## **Nursing Knowledge Practice:**

*Nursing Knowledge and Theory Innovation* Pamela G. Reed, Nelma B. Crawford Shearer, 2011-02-18 This is an excellent addition to the nursing theory literature and one that focuses on the needs of the new DNP role and knowledge development. As the preface states it encourages the development of theory for practice in practice and could help to close the divide that exists between theorists, researchers, academics and practice. Score 97 5 stars Doody's. The current paradigm of nursing knowledge suggests theory is developed outside of practice then handed down to the practitioner to practice. This unique text is for students and faculty at the DNP level to engage in developing nursing theory in order to directly guide and improve practice. The content in this book provides strategies for scholarly practice as well as theories for students to develop or modify to fit into their own practice. This book guides students in learning to think in a new way about nursing theory development as it relates to nursing practice. This book provides graduate nursing students with a guide for practice, presents new perspectives and insights that may arise from frustrating clinical problems and gives students the opportunity to rethink and reformulate existing theory. Key Features: Provides teachers and nursing students with information about the development and use of theory to improve nursing practice. Includes glossary of key terms for reference. Presents discussion questions and activities to stimulate thinking. Identifies reflection points in selected chapters to help students assimilate the content and relate it to their own work.

**Nursing Knowledge** Mark Risjord, 2011-08-26 Nurses who conduct research have a longstanding interest in questions of nursing knowledge. *Nursing Knowledge* is a clear and well-informed exposition of the philosophical background to nursing theory and research. *Nursing Knowledge* answers such fundamental questions as: How is nursing theory related to nursing practice? What are the core elements of nursing knowledge? What makes nursing research distinctive as nursing research? It examines the history of the philosophical debates within nursing, critiques the arguments, explains the implications and sets out to rethink the philosophical foundation of nursing science. *Nursing Knowledge* begins with philosophical problems that arise within nursing science. It then considers various solutions with the help of philosophical ideas, arguing that nurses ought to adopt certain philosophical positions because they are the best solutions to the problems that nurses encounter. The book argues that the nursing standpoint has the potential to disclose a more complete understanding of human health than the common disease and dysfunction views. Because of the relationship to practice, nursing science may freely draw theory from other disciplines and nursing practice unifies nursing research. By redefining theory and philosophy with a new philosophical perspective on nursing science, the so-called relevance gap between nursing theory and practice can be closed. The final chapter of the book redraws the map to create a new picture of nursing science based on the following principles: Problems of practice should guide nursing research. Practice and theory are dynamically related. Theory research must provide the knowledge base necessary for nurse interventions, training, patient education, etc. Nursing research should develop midrange theories and its results are nursing theory. is

strengthened when it uses theories confirmed by is integrated with other disciplines Key features Clear and accessibly written Accurate and philosophically well informed Discusses philosophical problems in contexts familiar to nurses Systematically examines the philosophical issues involved in nursing research Examines epistemology how we know what we know theory development and the philosophical foundations of scientific methodology Develops a new model of nursing knowledge Dr Mark Risjord is Associate Professor in Philosophy at Emory University and has a faculty appointment in the Nell Hodgson Woodruff School of Nursing His main research areas have been in the philosophy of social science and the philosophy of medicine He was invited to has been teaching philosophy of science and theory development in the new PhD program in the Nell Hodgson School of Nursing at Emory University insince 1999 He has been awarded two competitive teaching prizes Emory Williams Distinguished Teaching Award 2004 and the Excellence in Teaching Award 1997 He is presently serving as the Masse Martin NEH Distinguished Teaching Chair 2006 2010
