Minds Matter An Intellectual Biography:

Charles de Bovelles, 1479-1553 Joseph M. Victor, 1978 Descartes: An Intellectual Biography Stephen Gaukroger, 1995-03-30 Descartes is one of the greatest of all thinkers Modern philosophy is generally taken to begin with him His unique contribution to Western thought covers not only philosophy but also science and mathematics his studies in mechanics and optics have provided modern science with tools still used and work still built on today This is the first intellectual biography of Descartes in English Stephen Gaukroger traces his intellectual development from childhood establishes the connections between his intellectual and personal life and placing these in the context of the cultural environment of the time offers a fundamental reassessment of all aspects of his life and work It is usually assumed that there is a little development in Descartes thought but this biography shows evidence of very significant changes of view and a general shift in his concern away from natural philosophy following the condemnation of Galileo by the Church in 1633 Starting with a full account of Descartes early scientific work Dr Gaukroger shows how it informed and influenced his later philosophical studies On this new view Descartes philosophical work was meant not a self contained exercise in epistemology and scepticism but rather as a defence of his physical doctrines against a hostile Church This book allows for the first time a full understanding of Descartes ideas in the context of his life and times It will be welcomed by all readers interested in the origins of modern thought

An Intellectual History of Psychology Daniel N. Robinson, 1995-09-01 An Intellectual History of Psychology already a classic in its field is now available in a concise new third edition It presents psychological ideas as part of a greater web of thinking throughout history about the essentials of human nature interwoven with ideas from philosophy science religion art literature and politics Daniel N Robinson demonstrates that from the dawn of rigorous and self critical inquiry in ancient Greece reflections about human nature have been inextricably linked to the cultures from which they arose and each definable historical age has added its own character and tone to this long tradition An Intellectual History of Psychology not only explores the most significant ideas about human nature from ancient to modern times but also examines the broader social and scientific contexts in which these concepts were articulated and defended Robinson treats each epoch whether ancient Greece or Renaissance Florence or Enlightenment France in its own terms revealing the problems that dominated the age and engaged the energies of leading thinkers Robinson also explores the abiding tension between humanistic and scientific perspectives assessing the most convincing positions on each side of the debate Invaluable as a text for students and as a stimulating and insightful overview for scholars and practicing psychologists this volume can be read either as a history of psychology in both its philosophical and aspiring scientific periods or as a concise history of Western philosophy s concepts of human nature

The Body, Self-Cultivation, and Ki-Energy Yasuo Yuasa, 1993-01-01 This book is an inquiry into ki energy its role within Eastern mind body theory and its implications for our contemporary Western understanding of the body Yuasa examines the concept of ki energy as it has been used in such areas as acupuncture Buddhist and Taoist meditation and the martial arts To explain the achievement of mind body oneness in these traditions he offers an innovative schematization of the lived body His approach is interdisciplinary and cross cultural offering insights into Western philosophy religion medical science depth psychology parapsychology theater and physical education To substantiate the relationship that ki energy forms between the human body and its environment Yuasa introduces contemporary scientific research on ki energy in China and Japan as well as evidence from acupuncture medicine and from the experience of meditators and martial arts practitioners This evidence requires not only a rethinking of the living human body and of the mind body and mind matter relation but also calls into question the adequacy of the existing scientific paradigm Yuasa calls for an epistemological critique of modern science and explores the issue of the relation of teleology to science

Panpsychism in the West, revised edition David Skrbina, 2017-09-22 An updated edition of a comprehensive study of the theory that mind exists in some form in all living and nonliving things In Panpsychism in the West the first comprehensive study of the subject David Skrbina argues for the importance of panpsychism the theory that mind exists in some form in all living and nonliving things in consideration of the nature of consciousness and mind Panpsychism with its conception of mind as a general phenomenon of nature uniquely links being and mind More than a theory of mind it is a meta theory a statement about theories of mind rather than a theory in itself Panpsychism can parallel almost every current theory of mind it simply holds that no matter how one conceives of mind such mind applies to all things After a brief discussion of general issues surrounding philosophy of mind Skrbina examines the panpsychist views of philosophers from the pre Socratics to the post structuralists The original edition of Panpsychism in the West helped to reinvigorate a neglected and important aspect of philosophic thinking This revised edition offers expanded and updated material that reflects the growth of panpsychism as a subdiscipline It covers the problem of emergence of mind from a non mental reality and the combination problem in greater detail It offers expanded coverage of the pre Socratics and Plato a new section on Augustine expanded discussions of Continental panpsychism scientific arguments Nietzsche and Whitehead and a new section on Russellian monism With this edition Panpsychism in the West will be continue to be the standard work on the topic

Intellectual History & Modern Thought Dr. Vijay Gaibi More, 2025-05-13 *Intellectual History Modern Thought* is an interdisciplinary academic text that examines the progression of human ideas and philosophies from antiquity to the twenty-first century. Structured into eight thematic chapters, the book provides an accessible yet in-depth analysis of the world's major intellectual traditions, key thinkers, and the socio-historical contexts in which their ideas emerged. Beginning with the foundations of intellectual history and methodological approaches, the book moves chronologically through classical philosophy, the Enlightenment, Romanticism, and the development of modern social theories. It further explores influential twentieth-century currents such as existentialism, psychoanalysis, and structuralism, concluding with postmodern critiques and contemporary global perspectives. The book gives equal importance to Western and non-Western traditions, including discussions on Gautam Buddha, Mahatma Gandhi, and Dr. B. R. Ambedkar. Themes such as scientific rationality, secular morality, social justice, feminism, postcolonialism, and environmental ethics are thoughtfully addressed, offering a truly global and inclusive view of intellectual development. Designed primarily for readers of philosophy, history, political science, sociology, and cultural studies, *Intellectual History Modern Thought* is ideal for undergraduate and postgraduate curricula. The Interval Rebecca Hill, 2014-11-14 The Interval offers the first sustained analysis of the concept grounding Irigaray's thought the constitutive yet incalculable interval of sexual difference In an extension of Irigaray's project Hill takes up her formulation of the interval as a way of rereading Aristotle's concept of topos and Bergson's concept of duration Hill diagnoses a sexed hierarchy at the heart of Aristotle's and Bergson's presentations Yet beyond that phallocentrism she points out how Aristotle's theory of topos as a sensible relation between two bodies that differ in being and Bergson's intuition of duration as an incalculable threshold of becoming are indispensable to the feminist effort to think about sexual difference Reading Irigaray with Aristotle and Bergson Hill argues that the interval cannot be grasped as a space between two identities it must be characterized as the sensible threshold of becoming constitutive of the very identity of beings The interval is the place of the possibility of sexed subjectivity and intersubjectivity the interval is also a threshold of the becoming of sexed forces
