American and French expeditions sailed south to chart further portions of the continent that had come to be called Antarctica. For the nearly two centuries since the race to claim exclusive possession of Antarctica has gripped the imagination of the world, Antarctica: A Biography is the first ever major international history of this forbidding continent from the eighteenth century voyages of discovery to the fierce rivalries of today as governments, scientists, environmentalists and oil companies compete for control. On one level it is the story of explorers battling the elements in the most hostile place on earth as they strive for personal triumph, commercial gain and national glory. On a deeper level it is the story of nations seeking to incorporate the Antarctic into their own national stories and to claim its frozen wastes as their own.

In the Ghost Country Peter Hillary, John E. Elder, 2003-12-30 A reflective memoir by a world famous explorer delves into the astonishing adventures of his career including his trips to the Himalayas, the Andes, the Arctic and an almost fatal trip to the South Pole. **Book Review Digest**, 1996

Explorer Travellers and Adventure Tourism Jennifer Laing, Warwick Frost, 2014-08-04 This book examines the nexus between exploring and tourism and argues that exploration travel based heavily on explorer narratives and the promises of personal challenges and change is a major trend in future tourism. In particular it analyses how romanticised myths of explorers form a foundation for how modern day tourists view travel and themselves. Its scope ranges from the Golden Age of imperial explorers in the 19th and early 20th centuries through the growth of adventure and extreme tourism to possible future trends including space travel. The volume should appeal to researchers and students across a variety of disciplines including tourism studies, sociology, geography and history. **Take Five Minutes: Fascinating Facts and Stories for Reading and Critical Thinking** Ruth Foster, 2001-06 Features reproducible intellectually stimulating activities that promote learning, reinforce what has been covered, sparks students' interest and takes only a few minutes to use.

Modern Explorers Robin Hanbury-Tenison, Robert Twigger, 2021-11-09 Stories of the thrills and hardships faced by modern expeditions that continue to enhance our understanding of the world around us now in a compact edition. This book profiles forty modern explorers who have disproved the idea that there is nowhere left to discover. Some are experienced and celebrated worldwide while others are just starting to make their mark. The Modern Explorers delves into challenging and extraordinary expeditions to the remotest parts of the world by explorers from the United States, Australia, China, France and beyond. Nine thematic sections cover all terrains: Polar, Desert, Rainforest, Mountain, Ocean, River, Under Sea, Under Land and Lost Worlds. Written mainly by the explorers themselves, these accounts provide unique insight into what it is like to join an expedition, from being dragged through the top of the rainforest canopy in an inflatable raft suspended from a balloon to pedaling a boat across the Pacific to standing on the edge of an erupting volcano.
