Gwynn,R.E. Blackett,2003 This report provides information for use in both short and long term land planning decisions particularly at the county level and an indication of the present and future economic impact of mineral and energy development The report discusses eight major commodity groups 1 oil and gas 2 coal and coal resin 3 coal bed methane 4 other energy resources oil impregnated rock oil shale geothermal 5 uranium and vanadium 6 metallic minerals 7 industrial rocks and minerals and 8 ground water resources In general for each group or commodity within a group the following aspects are discussed 1 known occurrences and characteristics 2 past production and trends 3 current production and exploration activity and 4 geologic potential Plates accompany each of the major commodity groups and show the locations of known resources and areas of geologic potential In addition to the commodity discussions the report contains a brief summary of land ownership status and concludes with a summary of commodities having the best potential for discovery and development 161 pages 14 plates *Surface Mining Operations in Oil Sands* C. A. Poveda,M. G. Lipsett,2014-07-23 The creation of the World Commission on Environment and Development WCED commonly known as the Brundtland Commission and the publication in 1987 of its report Our Common Future marked a turning point towards finding the balance among society economy and environment Since then governments have improved regulations new standards have been developed management and process practices have addressed potential gaps public and private organisations have taken initiative through the creation of committees and programs and research covering all areas of sustainable development has become a priority for academics and practitioners These different sources serve as the basis for a pre selection process of sustainable development indicators SDIs While some sources do not specifically address certain industries the pre selection process suggested in this book studies and analyses each SDI s resource and the possible applicability of already identified indicators An assertive set of SDIs is not solely based on regulatory systems as measuring sustainability cannot become a bureaucratic process and neither can any other SDI s source single handedly determine or mandate the final set of indicators as the real objective is to assist decision makers and effectively engage stakeholders This book presents an analysis of six different sources for pre selecting SDIs accompanied by a methodology to then finalise with a set of SDIs for the surface mining operations in oil sands projects Surface mining projects are complex operations with several social economic environmental and health impacts As the government and oil sands developers are turning towards increasing productivity with a more conscious sustainable development approach a pre selection of SDIs is required to assist further formal multi criteria
