Bridgland,Andy Howard,Mark J. White,Tom S. White,2014-03-31 This volume is an integrated overview and synthesis of available data relating to the Quaternary evolution of the River Trent It provides detailed descriptions of the Pleistocene sedimentary records from the Trent its tributaries and related drainage systems a sedimentary record that spans a period of approximately half a million years and the biostratigraphical and archaeological material preserved therein Significant new data are presented from recently discovered sites of geological and archaeological importance including previously unrecognised fluvial deposits as well as novel analyses such as mathematical modelling of fluvial incision as recorded by the river terrace deposits In combination with a thorough review of the literature on the Trent these new data have contributed to revised chronostratigraphical and palaeogeographical frameworks for central England and revealed the complexity of the Pleistocene fluvial and glacial records in this region The fragmentary Trent terrace sequence is an important element of wider reconstructions of Pleistocene palaeodrainage in Britain providing a link between the records preserved in the English Midlands and those in East Anglia      *Utah Statewide Wilderness Study Report* ,1991      1989 *Annual Report on Alaska's Mineral Resources* ,1989      *Fatal Workplace Injuries in 2001: A Collection of Data and Analysis, Report 970, September 2003* ,2003      **Subject Index to Unclassified ASTIA Documents** Defense Documentation Center (U.S.),1960      **Journal of the Society of Arts** Royal Society of Arts (Great Britain),1880      **Geology of the Country Around Diss** S.
