Mind The Gaps Singapore Business In China:

Mind the Gaps Sree Kumar, Sharon Siddique, Yuwa Wong, 2005 Provides an analysis of how to be successful in China especially for the Singapore business community **Singapore-china Relations: 50 Years** Yongnian Zheng, Liang Fook Lye, 2015-11-06 Showcasing the substantive and multi faceted Singapore China relationship this book examines the political economic socio cultural people to people and even military exchanges between the two countries It also highlights flagship projects and other key private sector led projects that have become hallmarks of bilateral cooperation The book argues that the current level of cooperation is built on the earlier foundation laid by Lee Kuan Yew and Deng Xiaoping In a way the bilateral relationship is a unique one For one Deng Xiaoping had singled out Singapore as a model for China's reforms and China today continues to find Singapore's experience relevant Singapore is also learning from China in the process The two countries also have a number of bilateral institutional mechanisms that have become more important in reviewing existing cooperation and identifying new ways of working together Rather than simply provide an overview of bilateral relations the book highlights the unique or distinguishing features of the Singapore China relationship **Southeast Asia in China**

Ying-kit Chan, Chang-Yau Hoon, 2022-11-28 As part of China's south Southeast Asia has historically assumed a peripheral position when juxtaposed against the power of the Chinese state In the existing scholarly literature the power asymmetry is reflected in the ostensible bias where most studies are about China's presence in or engagement with Southeast Asia rather than the reverse studies on the presence or influence of Southeast Asia in China have been a marginal enterprise The present volume aims to fill this void by exploring the historical entanglements and contemporary engagements of Southeast Asians in China through a Southeast Asian perspective As China seeks to understand Southeast Asia's presence in the country on its own terms it is also engaged in a process of self discovery and defining where and how it should stand in relation to the region Departing from the discourse of China as the a priori center dominating the scholarship on China Southeast Asia relations the present volume hopes to subvert such power relations in order to bring fresh perspectives on the historical and contemporary contributions of Southeast Asians in China *The Oxford Handbook of Business Groups* Asli M.

Marie-Laure Djelic, Sigrid Quack, 2010-05-20 Transnational communities are social groups that emerge from mutual interaction across national boundaries oriented around a common project or imagined identity This common project or identity is constructed and sustained through the active engagement and involvement of at least some of its members Such communities can overlap in different ways with formal organizations but in principle they do not need formal organization to be sustained This book explores the role of transnational communities in relation to the governance of business and economic

activity It does so by focusing on a wide range of empirical terrains including discussions of the Laleli market in Istanbul the institutionalization of private equity in Japan the transnational movement for open content licenses and the mobilization around environmental certification These studies show that transnational communities can align the cognitive and normative orientations of their members over time and thereby influence emergent transnational governance arrangements
