Modern Industrial Marketing:

Modern Industrial Marketing George Risley, 1972-01-01 *Class & Industrial Marketing*, 1927 *Industrial Marketing Research (RLE Marketing)* Nicholas Stacey, Aubrey Wilson, 2014-09-15 The book provides a comprehensive analysis of the techniques and mechanics of the research process and the management implications of industrial marketing research. It reveals not only how to do marketing research but also the full range of its profitable applications and shows how to develop an internal department and how to buy industrial marketing research. When originally published this was the first book to be published in the UK or USA devoted solely to the important modern management tool of industrial marketing research.

The first words of Aubrey Wilson's introduction to this book emphasise the importance and relevance of industrial marketing to everyone connected with industry. He goes on to stress the need to set industrial marketing into a wider perspective and at the same time to provide for the urgent requirements of students for a basic authoritative book. Each chapter with one exception is an original contribution especially commissioned for the book which has been devised and edited as an integrated work. The editor comments that there can be few if any people who are able to write with equal authority on each function of marketing. He has therefore invited eighteen leaders in their own particular function to contribute to this book. It immediately establishes itself as a standard work. This is a must read for students of marketing and business management. Management Aids for Small Manufacturers United States. It concentrates on the techniques of industrial marketing research and devotes a chapter to each major method. More space is also given to the mechanics of research. The author's purpose has been to set out clearly the salient factors and methodologies. Chapter demographics refer the reader to more detailed or advanced reading on any particular aspect of industrial marketing. The book is essentially practical and contains an important innovation.
