of southern history Perhaps more than any other historian W J Cash revolutionized the interpretation of southern identity In 1941 when he published *The Mind of the South* he exploded the correlated myths of the Cavalier South and the New South and gave historiography a new gauge for examining Dixie In the half century since its publication Cash's book has lain in the path of every historian of the South Not all however have expressed unified opinions about him and his influence though few can deny how in the past fifty years his indelible and authoritative work has shaped the writing of southern history In *The Mind of the South Fifty Years Later* eleven scholars examine this classic study and assess its enduring importance Bruce Clayton begins by discussing the biography of Cash and tracing his sources In the subsequent five essays Cash is praised evaluated criticized defended classified and acknowledged to be the lion in the crossroads of southern historiography

Empty Mills Timothy J. Minchin, 2012-12-16 With the economy struggling there has been much discussion about the effects of deindustrialization on American manufacturing While the steel and auto industries have taken up most of the spotlight the textile and apparel industries have been profoundly affected In *Empty Mills* Timothy Minchin provides the first book length study of how both industries have suffered since WWII and the unwavering efforts of industry supporters to prevent that decline In 1985 the textile industry accounted for one in eight manufacturing jobs and unlike the steel and auto industries more than fifty percent of the workforce was women or minorities In the last four decades over two million jobs have been lost in the textile and apparel industries alone as more and more of the manufacturing moves overseas Impeccably well researched providing information on both the history and current trends *Empty Mills* will be of importance to anyone interested in economics labor the social historical as well as the economic significance of the decline of one of America's biggest industries

"We are All Leaders" Staughton Lynd, 1996 *We Are All Leaders* describes a kind of union qualitatively different from the bureaucratic business unions that make up the AFL CIO today From African American nutpickers in St Louis chemical and rubber workers in Akron textile workers in the South and bootleg miners in Pennsylvania to tenant farmers in the Mississippi Delta packinghouse and garment workers in Minnesota seamen in San Francisco and labor party campaigns throughout the country workers in the 1930s were experimenting with community based unionism Contributors to this volume draw on interviews with participants in the events described first person narratives trade union documents and other primary sources to tell what workers of the 1930s did The alternative unionism of the 1930s was democratic deeply rooted in mutual aid among workers in different crafts and work sites and politically independent The key to it was a value system based on egalitarianism The cry *We are all leaders* resonated among rank and file activists Their struggle often ignored by historians has much to teach us today about union organizing

New Men, New Cities, New South Don H. Doyle, 2014-03-24 Cities were

the core of a changing economy and culture that penetrated the rural hinterland and remade the South in the decades following the Civil War In *New Men New Cities New South* Don Doyle argues that if the plantation was the world the slaveholders made the urban centers of the New South formed the world made by merchants manufacturers and financiers The book s title evokes the exuberant rhetoric of New South boosterism which continually extolled the new men who dominated the city building process but Doyle also explores the key role of women in defining the urban upper class Doyle uses four cities as case studies to represent the diversity of the region and to illuminate the responses businessmen made to the challenges and opportunities of the postbellum South Two interior railroad centers Atlanta and Nashville displayed the most vibrant commercial and industrial energy of the region and both cities fostered a dynamic class of entrepreneurs These business leaders collective efforts to develop their cities and to establish formal associations that served their common interests forged them into a coherent and durable urban upper class by the late nineteenth century The rising business class also helped establish a new pattern of race relations shaped by a commitment to economic progress through the development of the South s human resources including the black labor force But the new men of the cities then used legal segregation to control competition between the races Charleston and Mobile old seaports that had served the antebellum plantation economy with great success stagnated when their status as trade centers declined after the war Although individual entrepreneurs thrived in both cities their efforts at community enterprise were unsuccessful and in many instances they remained outside the social elite As a result conservative ways became more firmly entrenched including a system of race relations based on the antebellum combination of paternalism and neglect rather than segregation Talent energy and investment capital tended to drain away to more vital cities In many respects as Doyle shows the business class of the New South failed in its quest for economic development and social reform Nevertheless its legacy of railroads factories urban growth and changes in the character of race relations shaped the world most southerners live in today
