Women in the Piast Dynasty Grzegorz Pac,2022-03-07 This book analyses the role of women in the Polish Piast dynasty from c 965 to c 1144 It discusses gender expectations and the literary topoi employed to describe rulers wives and daughters as well as showing their importance in religious donations the creation of dynastic memory and naming patterns as well as examining Piast women s involvement in female monasticism Pac takes a comparative approach to these themes analysing Polish sources alongside sources from other areas of early and high medieval Europe

Turning Point Robert Daniel Tschirgi,2007-08-30 The danger raised by the terrorist threat is real existential and vital to the United States But the attacks on 9 11 have been broadly misunderstood In assessing the meaning and significance of the war on terror Tschirgi raises many issues related to the Middle East and American policy toward that area For example he debunks the entire exceptionalist approach to the Arab world the presumption that Arab societies fail to be fathomed by Western social science While Tschirgi stresses the need for resolving the war on terrorism favorably he also suggests two broad policy recommendations First he argues that while the United States should maintain its firm commitment to Israel s preservation as a Jewish state it has no corresponding duty to support Israeli expansionism U S Israeli relations should proceed on this basis and should be informed by a greater American reliance on principles of international law Second Tschirgi concludes that an American withdrawal from Iraq must be effected as early as possible Tschirgi s provocative thesis is that the attacks of 9 11 were not as unique an event as we commonly believe Rather they were understandable though deplorable human reactions to a combination of factors that fueled the Arab world s marginalization and led to a generalized feeling among the people of that region that the West and particularly the United States posed a mortal threat to their identity Employing three case studies of marginalized violent conflict Mexico s Zapatista conflict Egypt s struggle against the Gama a al Islamiyya in Upper Egypt and Nigeria s fight against the Ogoni people in the Niger Delta Tschirgi demonstrates the dynamics through which traditional peoples have in modern times opted to wage hopeless struggle against objectively more powerful states The parallels between the dynamics that informed each of these situations and those marking the international Muslim

insurgency against the West are striking as are the significant differences between the two phenomena The parallels are found in the mechanics of marginalization and resistance The differences lie first in the Muslim insurgency's identification of the West as a total enemy and the struggle with it as having a zero sum nature and second in the modern terrorists potential access to lethal means of mass destruction Both the parallels and differences that mark the two phenomena help deepen a real understanding of the meaning of 9 11 Hunger and Health United Nations World Food Programme,2012-08-21

Hunger and Health explores the multiple relationships between hunger and poor health and how they affect the growth of individuals physiologically and psychologically constraining the development of nations both socially and economically Examining the profound effect that hunger has on health including disease prevention and treatment it gives special attention to access to quality food and healthcare in particular for the marginalized and poor It also identifies critical junctures in the human life cycle when the benefits of reducing hunger and improving poor health have a profound impact It demonstrates how aligning of hunger and health interventions can offer proven solutions that reach those most in need and contains compelling evidence which confirms that hunger and poor health are solvable problems today It encourages those involved in policy programming and advocacy to take action to address some of the most urgent hunger and health problems Essential reading for anyone concerned about eliminating hunger Published with the UN World Food Programme

Bibliographie D'histoire de L'art ,1993 *Liberating Hellenism from the Ottoman Empire* Gonda Van Steen,2010-04-26 *Liberating Hellenism from the Ottoman Empire* explores two key historical episodes that have generally escaped the notice of modern Greece the Near East and their observers alike In the midst of the highly charged context of West East confrontation and with fundamental cultural and political issues at stake these episodes prove to be exciting and important platforms from which to reexamine the age old conflict This book reaches beyond the standard sources to dig into the archives for important events that have fallen through the cracks of the study of emerging modern Greece and the Ottoman Empire These events in which French travel writing literary fiction antiquarianism and nineteenth century western and eastern geopolitics merge invite us to redraw the outlines of mutually dependent Hellenism and Orientalism **The End of Desertification?** Roy H. Behnke,Michael Mortimore,2016-04-12 The question in the title of this book draws attention to the shortcomings of a concept that has become a political tool of global importance even as the scientific basis for its use grows weaker The concept of desertification it can be argued has ceased to be analytically useful and distorts our understanding of social environmental systems and their resiliency particularly in poor countries with variable rainfall and persistent poverty For better policy and governance we need to reconsider the scientific justification for international attempts to combat desertification Our exploration of these issues begins in the Sahel of West Africa where a series of severe droughts at the end of the 20th century led to the global institutionalization of the idea of desertification It now seems incontrovertible that these droughts were not caused primarily by local land use mismanagement effectively terminating a long standing policy and scientific

debate There is now an opportunity to treat this episode as an object lesson in the relationship between science the formation of public opinion and international policy making Looking beyond the Sahel the chapters in this book provide case studies from around the world that examine the use and relevance of the desertification concept Despite an increasingly sophisticated understanding of dryland environments and societies the uses now being made of the desertification concept in parts of Asia exhibit many of the shortcomings of earlier work done in Africa It took scientists more than three decades to transform a perceived desertification crisis in the Sahel into a non event This book is an effort to critically examine that experience and accelerate the learning process in other parts of the world **Food Insecurity, Vulnerability and Human**
