Mineral Assessment Report 138 The Sand :

Mineral Assessment Report ,1983 **Aboriginal Consultation, Environmental Assessment, and Regulatory Review in Canada** Kirk N. Lambrecht,2013 Supreme Court of Canada decisions have defined a general framework for the duty to consult Aboriginal peoples and accommodate their concerns over natural resource development but anticipate the details of that framework will be expanded upon in the future Aboriginal Consultation Environmental Assessment and Regulatory Review in Canada offers a paradigm that advances that discussion It proposes an integrated and robust planning model for natural resource planning model for natural resource extraction allowing Aboriginal peoples industry governments tribunals and the Courts to all make contributions to reconciliation in the context of sustainable development and environmental protection Kirk Lambrecht surveys the law of actual and asserted Aboriginal rights and historical and modern Treaty rights in Canada and discusses the national and international purposes of environmental assessment and regulatory review He appraises the fundamental principles of Supreme Court of Canada jurisprudence defining aboriginal consultation and accommodation as a constitutional imperative and uses case studies involving the National Energy Board to demonstrate how integrated process has evolved over time Finally he offers general conclusions on the practical utility and outstanding challenges involving an integrated planning paradigm Report of the State Geologist California. Report of the State Mineralogist ,1923 *Monthly Chapter of Report ... of the State Mineralogist Covering Mining in California and the Activities of the State Mining Bureau* ,1922 *Quaternary of the Trent* David R. Bridgland,Andy Howard,Mark J. White,Tom S. White,2014-03-31 This volume is an integrated overview and synthesis of available data relating to the Quaternary evolution of the River Trent It provides detailed descriptions of the Pleistocene sedimentary records from the Trent its tributaries and related drainage systems a sedimentary record that spans a period of approximately half a million years and the biostratigraphical and archaeological material preserved therein Significant new data are presented from recently discovered sites of geological and archaeological importance including previously unrecognised fluvial deposits as well as novel analyses such as mathematical modelling of fluvial incision as recorded by the river terrace deposits In combination with a thorough review of the literature on the Trent these new data have contributed to revised chronostratigraphical and palaeogeographical frameworks for central England and revealed the complexity of the Pleistocene fluvial and glacial records in this region The fragmentary Trent terrace sequence is an important element of wider reconstructions of Pleistocene palaeodrainage in Britain providing a link between the records preserved in the English Midlands and those in East Anglia California Journal of Mines and Geology ,1922 The Environmental Behaviour of Uranium IAEA,2023-07-10 This publication is one of the series of IAEA publications on the environmental behaviour of naturally occurring radionuclides It outlines uranium behaviour in different environments as well as its transfer to and

metabolism in humans The publication also provides concepts models and data required for the assessment of the impacts of uranium on non human biota Assessing the environmental and health effects of uranium poses specific challenges because of the combination of different types of hazard and potential exposures Therefore both the radiotoxicity and chemical toxicity of uranium are considered in this publication
