Peterson, Barbara Gillam, H. A. Sedgwick, 2007-01-04 How can we best describe the processes by which we visually perceive our environment Contemporary perceptual theory still lacks a coherent theoretical position that encompasses both the limitations on the information that can be retained from a single eye fixation and the abundant phenomenal and behavioral evidence for the perception of an extended and coherent world As a result many leading theorists and researchers in visual perception are turning with new or renewed interest to the work of Julian Hochberg For over 50 years in his own experimental research in his detailed consideration of examples drawn from a wide range of visual experiences and activities and most of all in his brilliant and sophisticated theoretical analyses Hochberg has persistently engaged with the myriad problems inherent in working out the kind of coherent theoretical position the field currently lacks The complexity of his thought and the wide range of areas into which Hochberg has pursued the solution to this central problem have however limited both the accessibility of his work and the appreciation of his accomplishment In this volume we seek to bring the full range of Hochberg's work to the attention of a wider audience by offering a selection of his key works many taken from out of print or relatively inaccessible sources To facilitate the understanding of his accomplishment and of what his work has to offer to contemporary researchers and theorists in visual perception we include commentaries on salient aspects of his work by 20 noted researchers In the Mind's
