Minding American Education:

Minding American Education Martin Bickman, 2003-01-01 This book presents an antidote to the self destructive war between educational conservatives and progressives arguing that each has only part of the solution in what should be a productive dialectic between experience and concepts Outlines the rich tradition of educational thought we have already created in this country suggesting ways to apply it to our current reform efforts Provides a new paradigm for re conceptualizing our educational past urging us to move in the direction of our best and most characteristic literary and philosophical thinkers Critiques the usual academic discourse on education and suggests alternatives through his lively and direct style

A Study of Emersonian Transcendental Educational Thought Yang Jing, 2020-06-01 Waldo Ralph Emerson 1803 1882 was a famous American writer and poet in the 19th century He was also an educational thinker who advocates reform and progress As a representative of transcendentalism he advocated the doctrine of individualism emphasizing that the power of the spirit is far more than material and that the potential of individual potential is infinite Around him gathered a group of people of insight who were determined to transform the society such as Amos Bronson Alcott 1799 1888 Margaret Fuller 1810 1850 Nathaniel Hawthorne 1804 1864 Henry David Thoreau 1817 1862 etc All of the above had once been teachers and they were deeply saddened by the rigid education system and the old fashioned education methods at the time and firmly believed that the progress and improvement of society must be based on personal education and moral self improvement They actively participated in the mainstream of educational reforms that opened people's mind innovated their ways of thinking and created a new culture with reformed educational system in New England At the same time transcendentalism has become an important part of American educational thought

American Romanticism and the Popularization of Literary Education Clemens Spahr, 2022-03-03 American Romanticism and the Popularization of Literary Education focuses on three Romantic educational genres and their institutional and media contexts the conversation literary journalism and the public lecture The genres discussed in this book illustrate the ways in which the Transcendentalists engaged nineteenth century media and educational institutions in order to fully realize their projects The book also charts the development from the semi public conversational platforms such as Alcott's Temple School and Fuller's conversations for women in the 1830s to the increasingly public periodical culture and lecture platforms of the 1840s and the early 1850s This expansion caused a reconsideration of the meaning and function of Romanticism

The Holistic Curriculum John P. Revisioning Emerson as a Theorist of Reading Michael Boatright,2024-12-31 Pushing beyond the anthologized writings of Ralph Waldo Emerson frequently taught in American literature courses this book examines the corpus of his published work to cultivate a unique understanding of his ideas in relation to reading By following the history of Emersonian criticism over the years including research surrounding Emerson and reading theory these chapters provide a persuasive and accessible exploration of Emerson that highlight the value of his work for both literary and reading scholars Boatright argues that while Emerson predates the research in reading studies that emerged in the early twentieth century his ideas around reading engagement shared reading experiences and experimentation with reading are exceedingly relevant for encouraging healthy reading practices in the literature classroom

Transcendental Learning John P. Miller,2012-01-01 Transcendental Learning discusses the work of five figures associated with transcendentalism concerning their views on education Alcott Emerson Fuller Peabody and Thoreau all taught at one time and held definite views about education The book explores these conceptions with chapters on each of the five individuals and then focuses the main features of transcendental learning and

its legacy today A central thesis of the book is that transcendental learning is essentially holistic in nature and provides rich educational vision that is in many ways a tonic to today's factory like approach to schooling In contrast to the narrow vision of education that is promoted by governments and the media the Transcendentalists offer a redemptive vision of education that includes educating the whole child body mind and soul happiness as a goal of education educating students so they see the interconnectedness of nature recognizing the inner wisdom of the child as something to be honored and nurtured a blueprint for environmental education through the work of Thoreau an inspiring vision for educating women of all ages through the work of Margaret Fuller an experimental approach to pedagogy that continually seeks for more effective ways of educating children a recognition of the importance of the presence of teacher and encouraging teachers to be aware and conscious of their own behavior a vision of multicultural and bilingual education through the work of Elizabeth Peabody The Transcendentalists particularly Emerson and Thoreau sewed the seeds for the environmental movement and for non violent change Their work eventually influenced Gandhi and Martin Luther King Jr and it continues to resonate today in the thinking of Aung Sang Suu Kyi and the Dalai Lama The Transcendentalists vision of education is worth examining as well given the dissatisfaction with the current educational scene Endorsements A Transcendental Education provides a powerfully hopeful integrative and holistic vision that can help guide education out of its current vacuum The book is thoughtfully explicated expertly synthesized and completely relevant for anyone interesting in helping education find itself Like the transcendentalists themselves this is both down to earth and soaring in its potential implications Tobin Hart author of The Secret Spiritual World of Children and From Information to Transformation Education for the Evolution of Consciousness The secret to a vital renewed America lies in the life and writings of the Transcendentalist community of Concord Massachusetts in the 19th century Jack Miller who I know has been devoted to a new living form of education throughout his career has written a book that could inspire a revolution in teaching It goes against the tide as do Emerson and Thoreau But it offers a blueprint and a hope for our children Thomas Moore author of Care of the Soul A timely account of great thinking on genuine education Reading this today's beleaguered teachers should experience a renewal of spirit and commitment Nel Noddings author of Happiness and Education Henry David Thoreau Laura Dassow Walls, 2017-06-30 This acclaimed biography captures the inspiring life and philosophy of an influential American thinker a moving portrait of a brilliant complex man The New York Times Henry David Thoreau's attempt to live deliberately in the woods outside his hometown of Concord Massachusetts has inspired individualists since the publication of Walden in 1854 But there was much more to Thoreau than his brief experiment in living at Walden Pond A member of the intellectual circle centered on his neighbor Ralph Waldo Emerson he was also an ardent naturalist a manual laborer and inventor a radical political activist and more In this acclaimed biography Laura Dassow Walls goes further than any previous Thoreau scholar to capture the man in all his profound inspiring complexity Walls traces the full arc of Thoreau's life beginning with his early days in the intellectual

hothouse of Concord when the American experiment was a family affair earned by one generation and about to pass to the next By the time he died in 1862 at only forty four years of age Thoreau had witnessed the transformation of his world from a community of farmers and artisans into a bustling interconnected commercial nation Drawing on Thoreau s published and unpublished writings Walls presents Thoreau in all his vigor quirks and contradictions the young man shattered by the sudden death of his brother the ambitious Harvard College student the ecstatic visionary who closed Walden with an account of the regenerative power of the Cosmos We meet the man whose belief in human freedom made him an uncompromising abolitionist and the passionate naturalist who long before the age of environmentalism saw tragedy for future generations in the human heedlessness around him *Resources in Education* ,1999-10 **John Brown and the Era of Literary**

Confrontation Michael Stoneham,2009-03-25 Radical abolitionist and freedom fighter John Brown inspired literary America to confrontation during his short but dramatic career as a public figure in antebellum America Emerging from obscurity during the violent struggle to determine how Kansas would enter the Union in 1856 John Brown captured the imagination of the most prominent Eastern literary figures following his dramatic though failed raid on Harper s Ferry Impressed by Brown s forthright defense of his attempt to initiate the end of slavery Whittier Whitman Melville Longfellow and Howells responded to the abolitionist with poetic tributes suggesting that Brown was a liberating hero while Emerson and Thoreau celebrated his effort to inspire the nation to a new moral awareness of the common humanity of all men Responses however were not uniform as these and other figures debated the merits and meanings of Brown s actions This exceptional book sheds new light on how John Brown inspired America s most significant intellectuals to take a public stand against the inertia of moral compromise and social degeneracy bringing the nation to the brink of civil war **The Fate of Transcendentalism** Bruce

A. Ronda,2017-10-15 The Fate of Transcendentalism examines the mid nineteenth century flowering of American transcendentalism and shows the movement s influence on several subsequent writers thinkers and artists who have drawn inspiration and energy from the creative outpouring it produced In this wide ranging study Bruce A Ronda offers an account of the movement as an early example of the secular turn in American culture and brings to bear insights from philosopher Charles Taylor and others who have studied the broad cultural phenomenon of secularization Ronda s account turns on the interplay and tension between two strands in the transcendentalist movement Many of the social experiments associated with transcendentalism such as the Brook Farm and Fruitlands reform communities Temple School and the West Street Bookshop as well as the transcendentalists contributions to abolition and women s rights spring from a commitment to human flourishing without reference to a larger religious worldview Other aspects of the movement particularly Henry Thoreau s late nature writing and the rich tradition it has inspired seek to minimize the difference between the material and the ideal the human and the not human The Fate of Transcendentalism allows readers to engage with this fascinating dialogue between transcendentalist thinkers who believe that the ultimate end of human life is the fulfillment of human possibility and

others who challenge human centeredness in favor a relocation of humanity in a vital cosmos Ronda traces the persistence of transcendentalism in the work of several representative twentieth and twenty first century figures including Charles Ives Joseph Cornell Truman Nelson Annie Dillard and Mary Oliver and shows how this dialogue continues to inform important imaginative work to this date *Resources in Vocational Education* ,1977
