Mind The Gap Promoting A Transatlantic Revolution In Military Affairs:

Mind the Gap David C. Gompert, Richard L. Kugler, Martin C. Libicki, 1999-07 Warns of the growing disparity in combat capability between European and U S forces over the exploitation of the revolution in military affairs RMA The consequences of this transatlantic rift could undermine NATO This book dissects the problem of a growing disparity and rejects its inevitability Instead it lays out a multitiered strategy for its solution which is specific and practical including processes and procedures for implementation Chapters assessing the problem a shared strategic outlook building compatible forces for RMA operations creating a Transatlantic system of systems creating a Transatlantic RMA market **Mind the Gap**

Promoting a Transatlantic Revolution in Military Affairs ,1999 When American defense officials meet informally with their allies and friends from other North Atlantic Treaty Organization countries the conversation often turns to the growing disparity in combat capability between European and U S forces The problem is bemoaned but the participants are not stirred to action This is unfortunate We need a cross Atlantic debate that seeks feasible solutions to this problem Mind the Gap responds directly to that need It not only dissects the problem of a growing disparity but also rejects its inevitability Instead it lays out a multitiered strategy for its solution which is specific and practical including processes and procedures for implementation The proposed strategy is complicated and would be difficult to execute it would raise questions and even objections That is as it should be The alliance nevertheless has solved larger more complex problems We urgently need to find a way to close the gap because the problem is getting worse The United States continues to implement its vision of a globally mobile military force equipped with the latest technology The European members of NATO are not investing in similar capabilities As a result the gap will widen and be increasingly difficult to close Mind the gap promoting a transatlantic revolution in military affairs ,1999 When American defense officials meet informally with their allies and friends from other North Atlantic Treaty Organization countries the conversation often turns to the growing disparity in combat capability between European and U S forces The problem is bemoaned but the participants are not stirred to action This is unfortunate We need a cross Atlantic debate that seeks feasible solutions to this problem Mind the Gap responds directly to that need It not only dissects the problem of a growing disparity but also rejects its inevitability Instead it lays out a multitiered strategy for its solution which is specific and practical including processes and procedures for implementation The proposed strategy is complicated and would be difficult to execute it would raise questions and even objections That is as it should be The alliance nevertheless has solved larger more complex problems We urgently need to find a way to close the gap because the problem is getting worse The United States continues to implement its vision of a globally mobile military force equipped with the latest technology The European members of NATO are not investing in similar capabilities As a result the gap will widen and be increasingly difficult to close **Mind the Gap** David C. Military Affairs Elinor Camille Sloan, Université du Québec à Montréal. Centre d'études des politiques étrangères et de sécurité, Raoul-Dandurand Chair of Strategic and Diplomatic Studies, 2002 The campaign in Afghanistan the Gulf war and Kosovo show how advances in information technology are driving a high tech revolution in military affairs RMA This text outlines elements of the RMA and examines efforts of the US and NATO **Towards a Brave New Arms Industry?**

Richard Bitzinger, 2014-08-27 In the post Cold War era most countries have been forced to radically reduce their arms industries and abandoned self sufficiency in favour of a subordinate role in an increasingly globalized worldwide defence industry This has significant implications for the future of armaments production for proliferation and for arms control

US Intervention Policy and Army Innovation Richard Lock-Pullan, 2004-08-02 US Intervention Policy and Army Innovation examines how the US Army rebuilt itself after the Vietnam War and how this has affected US intervention policy from the victory of the Gulf War to the failure of Somalia the Bosnian and Kosovo interventions and the use of force post 9 11 Richard Lock Pullan analyzes the changes in US military intervention strategy by examining two separate issues the nature of the US Army as it rebuilt itself after the Vietnam War and the attempts by the US to establish criteria for future military interventions He first argues that US strategy traditionally relied upon national mobilization to co ordinate political aims and military means he subsequently analyzes how this changed to a formula of establishing militarily achievable political objectives prior to the use of force Drawing on a vast body of material and on strategic culture and military innovation literature Lock Pullan demonstrates that the strategic lessons were a product of the rebuilding of the Army s identity as it became a professional all volunteer force and that the Army s new doctrine developed a new way of war for the nation embodied in the AirLand Battle doctrine which changed the approach to strategy This book finally gives a practical analysis of how the interventions in Panama and the Gulf War vindicated this approach and brought a revived confidence in the use of force while more recent campaigns in Somalia Kosovo and Bosnia exposed its weaknesses and the limiting nature of the Army s thinking The legacy of the Army s innovation is examined in the new strategic environment post 9 11 with the operations in Afghanistan and Iraq Policy Analysis in National Security Affairs Richard L. Kugler, 2006 This book addresses how to conduct policy analysis in the field of national security including foreign policy and defense strategy It is a philosophical and conceptual book for helping people think deeply clearly and insightfully about complex policy issues This books reflects the viewpoint that the best policies normally come from efforts to synthesize competing camps by drawing upon the best of each of them and by combining them to forge a sensible whole While this book is written to be reader friendly it aspires to in depth scholarship **New Research on Politics and Economics of Europe** Christopher L.

Hughes, 2007 *New Research on Politics Economics of Europe* *The Law of Unmanned Aircraft Systems* Benjamyn I. Scott, 2022-07-12 *Aerospace Law and Policy Series Volume 11* In recent years few industries have grown so prodigiously as that of unmanned aircraft systems UAS and as a result developments in national regional and international law and policy are being initiated and implemented This new edition of the definitive survey and guide first published in 2016 reflects the expansion of this sector and the importance placed on it by a diverse range of stakeholders as well as the enlarged regulatory and policy landscape In addition to updating many of the original chapters the second edition covers new topics and moves away from a purely introductory book to a more detailed and critical compendium Authorship has also been extended beyond the original scope of contributors which originally centred around those affiliated with Leiden University's Institute of Air and Space Law and now includes additional experts from all around the world each of whom explores both already existing rules and proposals coming from national regional and international levels As well as broadened discussions on such fundamental legal issues as insurance financing liability accidents investigation privacy cyber security stakeholder organisations and industry standards the second edition takes into account major recent developments in such areas as the following applicability and relevance of international regulatory instruments coming into force of the European Union UAS related laws evolution of different States national law public safety e.g. design production operation and maintenance development of unmanned traffic management systems commercial operations including urban air mobility e.g. flying taxis cargo delivery high altitude activities and developments in defence and security e.g. dual use counter UAS industry to combat illegal use As in the first edition a representative cross section of national laws is included covering twenty one different jurisdictions This fully updated edition not only synthesises and clarifies the complex body of international regional and national UAS related law but also provides expert insight into trends and areas of concern for numerous stakeholders Without a doubt it will be of immeasurable value to lawyers relevant governmental and non governmental agencies aviation law scholars and strategic planners in the wider aviation and transport industries *The Modern Defense Industry* Richard A. Bitzinger, 2009-10-15 Whether it's guns and ammunition or multidimensional anti terrorism systems the defense industry is dynamic complex and ubiquitous It is also mysterious powerful and controversial involving thousands of players worldwide from suppliers and producers to government and military procurers to shadowy figures that trade in the black market This comprehensive two volume reference will explore on a global scale the various issues concepts problems and controversies surrounding the rise of the modern defense industry Unparalleled in its scope and insight *The Modern Defense Industry* will prove invaluable to the industry's critics and champions alike The phenomenon of a more or less permanent defense industry especially one so wide in scale breadth air sea land and space technology and geography is still relatively new Until now its implications for politics economics and technology have not been adequately discussed in an authoritative accessible format for scholars and researchers business people journalists policymakers and interested laymen *The Modern Defense Industry*

addresses the period from 1945 to the present covering the United States Europe Russia China Israel and other important arms producing and arms procuring countries Including essays by experts from around the world a glossary data on firms and governments laws and policies primary documents case studies and a host of other elements this set will be a unique resource for anyone interested in the arms industry It will also offer penetrating insights into topics like international relations and diplomacy arms proliferation and contemporary politics Volume I comprises chapters by experts in the field on topics like the relationship between the industry military and government how new modes of warfare are changing the industry the implications of globalization on the industry the black and gray areas of the arms trade and much more Volume II features an extensive A Z glossary of terms lists of defense firms and government agencies annotated primary documents lists of leading defense contractors and key weapons systems an analysis of key legislation and professional organizations The Modern Defense Industry sets the standard for state of the art overviews of an industry that has for better or worse come to infuse nearly every aspect of world affairs in the early twenty first century

Transforming European Militaries

Gordon Adams,Guy Ben-Ari,2006-09-27 A unique look at European Network Enabled Capabilities NEC and their implications for transatlantic co operation in future operations Gordon Adams and Guy Ben Ari identify the key requirements for improvement of Europe s abilities as an international actor They focus on national and collaborative as well as existing and planned networks They clearly show the reader how with the removal of the risks of Soviet invasion European defence planners must now modify their strategies and capabilities to address new threats both at home and overseas They also show why future operations within international coalitions will require network based capabilities that can interoperate Europe possesses a technological and industrial base adequate to supply such capabilities and its defence strategies are gradually being modified to emphasize expeditionary forces operations within coalition settings However much remains to be done This volume tackles the key challenges facing European nations who need to operate alongside each other and with their North American allies more effectively and efficiently This book will be of great interest to all students of European affairs and politics international relations and military and strategic studies

Military Transformation and Strategy

Bernard Loo,2008-08-21 This book explores the idea of a revolution in military affairs RMA which underpins the transformational agenda of the US military and examines its implications for smaller states The strategic studies literature on the RMA tends to be American centric and directed towards the strategic problems of the US military This volume seeks to fill the gap in the literature and establish an intellectual framework that can assist other smaller powers in their respective approaches to this issue The book does so in three main sections Part I focuses on questions of transformations in strategy and war Part II explores transformations in operations while Part III examines possible impediments to an RMA This book will be of much interest to students of Military Studies Asian Studies Strategic Studies and International Relations in general

NL ARMS

Netherlands Annual Review of Military Studies 2016 Robert Beeres,Gwendolyn Bakx,Erik de Waard,Sebastiaan

Rietjens,2016-07-28 NL ARMS 2016 offers a collection of studies on the interrelatedness of safety and security in military organizations so as to anticipate or even prepare for dire situations The volume contains a wide spectrum of contributions on organizing for safety and security in a military context that are theoretically as well as empirically relevant Theoretically the contributions draw upon international security studies safety science and organizational studies Empirically case studies address the reality of safety and security in national crisis management logistics and unconventional warfare focusing amongst others on rule of law during missions in which expeditionary military forces are involved in policing tasks to restore and reinforce safety and security and on the impact of rule of law on societal security The result is a truly unique volume that may serve practitioners policymakers and academics in gaining a better understanding of organizing for the security safety nexus

Handbook of the Sociology of the Military Giuseppe Caforio,2007-07-23 Never before has there been so extensive a collection of what has been thought said and written about the sociology of the military This accessible handbook is the first of its kind to delve into the sociological approach to the study of the military This book is compiled of documents coming from various researchers at universities around the world as well as military officers devoted to the sector of study Covered in this volume is a historical excursus of studies prior to contemporary research interpretive models and theoretical approaches developed specifically for this topic civic military relations including issues surrounding democratic control of the armed forces military culture professional training conditions and problems of minorities in the armed forces an examination of the structural change within the military over the years including new duties and functions following the Cold War This book is ideal for scholars of the subject as well as those coming to the sociology of the military for the first time *The North Atlantic Treaty Organization* Julian Lindley-French,2006-11-22 This book is an excellent introduction to the North Atlantic Treaty Organization NATO Julian Lindley French clearly outlines all of the institution s key facets to deliver an authoritative account Detailing the origins institutions workings and activities of NATO this volume also focuses on its future as the institutional basis for the security dimension of the transatlantic relationship and an institution contributing to global security It is clear that NATO faces fresh challenges in the twenty first century and will be in the spotlight for years to come

Visions of the Atlantic Alliance Simon Serfaty,2005-12-16 **The EU and the European Security Strategy** Sven Biscop,Jan Joel Andersson,2007-09-12 The European Security Strategy ESS has become an important reference framework for the EU since its inception in 2003 Without strategy an actor can only really be a reactor to events and developments In the ESS the EU now has a strategy with which it has the potential of shifting boundaries and shaping the World This volume explores this statement and examines the underlying concepts and implementation of the ESS as a judging tool of all the European Union s external actions Contributors closely involved in the early debate leading up to the ESS assess questions such as how the strategy has shaped EU policy how it relates to existing policies but also how it has added value to these policies and whether the strategy s objectives are sufficient to safeguard EU interests or whether they should be reviewed

and added too The outline of the strategy itself is followed addressing its historical and conceptual context the threat assessment the multilateral and regional policies of the EU its military capabilities and its strategic partnerships This book offers a comprehensive vision of how the EU can achieve the ambitious objectives of the European Security Strategy and become an effective global actor as the strategy helps to forge a global Europe The EU and the European Security Strategy will be of great interest to students and researchers of European politics and security studies **Sharing the Burden?**

Benjamin Zyla, 2015-02-26 Since the fall of the Berlin Wall NATO's middle powers have been pressured into shouldering an increasing share of the costs of the transatlantic alliance In *Sharing the Burden* Benjamin Zyla rejects the claim that countries like Canada have shirked their responsibilities within NATO Using a range of measures that go beyond troop numbers and defense budgets to include peacekeeping commitments foreign economic assistance and contributions to NATO's rapid reaction forces and infrastructure Zyla argues that proportionally Canada's NATO commitments in the 1990s rivaled those of the alliance's major powers At the same time he demonstrates that Canadian policy was driven by strong normative principles to assist failed and failing states rather than a desire to ride the coattails of the United States as is often presumed An important challenge to realist theories *Sharing the Burden* is a significant contribution to the debate on the nature of alliances in international relations
