**Law and Catastrophe** Austin Sarat, Martha Merrill Umphrey, Lawrence Douglas, 2007-06-18 The study of catastrophe is a growth industry Today cosmologists scan the heavens for asteroids of the kind that smashed into earth some ninety million years ago leading to the swift extinction of the dinosaurs Climatologists create elaborate models of the chaotic weather and vast flooding that will result from the continued buildup of greenhouse gases in the planet s atmosphere Terrorist experts and homeland security consultants struggle to prepare for a wide range of possible biological chemical and radiological attacks aerated small pox virus spread by a crop duster botulism dumped into an urban reservoir a dirty bomb detonated in a city center Yet strangely law s role in the definition identification prevention and amelioration of catastrophe has been largely neglected The relationship between law and other limiting conditions such as states of emergency has been the subject of rich and growing literature By contrast little has been written about law and catastrophe In devoting a volume to the subject the essays authors sketch the contours of a relatively fresh yet crucial terrain of inquiry Law and Catastrophe begins the work of developing a jurisprudence of catastrophe
