The Development of the Japanese Nursing Profession Aya Takahashi, 2004. This book tells the story of Florence Nightingaleism in Japan showing how Japanese nursing developed from 1868 to the present.

The London County Council Gazette, 1909. *Nursing before Nightingale, 1815-1899* Carol Helmstadter, Judith Godden, 2016-05-23. *Nursing Before Nightingale* is a study of the transformation of nursing in England from the beginning of the nineteenth century until the emergence of the Nightingale nurse as the standard model in the 1890s. From the nineteenth century on, historians have considered Florence Nightingale with her training school established at St Thomas's Hospital in 1860 the founder of modern nursing. This book investigates two major earlier reforms in nursing: a doctor-driven reform which came to be called the ward system and the reforms of the Anglican Sisters known as the central system of nursing. Rather than being the beginning of nursing reform, Nightingale nursing was the culmination of these two earlier reforms.

Nurses of Australia Deborah Burrows, 2018-11-01. From the First Nation caregivers who healed, birthed, and nursed for millennia to the untrained and ill-equipped convict men and women who cared for the sick in the fledgling colony of New South Wales, nursing has been practised in Australia since the beginning. It would take the arrival of a group of dedicated Irish nuns followed by Florence Nightingale-trained nurses and decades of constant and continuing campaigning to transform nursing into what it is today: the most trusted profession in Australia. Nurses will recognise their own lived experience in stories about training days, nurses' quarters, changing uniforms, changing roles, the arrival of male nurses, and current pathways to nursing. Produced in collaboration with the Australian College of Nursing and the Congress of Aboriginal and Torres Strait Islander Nurses and Midwives, with additional information provided by the Australian Nursing and Midwifery Federation, this is the story of nursing in Australia.

Secondary Sources in the History of Canadian Medicine Charles G. Roland, Jacques Bernier, 2010-11-22. Volume Two of this retrospective bibliography is both a continuation and an expansion of Volume One, 1984. It contains references to Canadian medical historical literature published between 1984 and 1998 and also includes much additional material published prior to 1984. Finally, it substantially enlarges the content of French language material. Every effort has been made to be as inclusive as possible of articles, theses, book chapters, and books both in English and in French relating to the history of medicine. No single electronic source can replace this bibliography. The contents are divided into three sections. The first is a listing of material expressly biographical. Section two lists material under a wide variety of subject headings related to medicine, and the third is a complete listing of the authors who have contributed these articles. Simply organized and easy to use, this bibliography will be of value to historians, archivists, librarians, and anyone interested in the history of medicine.
