*Mind Beyond the Body* D. Scott Rogo, 1978      The Myth of an Afterlife Michael Martin, Keith Augustine, 2015-03-12

Because every single one of us will die most of us would like to know what if anything awaits us afterward not to mention the fate of lost loved ones Given the nearly universal vested interest in deciding this question in favor of an afterlife it is no surprise that the vast majority of books on the topic affirm the reality of life after death without a backward glance But the evidence of our senses and the ever gaining strength of scientific evidence strongly suggest otherwise In *The Myth of an Afterlife* *The Case against Life after Death* Michael Martin and Keith Augustine collect a series of contributions that redress this imbalance in the literature by providing a strong comprehensive and up to date casebook of the chief arguments against an afterlife Divided into four separate sections this collection opens with a broad overview of the issues as contributors consider the strongest evidence of whether or not we survive death in particular the biological basis of all mental states and their grounding in brain activity that ceases to function at death Next contributors consider a host of conceptual and empirical difficulties that confront the various ways of surviving death from bodiless minds to bodily resurrection to any form of posthumous survival Then essayists turn to internal inconsistencies between traditional theological conceptions of an afterlife heaven hell karmic rebirth and widely held ethical principles central to the belief systems supporting those notions In the final section authors offer critical evaluations of the main types of evidence for an afterlife Fully interdisciplinary *The Myth of an Afterlife* *The Case against Life after Death* brings together a variety of fields of research to make that case including cognitive neuroscience philosophy of mind personal identity philosophy of religion moral philosophy psychical research and anomalistic psychology As the definitive casebook of arguments against life after death this collection is required reading for any instructor researcher and student of philosophy religious studies or theology It issues to raise provocative issues new to readers regardless of background from those who believe fervently in the reality of an afterlife to those who do not or are undecided on the matter      Parapsychology, Philosophy, and Spirituality David Ray

Griffin, 1997-01-09 In this book David Ray Griffin best known for his work on the problem of evil turns his attention to the even more controversial topic of parapsychology Griffin examines why scientists philosophers and theologians have held parapsychology in disdain and argues that neither a priori philosophical attacks nor wholesale rejection of the evidence can withstand scrutiny After articulating a constructive postmodern philosophy that allows the parapsychological evidence to be taken seriously Griffin examines this evidence extensively He identifies four types of repeatable phenomena that suggest the reality of extrasensory perception and psychokinesis Then on the basis of a nondualistic distinction between mind and brain which makes the idea of life after death conceivable he examines five types of evidence for the reality of life after death messages from mediums apparitions cases of the possession type cases of the reincarnation type and out of body experiences His philosophical and empirical examinations of these phenomena suggest that they provide support for a postmodern

spirituality that overcomes the thinness of modern religion without returning to supernaturalism Parapsychology Jane Henry, 2005 Beginning with an introduction to the methodology this book provides the reader with a sympathetic yet critical overview of current research into unexplained phenomena including visions telepathy psychokinesis and out of body experiences **Parapsychology in the Twenty-First Century** Michael A. Thalbourne, Lance Storm, 2014-09-24 By now parapsychology should have become an accepted scientific field of research However there is great resistance to parapsychological research despite the strength of evidence in favor of conducting it This collection of essays focuses on the future of the psychical research field One essay speculates about a kind of future when psychic phenomena are studied in every university Another identifies 10 areas of potential difficulty facing parapsychology Other essays indicate areas where conclusions may need re examination and refinement and presents possibilities for innovative approaches to future study Some of the areas of study covered include altered states of consciousness ESP Meta Analysis the theory of psychopraxia and sociological and phenomenological issues *The Spiritual Anatomy of Emotion* Michael A. Jawer, 2009-05-21 A cutting edge examination of feelings not thoughts as the gateway to understanding consciousness Contents that emotion is the greatest influence on personality development Offers a new perspective on immunity stress and psychosomatic conditions Explains how emotion is key to understanding out of body experience apparitions and other anomalous perceptions Contemporary science holds that the brain rules the body and generates all our feelings and perceptions Michael Jawer and Dr Marc Micozzi disagree They contend that it is our feelings that underlie our conscious selves and determine what we think and how we conduct our lives The less consciousness we have of our emotional being the more physical disturbances we are likely to have from ailments such as migraines fibromyalgia chronic fatigue and post traumatic stress to anomalous perceptions such as apparitions and involuntary out of body experiences Using the latest scientific research on immunity sensation stress cognition and emotional expression the authors demonstrate that the way we process our feelings provides a key to who is most likely to experience these phenomena and why They explain that emotion is a portal into the world of extraordinary perception and they provide the studies that validate the science behind telepathic dreams poltergeists and ESP The *Spiritual Anatomy of Emotion* challenges the prevailing belief that the brain must necessarily rule the body Far from being by products of neurochemistry the authors show that emotions are the key vehicle by which we can understand ourselves and our interactions with the world around us as well as our most intriguing and perennially baffling experiences The Skeptic Encyclopedia of Pseudoscience Michael Shermer, 2002-11-14 A thorough objective and balanced analysis of the most prominent controversies made in the name of science from the effectiveness of proposed medical treatments to the reality of supernatural claims Edited by Michael Shermer editor and publisher of The Skeptic magazine this truly unique work provides a comprehensive introduction to the most prominent pseudoscientific claims made in the name of science Covering the popular the academic and the bizarre the encyclopedia includes everything from alien abductions to the Bermuda Triangle

crop circles Feng Shui and near death experiences Fifty nine brief descriptive summaries and 23 investigations from The Skeptic magazine give skeptical analyses of subjects as far ranging as acupuncture chiropractic and Atlantis The encyclopedia also gives for and against debates on topics such as evolutionary psychology and case studies on topics like police psychics and the medical intuitive Carolyn Myss Finally the volumes include five classic works in the history of science and pseudoscience including the speech William Jennings Bryan never delivered in the Scopes trial and the first scientific and skeptical investigation of a paranormal spiritual phenomenon by Benjamin Franklin and Antoine Lavoisier Astral Travel For Beginners Richard Webster, 2025-05-23 What you've done thousands of times in your sleep can now become a totally conscious experience with the help of this handy guidebook You'll soon learn to leave your body and explore the astral realm with confidence and safety Achieving your first astral travel experience is always the most difficult and no single method will work for everyone That's why the techniques in this book are carefully graded to step by step through an actual out of body experience And with fifteen time tested methods to choose from you're sure to be astral traveling in no time Once you learn to leave your body the freedom you'll discover will transform your life Explore new worlds learn to travel with a partner go back and forth through time even find a lover but most importantly lose your fear of death as you discover that you are a spiritual being independent of your physical body Otherworld Journeys Carol Zaleski, 1988-11-03 Dozens of books articles television shows and films relating near death experiences have appeared in the past decade People who have survived a close brush with death reveal their extraordinary visions and ecstatic feelings at the moment they died describing journeys through a tunnel to a realm of light visual reviews of their past deeds encounters with a benevolent spirit and permanent transformation after returning to life Carol Zaleski's Otherworld Journeys offers the most comprehensive treatment to date of the evidence surrounding near death experiences The first to place researchers' findings first person accounts and possible medical or psychological explanations in historical perspective she discusses how these materials reflect the influence of contemporary culture She demonstrates that modern near death reports belong to a vast family of otherworld journey tales with examples in nearly every religious heritage She identifies universal as well as culturally specific features by comparing near death narratives in two distinct periods of Western society medieval Christendom and twentieth century secular America This comparison reveals profound similarities such as the life review and the transforming after effects of the vision as well as striking contrasts such as the absence of hell or punishment scenes from modern accounts Mediating between the debunkers and the near death researchers Zaleski considers current efforts to explain near death experience scientifically She concludes by emphasizing the importance of the otherworld vision for understanding imaginative and religious experience in general **The Case for Life After Death** Elizabeth E. McAdams, Raymond Bayless, 1981 Mental health professionals should be attuned to the ideal of compassionate understanding even when faced with clinical and social questions of a large scope What if the patient is a family rather than an individual Or a small group a

large group an organization a community or social institution What if the patient is a whole culture If all of these are cases in need can psychiatric assessment of them provide the necessary understanding and devise appropriate and workable forms of help What are the next evolutions of psychiatric diagnosis and what are the differences in human well being they can make The papers in this book are attempts to come to grips with these questions one by one cautiously or boldly according to each author's outlook and temperament

True Tales of the Paranormal Kimberly Molto, 2002-09 True Tales of the Paranormal is an intriguing examination of reincarnation premonitions and other spooky inexplicables from a scientific perspective exploring modern scientific theories and current research The author also provides suggestions on how to deal with paranormal experiences and where to go for help and information

Psychics, Sensitives and Somnambules Rodger I. Anderson, 2015-01-27 Claimants of paranormal abilities have always attracted controversy and fascination and sometimes rigorous study by scientists Charles Bailey an Australian medium was seemingly able to materialize different objects animate and inanimate under conditions which made it difficult to conceive how they could have been normally produced Sumitra Singh a woman of Northern India who in 1984 became subject to epileptic type seizures claimed to be possessed by spirits of the dead Franck Kluski was a Polish poet banker and physical medium who specialized in both human and animal materializations This biographical dictionary contains profiles of 330 psychics worldwide from Tony Agpaoa to Elenor Zugun each accompanied by

a bibliography listing the primary sources consulted The primary focus is on those claimed psychics who have figured prominently in the history of the subject though some lesser known figures are included to show how rich varied and colorful that history has been The aim throughout is to present each case as fairly and dispassionately as the facts allow with a particular eye for accuracy in details and presentation The approach is historical not apologetic or accusatory making the work ideally suited as a permanent reference

**Seeing Myself** Susan Blackmore, 2017-07-06 Essential reading for anyone seeking to understand their own mind and to find a spiritual path that is compatible with science As an impressionable young student Susan Blackmore had an intense dramatic and life changing experience seeming to leave her body and travel the world With no rational explanation for her out of body experience OBE she turned to astral projection and the paranormal but soon despaired of finding answers Decades later a Swiss neurosurgeon accidentally discovered the spot in the brain that can induce OBEs and everything changed this crucial spot is part of the brain's self system and when disturbed so is our experience of self Blackmore leaped back into OBE research and at last began to unravel what had happened to her *Seeing Myself* describes her long quest for answers through spirituality religion drugs meditation philosophy and neuroscience Anyone can have an OBE indeed 15 per cent of us have Even more have experienced sleep paralysis lucid dreaming and the creepy sense of an invisible presence At last with the advent of brain stimulation fMRI scanning and virtual reality all these phenomena are beginning to make sense Long relegated to the very fringes of research the new science of out of body experiences is now contributing to our understanding of consciousness and our very selves

*Yoga & Parapsychology* K. Ramakrishna Rao, 2010-01-01 Yoga and Parapsychology are two areas in which a significant amount of professional research is awaited Parapsychology considered as the discipline to study psi psychic abilities is essentially the science of siddhis extraordinary human abilities Yoga is considered to be an effective psycho spiritual pursuit that results in the manifestation of a variety of supernormal phenomena In fact Patanjali's Yoga Sutras is the foundational text of psychic science One of its four parts Vibhuti Pada is filled with the description and discussion of a variety of paranormal phenomena There is thus an intrinsic commonality between yoga and parapsychology which remains essentially unexplored in any systematic way A serious and scientific study of the two and the resultant synergy of their confluence could result in resolving many of the riddles that puzzle parapsychology today and be a harbinger of a vibrant science opening up new frontiers Further it could be seen as a productive East West meet in a profound sense Keeping this in view a national conference and a workshop were organized during January 3-23 2006 at Andhra University by the Institute for Human Science and Service with international participation The present volume is a compilation of the major presentations at the conference and workshop which are appropriately revised and edited in light of the discussions The contents of the volume contain theoretical articles and reviews as well as experimental reports Contributors come from different countries besides India including the United States of America Sri Lanka the United Kingdom Germany and the Netherlands Thus the volume is international in scope and

coverage     Mediality on Trial Ehler Voss, 2020-09-21 This volume addresses controversies connected to the testing of the capacities and potentials of mediums Today we commonly associate the term medium with the technical communication between transmitters and receivers Yet this term likewise applies to those who cooperate with agencies that exceed the presumed domain of the material world Insofar as one presumes a division between distinctly opposed categories of religion and the secular technical media tend to be associated with the secular and human trance mediums tend to be associated with religion after 1900 This volume concerns the ways in which the term medium still marks an overlapping of and thus problematizes the aforementioned division between religion and the secular the personal and the technological The term medium carries with it a seed of doubt that is itself inseparable from investment in the medium s power insofar as they communicate with an other realm mediums offer the hope and promise of new possibilities and improved efficiency and thus of a better life yet they have simultaneously been under suspicion of altering or even inventing the messages they communicate It is due to this combination of promise and suspicion that mediumism has tended to evoke scientific religious and moral controversies Thus we can speak of a mediumistic trial that is a process in which a medium is put to the test concerning its potentials and trustworthiness Around 1800 experts were asked if a modern secular institution would be capable of inspiring domesticating or excluding trance mediumship This question has stayed with us ever since and the answers have remained inconclusive That is why the past and present of mediumship may be asked to elucidate each other

**Our African Unconscious** Edward Bruce Bynum, 2021-09-07 Examines the Oldawan the Ancient Soul of Africa and its correlation with what modern psychologists have defined as the collective unconscious Draws on archaeology DNA research history and depth psychology to reveal how the biological and spiritual roots of religion and science came out of Africa Explores the reflections of our African unconscious in the present confrontation in the Americas in the work of the Founding Fathers and in modern psychospirituality The fossil record confirms that humanity originated in Africa Yet somehow we have overlooked that Africa is also at the root of all that makes us human our spirituality civilization arts sciences philosophy and our conscious and unconscious minds In this extensive look at the unfolding of human history and culture Edward Bruce Bynum reveals how our collective unconscious is African Drawing on archaeology DNA research depth psychology and the biological and spiritual roots of religion and science he demonstrates how all modern human beings regardless of ethnic or racial categorizations share a common deeper identity both psychically and genetically a primordial African unconscious Exploring the beginning of early religions and mysticism in Africa the author looks at the Egyptian Nubian role in the rise of civilization the emergence of Kemetic Egypt and the Oldawan the Ancient Soul and its correlation with what modern psychologists have defined as the collective unconscious Revealing the spiritual and psychological ramifications of our shared African ancestry the author examines its reflections in the present confrontation in the Americas in the work of the Founding Fathers and in modern Black spirituality which arose from African diaspora religion and philosophy By recognizing our

shared African unconscious the matrix that forms the deepest luminous core of human identity we learn that the differences between one person and another are merely superficial and ultimately there is no real separation between the material and the spiritual     *Acorns: Windows High-Tide Foghat* Joshua Morris, 2013-01-23 Acorns delineates the future of humanity as a reunification of intellect with the Deep Self Having chosen to focus upon ego established securely by the time of Christ much more beta brain wave development will destroy our species and others which process has already begun We create our own realities through beliefs intents and desires and we were in and out of probabilities constantly Feelings follow beliefs not the other way around

The Top Books of the Year Mind Beyond The Body The Mystery Of Esp Projection The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of bestselling books, exploring the engaging narratives that have charmed audiences this year. Mind Beyond The Body The Mystery Of Esp Projection : Colleen Hoovers "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and gripping novel that will keep you wondering until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
