Associating ice masses with the transport and deposition of sediments has long formed a central theme in glaciology and glacial geomorphology The reason for this focus is clear in that ice masses are responsible for much of the physical landscape which characterizes the Earth s glaciated regions This association also holds at a variety of scales for example from the grain size characteristics of small scale moraines to the structural architecture of large scale glacial sedimentary sequences in both surface and subaqueous environments This volume brings numerous state of the art research contributions together each relating to a different physical setting spatial scale process or investigative technique The result is a diverse and interesting collection of papers by glaciologists numerical modellers and glacial geologists which are all linked by the theme of investigating the relationships between the behaviour of ice masses and their resulting sedimentary sequences *Ocean Mining Report* ,1965 *Energy, Mineral, and Ground-water Resources of Carbon and Emery Counties, Utah* R. W. Gloyd, D.E. Tabet, B.T. Tripp, C.E. Bishop, C.D. Morgan, J.W. Gwynn, R.E. Blackett, 2003 This report provides information for use in both short and long term land planning decisions particularly at the county level and an indication of the present and future economic impact of mineral and energy development The report discusses eight major commodity groups 1 oil and gas 2 coal and coal resin 3 coal bed methane 4 other energy resources oil impregnated rock oil shale geothermal 5 uranium and vanadium 6 metallic minerals 7 industrial rocks and minerals and 8 ground water resources In general for each group or commodity within a group the following aspects are discussed 1 known occurrences and characteristics 2 past production

and trends 3 current production and exploration activity and 4 geologic potential Plates accompany each of the major commodity groups and show the locations of known resources and areas of geologic potential In addition to the commodity discussions the report contains a brief summary of land ownership status and concludes with a summary of commodities having the best potential for discovery and development 161 pages 14 plates U.S. Geological Survey Circular ,1984
