

# Functional grammar of Nunggubuyu

---

Jeffrey Heath

This book is a functional grammar of Nunggubuyu, a language of the north-western region of Australia. It is a member of the Gunwinyean family, which is part of the larger Pama-Nyungan family. The book is written by Jeffrey Heath, who is a linguist and has written several books on Australian languages. The book is a functional grammar, which means that it describes the grammar of the language in terms of its functions. The book is divided into two main parts: a description of the grammar and a description of the discourse. The first part describes the grammar in terms of its components, such as the noun, the verb, and the sentence. The second part describes the discourse in terms of its components, such as the topic, the focus, and the style. The book is written in a clear and concise style, and it is a valuable resource for linguists and students of Australian languages.

The Lexical Typology of Semantic Shifts Päivi Juvonen, Maria Koptjevskaja-Tamm, 2016-08-08 The volume focuses on

semantic shifts and motivation patterns in the lexicon Its key feature is its lexico typological orientation i e a heavy emphasis on systematic cross linguistic comparison The book presents current theoretical and methodological trends in the study of semantic shifts and motivational patters based on an abundance of empirical findings across genetically areally and typologically diverse languages      Catching Language Felix K. Ameka, Alan Dench, Nicholas Evans, 2008-08-22 Descriptive grammars are our main vehicle for documenting and analysing the linguistic structure of the world s 6 000 languages They bring together in one place a coherent treatment of how the whole language works and therefore form the primary source of information on a given language consulted by a wide range of users areal specialists typologists theoreticians of any part of language syntax morphology phonology historical linguistics etc and members of the speech communities concerned The writing of a descriptive grammar is a major intellectual challenge that calls on the grammarian to balance a respect for the language s distinctive genius with an awareness of how other languages work to combine rigour with readability to depict structural regularities while respecting a corpus of real material and to represent something of the native speaker s competence while recognising the variation inherent in any speech community Despite a recent surge of awareness of the need to document little known languages there is no book that focusses on the manifold issues that face the author of a descriptive grammar This volume brings together contributors who approach the problem from a range of angles Most have written descriptive grammars themselves but others represent different types of reader Among the topics they address are overall issues of grammar design the complementary roles of outsider and native speaker grammarians the balance between grammar and lexicon cross linguistic comparability the role of explanation in grammatical description the interplay of theory and a range of fieldwork methods in language description the challenges of describing languages in their cultural and historical context and the tensions between linguistic particularity established practice of particular schools of linguistic description and the need for a universally commensurable analytic framework This book will renew the field of grammaticography addressing a multiple readership of descriptive linguists typologists and formal linguists by bringing together a range of distinguished practitioners from around the world to address these questions      *Routledge Library Editions: Linguistics Mini-set F: World Languages* Various Authors, 2021-05-13 RLE Linguistics Mini set F gathers together a collection of out of print titles on World Languages These essential works all from key international linguists include Australian Aboriginal Grammar The Northwest Caucasian Languages Plains Cree Morphosyntax Object and Absolutive in Halkoelem Salish and The Correct Language Tojolabal      **Australian Aboriginal Grammar (RLE Linguistics F: World Linguistics)** Barry Blake, 2014-01-10 This study covers a number of topics that are prominent in the grammars of Australian Aboriginal languages especially ergativity and manifestations of the hierarchy that runs from the speech act participants down to inanimates This hierarchy shows up in case marking number marking and agreement advancement and cross referencing Chapter 1 provides an overall picture of Australian languages Chapters 2 3 and 4 deal with case systems

including voice alternations and other advancements Chapter 5 deals with the distribution of case marking within the noun phrase Chapter 6 deals with systems that allow the cross referencing of bound pronouns Chapter 7 deals with clauses which appear to have more than one verb Chapter 8 deals with compound and complex sentences Chapter 9 deals with word order and emphasises a theme introduced in Chapter 5 namely the widespread use of discontinuous phrases Chapter 10 draws together ergativity and various manifestations of the hierarchy and attempts to interpret their distribution The final section provides an interesting hypothesis about the evolution of core grammar in Australia

**Verb Classification in Australian Languages** William B. McGregor, 2013-06-10 This book deals with systems of verb classification in Australian Aboriginal languages with particular focus on languages of the north west It proposes a typology of the systems according to their main formal and semantic characteristics It also makes some proposals concerning the historical origins and grammaticisation of these systems and suggestions regarding the grammatical relations involved In addition an attempt is made to situate the phenomenon of verb classification within the context of related verbal phenomena such as serial verb constructions nominal incorporation and complex predicates

**Focality and Extension in Kinship** Warren Shapiro, 2018-04-20 When we think of kinship we usually think of ties between people based upon blood or marriage But we also have other ways nowadays called performative of establishing kinship or hinting at kinship many Christians have in addition to parents godparents members of a trade union may refer to each other as brother or sister Similar performative ties are even more common among the so called tribal peoples that anthropologists have studied and especially in recent years they have received considerable attention from scholars in this field However these scholars tend to argue that performative kinship in the Tribal World is semantically on a par with kinship established through procreation and marriage Harold Scheffler long time Professor of Anthropology at Yale University has argued by contrast that procreative ties are everywhere semantically central i e focal that they provide bases from which other kinship ties are extended Most of the essays in this volume illustrate the validity of Scheffler s position though two contest it and one exemplifies the soundness of a similarly universalistic stance in gender behaviour This book will be of interest to everyone concerned with current controversy in kinship and gender studies as well as those who would know what anthropologists have to say about human nature The study of kinship once ruled the discipline of anthropology and Hal Scheffler was one of its magisterial figures This volume reminds us why Scheffler s powerful analyses of kinship systems often conflicted with the views of his more relativist contemporaries He cut through the fog of theory to emphasise the human essentials namely the importance of the social bonds rooted in motherhood and fatherhood Anthropology in its decades long retreat from the serious study of kinship has lost a great deal This volume points the way to a restoration Peter Wood National Association of Scholars
