psychology is increasingly diversified pluralistic and specialized and most psychologists venture beyond the confines of their substantive specialty only rarely Yet psychologists with different specialties encounter similar problems ask similar questions and share similar concerns Unfortunately there are very few arenas available for the expression or exploration of what is common across psychological subdisciplines The Crosscurrents in Contemporary Psychology series is intended to serve as such a forum The chief aim of this series is to provide integrated perspectives on supradisciplinary themes in psychology Despite its contemporary diversity and high degree of specialization psychology embraces many phenomena that are of interest across subdisciplines largely because of the generality and ubiquity of those phenomena The sensitive period is one Sensitivity to different kinds of experience varies over the life cycle of an organism

**The Clinical Management of Nicotine Dependence** James A. Cocores, 2012-12-06 The 1980s have seen a remarkable degree of public and professional acceptance of cigarette smoking as the most widespread and devastating form of drug dependence More medical schools now give required courses about drug dependence Prestigious journals publish reports of investigations on the subject of nicotine dependence and more conferences and workshops are held each year on various aspects of nicotine dependence All this is in sharp contrast to the earlier prevailing atmosphere of disinterest ignorance or professional disdain These changes created an obvious place for a textbook oriented primarily toward the needs of clinicians working with patients who have nicotine dependence Thus in preparation of this book most aspects of the management of nicotine dependence are incorporated in order to address concerns of physicians in training and other health care professionals across the world The final product which I believe to be comprehensive and clinically relevant throughout is a text that I hope will be of equal use to psychologists social workers nurses counselors and physicians in all specialties An encyclopedic treatise was deliberately avoided because that approach can be cumbersome in size readability and cost and for that reason readers will find little mention of data involving animal research nicotine related politics nicotine product advertising medical consequences of smoking psychotherapeutic techniques and the extent of the problem

**Stateless** Elizabeth Wein, 2023-03-14 When a teen pilot witnesses a plane deliberately knocked out of the sky in what is supposed to be a friendly international air race she must unravel the mystery before becoming a victim herself A stunning new historical thriller from New York Times bestselling Elizabeth Wein Europe 1937 Stella North who has learned to fly planes as a teen has the opportunity to participate in a race across Europe for a hefty sum of prize money The race is billed by its eccentric organizer Lady Frith as the Circuit of Nations Olympics of the Air and is designed to promote peace and sport among Europe's young pilots entrants must be under the age of 21 Europe pre WWII is an unsettled and dangerous place civil war is raging in Spain Hitler is in power in Germany Italy has embraced Fascism and in the Soviet Union anyone who speaks out against the government is ruthlessly imprisoned and executed The air race is going to be an unusual propaganda event for many of the participants Stella needs to be careful as she navigates her way across Europe's troubled skies not least because of her own family background her parents were

murdered during the Russian Revolution and her aunt and uncle fled to Britain with her when she was only three. Nevertheless, she is shocked when she witnesses one of the race's participants using his plane to ram another pilot out of the sky. Early evidence points to the sullen and enigmatic French pilot Tony Roberts, but he also claims that his own plane has been sabotaged. As events unfold, further evidence points to Stella herself. To outside eyes, it appears that she may be attempting to get rid of a competitor and pushing the blame onto her fellow racers. It's up to Stella to unravel the mystery before she becomes the assassin's next victim.
