Home Dyeing with Natural Dyes Margaret Smith Furry, Bess Viemont Morrison, 1935 The publication reports the results of tests on about 65 natural dye materials when used for dyeing cotton and wool cloth Most of the dyes studied are of vegetable origin In fact the terms natural and vegetable dyes are often used interchangeably though a few such as cochineal are of animal origin and iron buff and some others are developed from mineral pigments **Home Dyeing with Natural Dyes** Margaret Smith Furry, Bess Viemont Morrison, 1973 *Journeys in Natural Dyeing* Kristine Vejar, Adrienne Rodriguez, Sarah Ollickalla Jones, 2020-10-13 Beautifully written as part travel memoir and part dyeing handbook you are handed a wealth of knowledge in one book Little Acorn Creations Similar to cooking and the act of sharing meals our relationship to textiles is a core tenet of our human experience Creating textiles cultivates connection belonging community and friendships among people In the world of textiles natural dyeing is the closest we come to the act of cooking Journeys in Natural Dyeing shares the story of Kristine Vejar and Adrienne Rodriguez's travels to four countries Iceland Mexico Japan and Indonesia where they visited natural dyers who use locally sourced dyes to create textiles that evoke beauty a connection to their environment and showcase their mastery of skill This book shares their process of using their own locally grown dyes and includes recipes and projects to create more than 400 shades of color In addition you will learn how to use your own natural environment to create deep beautiful colors No matter where you live creating color naturally is possible *Home Dyeing With Natural Dyes (Classic Reprint)* Margaret Smith Furry, 2017-11-20 Excerpt from Home Dyeing With Natural Dyes The fastness or permanence Of a dye IS important but no dye is absolutely fast under all conditions It may be fast to light or to perspiration or to washing but not fast to all three Furthermore a dye may be fast on one fiber and not on another or it may be fast when dyed by one method and not fast when dyed by another Of all the textile fibers wool can be dyed most

easily and the resulting colors change the least It combines with practically all dyes probably forming a chemical union with them Cotton does not combine with dyes so well and fast colors are produced on it only by complicated processes The need for a particular kind Of fastness depends on the nature of the color change and the use to be made Of the dyed fabric For example a fabric dyed brown with tree bark may darken on exposure to light If used in a hooked rug this color change might be satis factory but on the other hand in window draperies it would soon become Objectionable TO make sure that the recipes given on pages 8 to 35 produce colors permanent enough to be useful for most purposes the dyed fabrics were tested for their fastness _to light and to washing by the following methods The results are included in the dye recipes For the light test samples Of the dyed fabrics were cut and exposed for 40 hours to the rays Of a carbon arc lamp Throughout the test period half Of each piece was shielded from the light while the rays Of the lamp shone directly on the other half Then the two parts were compared and the fastness to light rated as follows Good no appreciable change Of color fair appreciable but not Objectionable change Of color poor Objectionable change Of color Though these light tests were run in a standard fading apparatus the same method can be followed at home by exposing samples to the sunlight Cut 2 inch square openings in each Of two pieces Of heavy cardboard fasten a piece Of the dyed cloth to one with gummed paper and cover with the other piece Of cardboard so that the openings correspond It is important that the light come through the fabric Then place this1 sample in its frame out Of doors in the direct sunlight and tilted towards the sun After a few days remove and compare the section exposed to the sun with the covered portion About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
