Competence-Based Assessment Wolf, Alison, 1995-01-01 Competence based assessment is the cornerstone of the UK Government's reforms of vocational training and of non academic full time education post 16 Australia has adopted similar policies and there is considerable interest in the notion of competence in both Europe and North America Alison Wolf describes the main characteristics of the competence based approach as it has emerged in the UK and traces its origins in American experimental programmes of the 1970s The arguments for the approach are discussed in detail Many of these arguments derive from the demonstrable limitations of more conventional assessment especially in predicting work performance She then analyses the theoretical assumptions which competence based assessment shares with the criterion referenced movement as a whole distinguishing clearly between those claims which can be sustained and those which cannot She also synthesizes the growing body of evidence on implementation Many lessons have now been learned about whether and how one can establish a workable robust and reliable competence based system It has become evident both that the preconditions for success are often missing and that if they are ignored competence based reforms may have largely negative consequences The final chapter reviews the prospects for competence based awards and offers some conclusions on what is essential to a competence based approach **The**

Competency Management in the Public Sector Instituut voor de Overheid, 2002 Annotation Competency Management is increasingly being adopted as an approach to HRM in both the private and public sectors This book will be of interest to both practitioners and academics as it

seeks to inform the reader about the practice of competency management in European public services. It throws light on the origins and meanings of the concept and traces the competency movement from the 1980s in the UK and USA. It links competency management to performance management and HRM and demonstrates how a competency approach can add value to all parts of an organisation. The nine country studies provide a rich insight into the practices found across the public sectors of Europe. At one end of the spectrum is Britain with its holistic approach to competency management in the Senior Civil Service and widespread use throughout the rest of the service. Belgium, the Netherlands and Finland provide further examples of recent developments and good practice. In France and Germany however competency management has only just appeared on the reform agenda and the reasons for this are identified. Micro studies in Italy and Sweden provide an insight into the problems that arise when the perceptions of reformers diverge from those of managers and managed while the study of Poland shows the problems faced by countries in transition which lack an appropriate educational sub structure for public management and HRM.

Towards a Competent Workforce Bob Mansfield, Lindsay Mitchell, 1996. For over a decade the UK has been engaged in a radical reform of its vocational education and training. This book contains the first comprehensive description of Functional Analysis, the method developed to define occupational standards and National Vocational Qualifications. It also discusses changes in contemporary work patterns, arguing that a new model of occupational competence is needed: the Job Competence Model. The text is in four parts covering strategy, models and methodologies and how to apply them in practice. Both authors have both been closely associated with the methods and models described in the book and their personal insights add enormously to the value of the material.
