Signs of Life Graeme Harper, Andrew Moor, 2005 Signs of Life: Medicine and Cinema is the first single volume to consider the cinematic representation of medicine, medical science and the medical profession and explores the political implications of the representations of doctors, nurses, patients, diseases and disabilities. The essays in this collection from a wide range of film scholars and medical practitioners also consider how formal qualities of cinema such as empirical observation, mise en scène, propaganda and education, melodrama, documentary and narrative construction impact on our understanding of medical procedures and the public image of medicine. *Media and Health* Clive Seale, 2003-01-17 This book appears to fill a substantial gap in the literature at present. There are quite simply no books available which engage seriously and competently with the presentation of health issues in the media and certainly none which focuses on representations of health and illness in as thematically coherent a manner as Seale proposes to do. Richard Gwyn, University of Cardiff. This is an excellent resource for students. It provides a comprehensive review of secondary literature in the field and is very well researched. Students of sociology of health and illness and in media and communication studies will find the book invaluable. David Oswell, Goldsmiths College, University of London. This is a comprehensive work on media health providing an invaluable toolkit for understanding health and the media in contemporary society. their work with and for the marginalised and disenfranchised It is time for the profession to gain more critical analytical and practical knowledge of visual culture and communication in order to use and create images in accordance with its central principle of social justice That requires an understanding of them beyond representation As important as this is it is also where the profession s scholarly work in this area has remained and halted and thus understanding of the work of images in our practices is limited In order to more fully understand images and their effects both ideologically and experientially social workers need to bring to bear other areas of study such as reception studies visual phenomenology and the gaze These other analytical frames enable a consideration not only of images per se but also of their effect on the viewer the human spectators and the subjects at the heart of Social Work By bringing understandings and experiences in Film Media and Communications Visual Communication for Social Work Practice provides the reader with a wide range of critically analytical frames for practitioners activists educators and researchers as they use and create images This invites a deeper knowledge and familiarity with the power dimensions of the image thus aligning with the social justice dimension of Social Work Examples are provided from cinema popular media but more importantly from Social Work practitioners themselves to demonstrate what has already been made possible as they create and use images to further the interpersonal communal and justice dimensions of their work This book will be of interest to scholars students and social workers particularly those with an interest in critical and creative methodologies
