Mind, Body and Soul Random House,1998-10-31 **Value and the Humanities** Zoe Hope Bulaitis,2020-06-29
Tracing the shift from liberal to neoliberal education from the nineteenth century to the present day this open access book provides a rich and previously underdeveloped narrative of value in higher education in England Value and the Humanities draws upon historical financial and critical debates concerning educational and cultural policy Rather than writing a singular defence of the humanities against economic rationalism Zoe Hope Bulaitis constructs a nuanced map of the intersections of value in the humanities encompassing an exploration of policy engagement scientific discourses fictional representation and the humanities in public life The book articulates a kaleidoscopic range of humanities practices which demonstrate that although recent policy encourages higher education to be entirely motivated by outcomes fiscal targets and the acquisition of employability skills the humanities continue to inspire and aspire beyond these limits This book is a historically grounded and theoretically informed analysis of the value of the humanities within the context of the market *The Campus Novel* ,2019-01-04 The Campus Novel Regional or Global presents innovative scholarship in the field of academic fiction Whereas the campus novel is traditionally considered a product of the Anglo American world the present study opens a new perspective it elucidates the intercultural exchange between the well established Western canon of British and American academic fiction and its more recent regional response outside the Anglo American territory **The Competitive Mind** Andrew Crouch,2008-09-15 This is a guide to the principles of competitive business strategy The book draws chapter by chapter on illustrative instances and examples involving vigorous competition between determined rivals in business It offers helpful ideas for devising ways to prevail in confrontation with business competitors Based on the course on competitive strategy taught by the author over the past ten years to executives and undergraduates the book provides a thought provoking complement to standard textbooks Each chapter addresses a key strategic principle richly illustrated with topical business examples and followed by student questions at the end of the chapter Most contemporary accounts of strategic thinking concentrate on preserving a business in steady state through thinking about economics markets and business development rather than dealing directly with psychological confrontation between business rivals **Mind, Body & Soul** ,1998 **Science Incarnate** Christopher Lawrence,Steven Shapin,1998-03-28 This book addresses issues of crucial importance to present day discussions about the nature of knowledge and how it is produced 54 halftones Line art
