Mind In Evolution:

The Evolution of Mind Denise D. Cummins, Colin Allen, 1998 Our understanding of the human mind has radically changed in recent years from the unified mind once envisioned by Rene Descartes over three hundred years ago to a new understanding of mind as a set of specialized cognitive components gradually accumulated in our evolutionary past As a result many scientists and philosophers now believe that our minds emerged out of the same type of evolutionary processes that have shaped our bodies In *The Evolution of Mind* outstanding figures on the cutting edge of evolutionary psychology follow clues provided by current neuroscientific evidence to illuminate many puzzling questions of human cognitive evolution With contributions from psychologists ethologists anthropologists and philosophers the book offers a broad range of approaches to explore the mysteries of the mind's evolution from investigating the biological functions of human cognition to drawing comparisons between human and animal cognitive abilities This interdisciplinary work presents a comparative and evolutionary perspective on a wide variety of topics including mental algorithms for reasoning about contingencies quantities social norms and the minds of others social play and communicative abilities thought and language and the role of Darwin's theory of natural selection in evolutionary psychology Written in a highly readable style *The Evolution of Mind* will appeal to a broad range of researchers and students and help set the agenda for the field for years to come

The Biased Mind Jérôme Boutang, Michel De Lara, 2015-09-15 Using a wealth of anecdotes data from academic literature and original research this very accessible little book highlights how we all struggle to cope with the maelstrom of choices influences and experiences that come our way The authors have slogged through piles of dry research papers to provide many wonderful nuggets of information and surprising insights For example Why is an upside down red triangle such a powerful warning sign on the road What is the best kind of alibi What makes the number 7 so special Why is it better to whisper words of love into the left ear Will that recent marriage last Why is it that the French eat snails but not slugs The reader will discover the amazing tools and shortcuts that millennia of evolution have built into our brains And this knowledge is power Knowing more about how the human mind connects the dots helps us understand why decision making is so tricky With insights from evolutionary psychology we become better equipped to understand ourselves and others and to interact and communicate more effectively

Evolution of Mind, Brain, and Culture Gary Hatfield, Holly Pittman, 2013-04-19 *Evolution of Mind Brain and Culture* draws together studies in archaeology anthropology psychology philosophy genetics neuroscience and environmental science to investigate the evolution of the human mind the brain and the human capacity for culture

[A Mind So Rare](#) Merlin Donald, 2001 Donald psychology Queen's University Canada challenges the prevailing view that seeks to explain away human consciousness and presents a theory on the origins of the modern mind He describes the cultural and neuronal forces that power human modes of awareness and proposes that the human mind is a hybrid product of the interweaving of the brain with an invisible symbolic web of culture to form a distributed cognitive network Using evidence

from brain and behavioral studies of humans and animals he explains how an expansion of consciousness transcends the limitations of the mammalian mind and elaborates the foundations of self evaluation and self reflection c Book News Inc

Mind and Its Evolution Allan Paivio,2014-01-14 This book updates the Dual Coding Theory of mind DCT a theory of modern human cognition consisting of separate but interconnected nonverbal and verbal systems Allan Paivio a leading scholar in cognitive psychology presents this masterwork as new findings in psychological research on memory thought language and other core areas have flourished as have pioneering developments in the cognitive neurosciences Mind and Its Evolution provides a thorough exploration into

how these adaptive nonverbal and verbal systems might have evolved as well as a careful comparison of DCT with contrasting single code cognitive theories Divided into four parts this text begins with a general systematic theory of modern human cognition as the reference model for interpreting the cognitive abilities of evolutionary ancestors The first half of the book discusses mind as it is the second half addresses how it came to be that way Each half is subdivided into two parts defined by thematic chapters Mind and Its Evolution concludes with evidence based suggestions about nourishing mental growth through applications of DCT in education psychotherapy and health This volume will appeal to cognitive and evolutionary psychologists as well as students in the areas of memory language cognition and mind evolution specialists in psychology philosophy and other disciplines

Evolution and the Social Mind Joseph P. Forgas, Martie G. Haselton, William von Hippel, 2011-03-15 This book seeks to combine the study of human social cognition the way we think decide plan and analyze social situations with an evolutionary framework that considers these activities in light of evolutionary adaptations for solving problems of survival faced by our ancestors over thousands of generations The chapters report recent research and theories illustrating how evolutionary principles can shed new light on the subtle and often subconscious ways that cognitive mechanisms guide peoples thoughts memories judgments attitudes and behaviors in social life The contributors to this volume who are leading researchers in their fields seek answers to such intriguing questions as how can evolutionary principles help to explain human beliefs attitudes judgments prejudice and group preferences Are there benefits to behaving unpredictably Why are prototypical faces more attractive than atypical ones How do men and women think about and select potential mates What are the adaptive functions of negative affect What are the evolutionary influences on the way people think about and respond to social exclusion and ostracism *Evolution and the Social Mind* offers a highly integrated and representative coverage of this emerging field and is suitable as a textbook in advanced courses dealing with social cognition and evolutionary psychology

Evolution in Mind Henry C. Plotkin, 1997 From the nature nurture question which has occupied philosophers and scientists for thousands of years to the most recent debates about how the mind is structured Plotkin looks at what it means to be human from an evolutionist s perspective

The Adapted Mind Jerome H. Barkow, Leda Cosmides, John Tooby, 1992 Although researchers have long been aware that the species typical architecture of the human mind is the product of our evolutionary history it has only been in the last three decades that advances in such fields as evolutionary biology cognitive psychology and paleoanthropology have made the fact of our evolution illuminating Converging findings from a variety of disciplines are leading to the emergence of a fundamentally new view of the human mind and with it a new framework for the behavioral and social sciences First with the advent of the cognitive revolution human nature can finally be defined precisely as the set of universal species typical information processing programs that operate beneath the surface of expressed cultural variability Second this collection of cognitive programs evolved in the Pleistocene to solve the adaptive problems regularly faced by our hunter gatherer ancestors problems such as mate selection

language acquisition co operation and sexual infidelity Consequently the traditional view of the mind as a general purpose computer tabula rasa or passive recipient of culture is being replaced by the view that the mind resembles an intricate network of functionally specialized computers each of which imposes contentful structure on human mental organization and culture The Adapted Mind explores this new approach evolutionary psychology and its implications for a new view of culture

The Long Evolution of Brains and Minds Gerhard Roth,2013-06-03 The main topic of the book is a reconstruction of the evolution of nervous systems and brains as well as of mental cognitive abilities in short intelligence from simplest organisms to humans It investigates to which extent the two are correlated One central topic is the alleged uniqueness of the human brain and human intelligence and mind It is discussed which neural features make certain animals and humans intelligent and creative Is it absolute or relative brain size or the size of intelligence centers inside the brains the number of nerve cells inside the brain in total or in such intelligence centers decisive for the degree of intelligence of mind and eventually consciousness And which are the driving forces behind these processes Finally it is asked what all this means for the classical problem of mind brain relationship and for a naturalistic theory of mind

The Adapted Mind Jerome H. Barkow,Leda Cosmides,John Tooby,1995-10-19 Although researchers have long been aware that the species typical architecture of the human mind is the product of our evolutionary history it has only been in the last three decades that advances in such fields as evolutionary biology cognitive psychology and paleoanthropology have made the fact of our evolution illuminating Converging findings from a variety of disciplines are leading to the emergence of a fundamentally new view of the human mind and with it a new framework for the behavioral and social sciences First with the advent of the cognitive revolution human nature can finally be defined precisely as the set of universal species typical information processing programs that operate beneath the surface of expressed cultural variability Second this collection of cognitive programs evolved in the Pleistocene to solve the adaptive problems regularly faced by our hunter gatherer ancestors problems such as mate selection language acquisition cooperation and sexual infidelity Consequently the traditional view of the mind as a general purpose computer tabula rasa or passive recipient of culture is being replaced by the view that the mind resembles an intricate network of functionally specialized computers each of which imposes contentful structure on human mental organization and culture The Adapted Mind explores this new approach evolutionary psychology and its implications for a new view of culture

Evolution, Culture, and the Human Mind Mark Schaller,Ara Norenzayan,Steven J. Heine,Toshio Yamagishi,Tatsuya Kameda,2011-03-17 Evolution Culture and the Human Mind is the first scholarly book to integrate evolutionary and cultural perspectives on human psychology The contributors include world renowned evolutionary cultural social and cognitive psychologists These chapters reveal many novel insights linking human evolution to both human cognition and human culture including the evolutionary origins of cross cultural differences

Picturing the Mind Simona Ginsburg,Eva Jablonka,2022-02-01 Consciousness in all its possible human and nonhuman varieties explored through words and images

What is consciousness and who or what is conscious humans nonhumans nonliving beings How did consciousness evolve Picturing the Mind pursues these questions through a series of vistas short engaging texts by Simona Ginsburg and Eva Jablonka accompanied by Anna Zeligowski's lively illustrations Taking an evolutionary perspective Ginsburg and Jablonka suggest that consciousness can take many forms and is found not only in humans but even in such animals as octopuses who seem to express emotions by changing color and bees who socialize with other bees They identify the possible evolutionary marker of the transition from nonconscious to conscious animals and they speculate intriguingly about aliens and artificial intelligence Each picture and text serves as a starting point for discussion The authors consider among other things what it's like to be a bat and then later what it's like to be a bat in virtual reality ask if the self is like a hole in a doughnut report that women children and nonwhite men were once thought by white men to be less richly conscious and explore what sets humans apart is it music toolmaking cooperative parenting blushing sentience symbolic language In Picturing the Mind questions suggest answers
