The agency of photographs is a recurrent concern within the context of the city Whether found in architectural records social documentary photojournalism or artistic practice photographic objects are embedded in urban contestation aesthetically charged by artists reinserted into social histories and mobilized to imagine a future city Photogenic Montreal takes a question initially posed by heritage debates what does photography preserve and creates a rich conversation about the agency of the human actors before and behind the camera and of the medium itself The interplay of archives and activism structures the book Photographs that appear to be sealed off in newspapers storage rooms or archives accrue new meaning when they cross the threshold back into social spaces and circulate anew It is through the reactivation of archival photographs that submerged traces of urban experience are discovered and alternate histories of Montreal can be recounted Multiple forms of activism and artistic expression complement this archival work Beginning in the 1960s community minded and heritage groups responded to the tensions arising from urban reconstruction gentrification and the erasure of neighbourhoods this activism also left its photographic traces Attentive to the still changing face of the city s architecture neighbourhoods and street life Photogenic Montreal participates in debates about who the city belongs to who speaks on its behalf and how to picture its past and present

Student Affairs by the Numbers Rishi Sriram,2023-07-03 *Student Affairs by the Numbers* aims to be the go to book for student affairs professionals who want to know the basics of quantitative research and statistics for their work Books on assessment in student affairs tend to discuss processes more than research design and statistics Most books on statistics share too much information for practitioners overwhelming them and making it difficult to discern what they need to know Since these books do not use examples from student affairs it is even more difficult for practitioners to connect with new concepts Student Affairs professionals need to know how to design a study collect data analyze data interpret results and present the results in an understandable manner This book will begin by establishing the need for these skills in student affairs and then quickly move to how to develop a research culture how to conduct research how to understand statistics and concluding with how to change our research assessment behaviors in order to make higher education better for students

Creating Sustainable Careers in Student Affairs Margaret Saltee,2023-07-03 This book argues that the

current structure of student affairs work is not sustainable as it depends on the notion that employees are available to work non stop without any outside responsibilities that is the Ideal Worker Norm The field places inordinate burdens on staff to respond to the needs of students often at the expense of their own families and well being Student affairs professionals can meet the needs of their students without being overworked The problem however is that ideal worker norms pervade higher education and student affairs work thus providing little incentive for institutions to change The authors in this book use ideal worker norms in conjunction with other theories to interrogate the impact on student affairs staff across functional areas institutional types career stage and identity groups The book is divided into three sections chapters in the first section of the book examine various facets of the structure of work in student affairs including the impact of institutional type and different functional areas on employees work lives Chapters in the second section examine the personal toll that working in student affairs can take including emotional labor s impact on well being The final section of the book narrows the focus to explore how different identity groups including mothers fathers and people of color navigate work life issues Challenging ideal worker norms all chapters offer implications for practice for both individuals and institutions

Contested Issues in Student Affairs Peter M. Magolda, Marcia B. Baxter Magolda, 2023-07-03 What is your level of understanding of the many moral ideological and political issues that student affairs educators regularly encounter What is your personal responsibility to addressing these issues What are the rationales behind your decisions What are the theoretical perspectives you might choose and why How do your responses compare with those of colleagues Contested Issues in Student Affairs augments traditional introductory handbooks that focus on functional areas e.g. residence life career services and organizational issues It fills a void by addressing the social educational and moral concepts and concerns of student affairs work that transcend content areas and administrative units such as the tensions between theory and practice academic affairs and student affairs risk taking and failure and such as issues of race ethnicity sexual orientation and spirituality It places learning and social justice at the epicenter of student affairs practice The book addresses these issues by asking 24 critical and contentious questions that go to the heart of contemporary educational practice Intended equally for future student affairs educators in graduate preparation programs and as reading for professional development workshops it is designed to stimulate reflection and prompt readers to clarify their own thinking and practice as they confront the complexities of higher education Student affairs faculty administrators and graduate students here situate these 24 questions historically in the professional literature present background information and context define key terms summarize the diverse ideological and theoretical responses to the questions make explicit their own perspectives and responses discuss their political implications and set them in the context of the changing nature of student affairs work Each chapter is followed by a response that offers additional perspectives and complications reminding readers of the ambiguity and complexity of many situations Each chapter concludes with a brief annotated bibliography of seminal works that offer additional information on the topic as well as with a URL to a moderated blog site that encourages further conversation on each topic and allows readers to teach and learn from each other and interact with colleagues beyond their immediate campus The website invites readers to post blogs respond to each other and upload relevant resources The book aims to serve as a conversation starter to engage professionals in on going dialogue about these complex and enduring challenges

Critical Praxis in Student Affairs Susan B. Marine, Chelsea Gilbert, 2023-07-03 Student affairs work like higher education is fundamentally about change Principally the change work performed by student affairs practitioners is about supporting the growth and

development of individual students and student groups Increasingly that work has called for practitioners to become more active in working to change higher education so that it lives up to its radically democratic inclusive ideals This means adopting new strategies to transform student affairs staff students and institutions and drawing on insights from critical liberatory theories This text represents an effort to describe and document these practices of intentionally centering critical theories The first section of this text examines the ways that critically minded practitioners lead through equitable liberatory frameworks offering important models for reimagining the future of higher education In the second section the editors take up thinking and acting to support the development of critical consciousness in students providing examples of programs initiatives and student support offices that center social justice in their work and foster a critical lens through their interactions with students In their conclusion the editors provide a model for critical praxis offering enduring strategies for practitioners seeking to incorporate critical socially just praxis into their everyday work and defining areas for future research and praxis including identifying strategies for effective assessment of critical praxis and modalities for scaling up the work for maximal impact Design Thinking in Student Affairs Julia Allworth, Lesley D'Souza, Gavin W.

Henning, 2023-07-03 Design thinking is an innovative problem solving framework This introduction is the first book to apply its methodology to student affairs and in doing so points the way to its potentially wider value to higher education as a whole With its focus on empathy which is the need to thoroughly understand users experiences design thinking is user centered similar to how student affairs is student centered Because the focus of design thinking is to design with users not for users it aligns well with student affairs practice In addition its focus on empathy makes design thinking a more equitable approach to problem solving than other methods because all users experiences not just the experiences of majority or average student need to be understood Centering empathy in problem solving processes can be a tool to disrupt higher education systems and practices Design thinking is a framework to foster innovation and by its nature innovation is about responding to change factors with creativity In an organization design thinking is inherently connected to organizational change and culture because the process is really about changing people to help them rally around a disruptive idea Implementing design thinking on a campus may in itself be disruptive and require a change management process The beauty of using design thinking is that it can also act as a framework to support organizational culture change Design thinking approaches with their focus on stakeholder needs as opposed to systemic norms collaborative solutions building and structured empathy activities can offer a concrete tool to disrupt harmful systems of power and oppression Design thinking as a process is not a magic solution to equity problems though it can be a powerful tool to approach the development of solutions that can address inequity Design thinking is data driven and considers both qualitative and quantitative data as necessary to gain most complete picture of an issue and its possible solutions whether a product program or service Design thinking has numerous benefits to afford students affairs Chapter 1 outlines a case for design thinking in student affairs Chapter 2 discusses a brief

history of design thinking noting its germination and evolution to current practice Chapter 3 provides a detailed description of each step of the design thinking model with pertinent examples to make the steps clearer Chapter 4 explains the intersection of equity and design thinking while chapter 5 explores the use of design thinking for organizational change Chapter 6 presents a new model for design thinking assessment Chapter 7 addresses the challenges and limitations of the process Chapter 8 concludes the book by discussing the alignment of design thinking and student affairs and outlining next steps Design thinking is an innovative process that can change the way higher education and student affairs operates realizing the potential it offers
