## **Minding Matter And Other Essays In Philosophical Inquiry:**

**Minding Matter** Nicholas Rescher, 2001 *Minding Matter* presents a group of philosophical essays thematically divided. The first chapters deal with issues of philosophizing and metaphilosophy. The remainder of the book covers issues of values and human affairs. The studies collected within are united by a common methodology of probative investigation and their common purpose to provide instructive insight into a varied spectrum of important philosophical issues. Each essay is connected to the next by representing common *modus operandi* deploying the classificatory techniques that characterize the analytical mode of philosophizing in an endeavor to elucidate some larger scale issues of traditional concerns in philosophy.

*Modernity and the Ideals of Arab-Islamic and Western-Scientific Philosophy* A. Z. Obiedat, 2022-07-08 This is the first study to compare the philosophical systems of secular scientific philosopher Mario Bunge 1919-2020 and Moroccan Islamic philosopher Taha Abd al Rahman b 1945. In their efforts to establish the philosophical underpinnings of an ideal modernity, these two great thinkers speak to the same elements of the human condition despite their opposing secular and religious worldviews. While the differences between Bunge's critical realist epistemology and materialist ontology on the one hand and Taha's spiritualist ontology and revelational mystical epistemology on the other are fundamental, there is remarkable common ground between their scientific and Islamic versions of humanism. Both call for an ethics of prosperity combined with social justice and both criticize postmodernism and religious conservatism. The aspiration of this book is to serve as a model for future dialogue between holders of Western and Islamic worldviews in mutual pursuit of modernity's best case scenario.

**Enlightening Journey** Nicholas Rescher, 2002-01-01 *Enlightening Journey* brings the life of the American philosopher Nicholas Rescher into the new millennium. The latest in a quartet of autobiographical works, this latest installment charts in a single volume the many twists and turns of Rescher's life and career. It takes the reader from Rescher's childhood in Weimar and then Nazi Germany through life as a first generation American during the Depression as a high school student during World War II and a graduate student at Princeton as a serviceman during the Korean War to work as a Cold War warrior with the RAND Corporation during the Vietnam War. It traces the evolution of Rescher's career as a professional philosopher and his contribution of over seventy books and more than two hundred articles, many written in the construction of his signature system of pragmatic idealism. The very best in biography, *Enlightening Journey* offers new insight into the intellectual power and restless curiosity of an extraordinary modern scholar seeking to live out a very ordinary American life.

**Autobiography** Nicholas Rescher, 2013-05-02 This revised edition of his *Autobiography* brings up to date Rescher's account of his life and work. The passage of years since the publication of an autobiographical work makes for its growing incompleteness. Moreover, the passage of time is bound to bring some new perspectives to view. This new edition comes to terms with these circumstances. Since the publication of the previous version, Rescher's philosophical work has made substantial progress, betokened by the publication of over a score of new books that mark an ongoing expansion of

his philosophical range Then too the internet has brought to light interesting new information about Rescher's family background and antecedence Overall the book affords a detailed vivid and highly personalized picture of the life and work of someone who counts as one of the most prolific and many sided contemporary thinkers The Philosophy of Ralph Waldo Emerson Joseph Urbas,2020-09-07 This study offers the first comprehensive account of Emerson's philosophy since his philosophical rehabilitation began in the late 1970s It builds on the historical reconstruction proposed in the author's previous book Emerson's Metaphysics and like that study draws on the entire Emerson corpus the poetry and sermons included The aim here is expository The overall though not exclusive emphasis is on identity as the first term of Emerson's metaphysics of identity and flowing or metamorphosis This metaphysics or general conception of the nature of reality is what grounds his epistemology and ethics as well as his esthetic religious and political thought Acknowledging its primacy enables a general account like this to avoid the anti realist overemphasis on epistemology and language that has often characterized rehabilitation readings of his philosophy After an initial chapter on Emerson's metaphysics the subsequent chapters devoted to the other branches of his thought also begin with their necessary foundation in identity which is the law of things and the law of mind alike Perception of identity in metamorphosis is what characterizes the philosopher the poet the scientist the reformer and the man of faith and virtue Identity of mind and world is felt in what Emerson calls the moral sentiment Identity is Emerson's answer to the Sphinx riddle of life experienced as a puzzling succession of facts and events **Rescher Studies** Robert Almeder,2013-05-02 In a career extending over almost six decades Nicholas Rescher has conducted researches in almost every principal area of philosophy historical and systematic alike In this extraordinary volume two dozen scholars join in offering penetrating discussions of various facets of Rescher's investigations The result is an instructively critical panorama of the many faceted contributions of this important American philosopher Born in Germany in 1928 Nicholas Rescher came to the U S at the age of nine He is University Professor of Philosophy at the University of Pittsburgh where he has also served as Chairman of the Philosophy Department and as director and currently chairman of the Center for Philosophy of Science In a productive research career extending over six decades he has established himself as a systematic philosopher of the old style His work represents a many sided approach to fundamental philosophical issues that weaves together threads of thought from continental idealism and American pragmatism And apart from this larger program Rescher has made various specific contributions to logic the conception autodescriptive systems of many sided logic the history of logic the medieval Arabic theory of modal syllogistic to the theory of knowledge epistemetrics as a quantitative approach in theoretical epistemology and to the philosophy of science the theory of a logarithmic retardation of scientific progress Rescher has also worked in the area of futuristics and along with Olaf Helmer and Norman Dalkey is co inaugurator of the so called Delphi method of forecasting Ten books about Rescher's philosophy have been published in four languages Rescher earned his doctorate at Princeton in 1951 while still at the age of twenty two a record for Princeton's Department of

Philosophy He has served as a President of the American Philosophical Association of the American Catholic Philosophy Association of the American G W Leibniz Society of the C S Peirce Society and of the American Metaphysical Society He was the founder of the American Philosophical Quarterly An honorary member of Corpus Christi College Oxford he has been elected to membership in the European Academy of Arts and Sciences Academia Europaea the Royal Society of Canada the Institut International de Philosophie and several other learned academies Having held visiting lectureships at Oxford Constance Salamanca Munich and Marburg he has been awarded fellowships by the Ford Guggenheim and National Science Foundations Author of some hundred books ranging over many areas of philosophy over a dozen of them translated from English into other languages he is the recipient of eight honorary degrees from universities on three continents He was awarded the Alexander von Humboldt Prize for Humanistic Scholarship in 1984 the Belgian Prix Mercier in 2005 and the Aquinas Medal of the American Catholic Philosophical Association in 2007 *International Philosophical Quarterly* ,2002

Corbett,2023-12-14 Jung's Philosophy explores some of the controversial philosophical ideas that are both explicit and implicit within Jung's psychology comparing the philosophical assumptions between this and other psychotherapeutic traditions Within this book Corbett provides a useful introduction to the philosophical issues relevant to the practice of analytical psychology and how these are viewed by different psychotherapeutic traditions Most of the disagreement between schools of psychotherapy and much of the comparative literature centres around differences in theory and technique This book takes a different more fundamental approach by comparing schools of thought based on their underlying philosophical commitments The author discusses the philosophical basis of various worldviews such as idealism and realism beliefs about the nature of the psyche and the unconscious and the mind brain relationship and focuses on the way in which Jung's psychology addresses these and related issues including the possible relevance of quantum mechanics to depth psychology This text will be of value to practising psychotherapists and Jungian analysts individuals undertaking the relevant training and students in depth psychology

**Books In Print 2004-2005** Ed Bowker Staff,Staff Bowker, Ed,2004 *The Scientific Method* Henry M. Cowles,2020-04-14 The surprising history of the scientific method from an evolutionary account of thinking to a simple set of steps and the rise of psychology in the nineteenth century The idea of a single scientific method shared across specialties and teachable to ten year olds is just over a hundred years old For centuries prior science had meant a kind of knowledge made from facts gathered through direct observation or deduced from first principles But during the nineteenth century science came to mean something else a way of thinking The Scientific Method tells the story of how this approach took hold in laboratories the field and eventually classrooms where science was once taught as a natural process Henry M Cowles reveals the intertwined histories of evolution and experiment from Charles Darwin's theory of natural selection to John Dewey's vision for science education Darwin portrayed nature as akin to a man of science experimenting through evolution while his followers turned his theory onto the mind itself Psychologists reimagined the scientific method as a problem solving adaptation a basic feature of cognition that had helped humans prosper This was how Dewey and other educators taught science at the turn of the twentieth century but their organic account was not to last Soon the scientific method was reimagined as a means of controlling nature not a product of it By shedding its roots in evolutionary theory the scientific method came to seem far less natural but far more powerful This book reveals the origin of a fundamental modern concept Once seen as a natural adaptation the method soon became a symbol of science's power over nature a power that until recently has rarely been called into question
