Mind Value Culture Essays In Honor Of E M Adams:

Mind, Value, and Culture David Weissbord, 1989 *Maynard Adams* Glenn Blackburn, 2009 Maynard Adams 1919
2003 was a profound philosopher and civic humanist at the University of North Carolina Chapel Hill A major intellectual figure of the second half of the twentieth century Adams developed a comprehensive philosophy of civilization that applies to all humanity but has a distinctly Southern dimension The Philosopher's Index ,2009 Vols for 1969 include a section of abstracts *Readings on Color: The philosophy of color* Alex Byrne, David R. Hilbert, 1997 **Philosophy and Connectionist Theory** William Ramsey, David E. Rumelhart, Stephen P. Stich, 2013-06-17 The philosophy of cognitive science has recently become one of the most exciting and fastest growing domains of philosophical inquiry and analysis Until the early 1980s nearly all of the models developed treated cognitive processes like problem solving language comprehension memory and higher visual processing as rule governed symbol manipulation However this situation has changed dramatically over the last half dozen years In that period there has been an enormous shift of attention toward connectionist models of cognition that are inspired by the network like architecture of the brain Because of their unique architecture and style of processing connectionist systems are generally regarded as radically different from the more traditional symbol manipulation models This collection was designed to provide philosophers who have been working in the area of cognitive science with a forum for expressing their views on these recent developments Because the symbol manipulating paradigm has been so important to the work of contemporary philosophers many have watched the emergence of connectionism with considerable interest The contributors take very different stands toward connectionism but all agree that the potential exists for a radical shift in the way many philosophers think of various aspects of cognition Exploring this potential and other philosophical dimensions of connectionist research is the aim of this volume *The Metaphysics of Self and World* Elie Maynard Adams, 1991 A great fissure occurred in Western civilization in the early modern period with the divorce between the humanities and the sciences and the rise of scientific naturalism The Metaphysics of Self and World is a philosophical exploration of the relationship between the individual the culture and the world It is in the author's words a philosophy of the humanities a philosophy of humanity and a philosophy of social reality It explores the implications of a world view that would integrate the perspective of the sciences with humanistic ways of thought E M Adams claims that we do violence to ourselves as human beings by trying to fit into the world as delineated in scientific categories Rejecting cultural subjectivism and scientific naturalism he argues for the irreducibility and validity of the categories of the humanities and for a fully developed humanistic philosophy of self and world In generating this world view he utilizes the humanities as a source of culture therapy in order to close the fissure in Western civilization Author note E M Adams is Kenan Professor of Philosophy Emeritus at the University of North Carolina Chapel Hill He has written numerous books and articles and a festschrift celebrating his work Mind Value and Culture Essays in Honor of E M Adams edited by David Weissbord was published in

1989 **Consciousness** Quentin Smith,Aleksandar Jokic,2003-01-23 Consciousness is perhaps the most puzzling problem we humans face in trying to understand ourselves It has been the subject of intense study for several decades but despite substantial progress the most difficult problems have still not reached any generally agreed solution Future research can start with this book Eighteen original specially written essays offer new angles on the subject The contributors who include many of the leading figures in philosophy of mind discuss such central topics as intentionality phenomenal content knowledge of mental states consciousness and the brain and the relevance of quantum mechanics to the study of consciousness The Primacy of Persons and the Language of Culture William H. Poteat,1993 Building upon the scholarship of Michael Polanyi William Poteat has dedicated himself to offering an alternative model to the Cartesian dichotomy of mind and matter that has dominated Western thought for centuries These essays collected by James Nickell and James Stines cover a wide range of subjects from Poteat s analysis of the epistemological crisis brought on by the Cartesian program to his first attempts at formulating an alternative to the mind body dichotomy These essays relentlessly diagnose the present situation of Western thought by making explicit the philosophical presuppositions to which it is committed They include theological affirmations reflections on epistemology conceptual analyses as well as dialogues with other writers in the field of cultural criticism and linguistic theory such as George Steiner Noam Chomsky and Walker Percy Most significant is Poteat s bold affirmation of the primacy of persons and his analysis and critique of our cultural misconstructions of human awareness The Primacy of Persons and the Language of Culture provides an excellent introduction to the scholarship of William Poteat It should be of particular interest to scholars of philosophy and theology as well as others who share Poteat s deep concern for the state of human culture Recovering the Personal Dale W. Cannon,Ronald L. Hall,2016-09-14 Modernity has radically challenged the assumptions that guide our ordinary lives as persons in ways we are not normally aware We live our concrete lives taking for granted that personal decisions desires relationships actions aspirations values and knowledge are central to our existence But in modernity we think of these matters as private idiosyncratic and subjective even irrational This modern conception of ourselves and the associated way of reflection known as modern critical thinking came to dominate our thinking is culminates in the dualistic philosophy of Ren Descartes This dualism has spawned a reductionist view of persons and tainted the personal with connotations of bias partiality and privacy leaving us with the presumption that if we seek to be objective and intellectually respectable we must expunge the personal William H Poteat s work in philosophical anthropology has confronted this concern head on He undertakes a radical critique of the various forms of mind body dualism and materialist monism that have dominated Western intellectual concepts of the person In a unique style that Poteat calls post critical he uncovers the staggering incoherencies of these dualisms and shows how they have resulted in a loss of the personal in the modern age He also formulates a way out of this modern cultural insanity This constructive dimension of his thought is centered on his signature concept of the mindbody the pre reflective ground of personal existence

The twelve contributors in this collection explore outgrowths and implications of Poteat's thought. Recovering the Personal will be of interest to a broad range of intellectual readers with interests in philosophy, psychology, theology, and the humanities.

Patriotism in East Asia Jun-Hyeok Kwak, Koichiro Matsuda, 2014-09-15 Current territorial disputes between the Northeast Asian countries have stimulated a resurgence of bellicose nationalism and threaten to upset recent efforts to achieve regional cooperation and economic integration in East Asia. Alongside this, debates over pre-1945 Japanese wartime atrocities aggravated by still unresolved territorial disputes between Japan and its neighbours have triggered diplomatic conflicts in Japanese-South Korean relations, virulent anti-Japanese protests in China, and a dramatic increase of right-wing nationalism in Japan. Many have perceived these phenomena as inevitable corollaries inasmuch as they regard the Northeast Asian countries as historically homogeneous and nationalistic states and have begun to question the feasibility of the post-Cold War efforts to replace nationalism with a moderate version of civic solidarity. This book contributes to the debates surrounding patriotism and nationalism in Northeast Asia and investigates the feasibility of non-ethnocentric patriotism in countries across the region. In doing so, it highlights the differences between Asian and Western concepts of republican patriotism via theoretical discussions of the evolving discourses on nationalism, patriotism, democracy, and civic solidarity. The chapters combine theoretical discussion with historical case studies such as modern state building in late Qing Dynasty, nineteenth-century Japanese political thought, and the twentieth-century Korean independence movement. In turn, the contributors explore the possibilities for republican patriotism in contemporary Northeast Asia with a focus on the Chinese term *minzu* and the possibilities it holds for an alternative configuration of national identity in the age of globalization.

Maruyama Masao's theories of nationalism in Japan, the National Security Law in South Korea, and the impact it has had on the country's political culture and the Taiwanese movement for self-governance. Patriotism in East Asia will appeal to students and scholars of Asian politics, political theory, Asian history, and peace studies, as well as to those interested in issues of nationalism.

From the Eye of the Storm, 2022-07-04 From the Eye of the Storm: Regional Conflicts and the Philosophy of Peace presents to the reader a cross-section of an emerging field of study: the philosophy of peace. The editors bring together articles that explore the philosophic implications of many recent regional conflicts. Reflecting the diversity and vitality of any new field of study, this volume contains five sections: Conceptual Foundations, America's Homefront, Desert Storm, Assessments, Jihad, Intifada, and Other Mideast Concerns, and Latin American Issues. The topics of the articles include war, militarism, patriotism, nationalism, nonviolence, conscientious objection, feminism, peace, the media, the ethics of the Gulf War, the Israeli-Palestinian conflict, Islamic pacifism, and Latin American resistance. A concluding postscript assesses prospects for achieving peace and change within our fast-changing international scene. This volume has an extensive bibliography of writings concerning peace and conflict and is suited to professional and student audiences.

Recovering the Ground William H. Poteat, 1994-09-30 This book sets forth an ontological Copernican revolution. By means of a critical

phenomenology it shifts the axis of reflection from the putatively bedrock dualisms in which philosophy was conceived to our lively intentional mindbodies that are ontologically antecedent to beyond the grasp of yet implicated in all reflection In these exercises reflection's center of gravity is shifted to our mindbodies whose meditated whatness can be known in all of its forms of appearance as material objects organisms makers keepers and breakers of promises husbands and wives et cetera and whose unmediated thisness everywhere importunately shows itself From this seamless ontological bedrock all of our dualisms have been brought forth by reflection They never cease to be founded there in action they disappear there How on this new foundation do reflection interpretation thinking speaking time hope and memory come differently to do their work

The Pluralist ,2007 **Military Review** ,1992 Quarterly Review of Military Literature ,1992 Professional Journal of the United States Army ,1992 *A Philosophical Daybook* William H. Poteat,1990 It was the invention and dissemination of alphabetic literacy some twenty six hundred years ago that produced the Enlightenment that became our philosophical tradition Descartes consolidated in his mind body dualism the values and images of literacy that Western intellectuals embraced But literacy was not without price according to William H Poteat in a world of printed words and discarnate readers nihilism and cultural insanity reign Poteat strikes through the veil of our literate imaginations to an archaic but still active reality that antedates literacy the intractable and substantial actuality of the lively words we speak and hear spoken In the medium of printed words he seeks the philosophic import of our ongoing oral aural life which has been obscured and denigrated by the images and values we have learned as readers By every available rhetorical strategy therefore this must be an anti book It must strive to defeat our centuries old habituation to the book as spectacle in order that we may be brought to dwell in the immediacies of our lively selves in the world as we do in our oral aural life *A Philosophical Daybook* Post Critical Investigations sets out to induce a radical and irreversible transformation in the way we apprehend the world and our being in it With journal entries written over fifteen months Poteat attempts the impossible In a world threatened by our own false conception of our nature and our place in the world Poteat by a feat of philosophical archaeology seeks still intact within ourselves the ground for a new philosophy of the human *Consciousness, Color, and Content* Michael Tye,2002 A further development of Tye's theory of phenomenal consciousness along with replies to common objections *The Dialectical Necessity of Morality* Deryck Beyleveld,1991 Alan Gewirth's Reason and Morality in which he set forth the Principle of Generic Consistency is a major work of modern ethical theory that though much debated and highly respected has yet to gain full acceptance Deryck Beyleveld contends that this resistance stems from misunderstanding of the method and logical operations of Gewirth's central argument In this book Beyleveld seeks to remedy this deficiency His rigorous reconstruction of Gewirth's argument gives its various parts their most compelling formulation and clarifies its essential logical structure Beyleveld then classifies all the criticisms that Gewirth's argument has received and measures them against his reconstruction of the argument The overall result is an immensely rich picture of the argument in which all of its complex

issues and key moves are clearly displayed and its validity can finally be discerned The comprehensiveness of Beyleveld's treatment provides ready access to the entire debate surrounding the foundational argument of Reason and Morality It will be required reading for all who are interested in Gewirth's theory and deontological ethics and will be of central importance to moral and legal theorists American Philosophy: An Encyclopedia John Lachs, Robert B. Talisse, 2008-03-31 The Encyclopedia of American Philosophy provides coverage of the major figures concepts historical periods and traditions in American philosophical thought Containing over 600 entries written by scholars who are experts in the field this Encyclopedia is the first of its kind It is a scholarly reference work that is accessible to the ordinary reader by explaining complex ideas in simple terms and providing ample cross references to facilitate further study The Encyclopedia of American Philosophy contains a thorough analytical index and will serve as a standard comprehensive reference work for universities and colleges Topics covered include Great philosophers Emerson Dewey James Royce Peirce Santayana Subjects Pragmatism Progress the Future Knowledge Democracy Growth Truth Influences on American Philosophy Hegel Aristotle Plato British Enlightenment Reformation Self Assessments Joe Margolis Donald Davidson Susan Haack Peter Hare John McDermott Stanley Cavell Ethics Value Pleasure Happiness Duty Judgment Growth Political Philosophy Declaration of Independence Democracy Freedom Liberalism Community Identity
