Pioneer Naturalists:

Pioneer Naturalists Howard Ensign Evans, 1994 Looks at the early study of North American wildlife describes various species and discusses the first naturalists to identify them Pioneer Naturalists. (No. 2). Maria Merian, (*Pioneer Naturalists. No.5*). J.J. Audubon, *Naturalists of the Frontier [Second Edition]* Dr. Samuel Wood Geiser, 2018-03-12 This acclaimed study of the history of scientific exploration in the Southwest from renowned biologist Dr Samuel Wood Geiser first published in its present revised edition in 1948 would be of interest to many types of readers For those who love stories of adventure and struggle it narrates the lives and varying fates of men who lived under strange and difficult conditions and who met those conditions some with heroic resolution and resourcefulness some with fainting and failure many with a mixture of both These lives are presented not in the style of the popular semi fiction of the day but with such accuracy as only a thorough study of many sorts of records makes possible yet too with sympathy and insight into human nature throughout For those interested in frontier life and frontier stories this book presents an unwonted aspect of that life the struggle for culture and for science under frontier conditions a struggle no less heroic than that of the fighting pioneer Naturalists of the Frontier realistically portrays the hard material conditions of frontier life yet these are illumined by the ideals of the men who subdued those conditions The student of the early history of the Southwest and particularly of Texas will find here presented unusual and significant aspects of that history For the historian of science this book pictures the beginnings of science in a new country it shows what science must be under frontier conditions an examination of the resources of the region rather than a study of underlying problems **A Wild Flower by Any Other Name** Karen Nilsson, 1994 *California's Frontier Naturalists* Richard G. Beidleman, 2006-03-02 In California s Frontier Naturalists Richard Beidleman has eloquently chronicled the history of explorations and discovery that revealed the grand legacy of California s biodiversity More than just a series of scholarly essays about naturalists collections and species this book provides lively insight into the motivation that lured diverse naturalists to California s natural cornucopia their personalities their remarkable experiences and their lasting contributions Dieter Wilken Santa Barbara Botanic Garden Early American Naturalists John Moring, 2005 This historical work chronicles the lives adventures and discoveries of America s great explorer naturalists Lewis Clark Martha Maxwell John James Audubon John Muir William Gambel Thomas Say Robert Kennicott and John Townsend Regardless of the formidable obstacles and travails these naturalist explorers provided an invaluable scientific foundation as to how the plants animals and environment of the American West coexist From identifying new species to discovering prehistoric fossils this book celebrates these intrepid trailblazers who boldly navigated and documented the untrammelled awe inspiring frontier west of the Mississippi Montana's Pioneer Naturalist George M. Dennison, 2016-09-21 A naturalist on Montana s academic frontier passionate conservationist Morton J Elrod was instrumental in establishing the Department of Biology at the University of Montana as well as Glacier National Park and the National Bison Range In Montana s Pioneer Naturalist the

first in depth assessment of Elrod's career George M Dennison reveals how one man helped to shape the scholarly study of nature and its institutionalization in the West at the turn of the century Elrod moved to Missoula in 1897 just four years after the state university's founding and participated in virtually every aspect of university life for almost forty years To reveal the depths of this pioneer scientist's influence on the growth of his university his state and the academic fields he worked in author George M Dennison delves into state and university archives including Elrod's personal papers Although Elrod was an active participant in bison conservation and the growth of the National Park Naturalist Service much of his work focused on Flathead Lake where he surveyed local life forms and initiated the university's biological station one of the first of its kind in the United States Yet at heart Elrod was an educator who desired to foster in his students a love of nature which he said should give health to any one and supply knowledge of greatest value either to the individual or to society or to both In this biography of a prominent scientist now almost forgotten Dennison longtime president of the University of Montana demonstrates how Elrod's scholarship and philosophy regarding science and nature made him one of Montana's most distinguished naturalists conservationists and educators

Man Who Loved Wasps Howard E Evans, 2005-03-15 As the world's leading authority on wasps Howard Ensign Evans lifelong study of this creature was only one aspect of his life as an acclaimed scientist and author For readers he illuminated the otherworldly lives of humble creatures in such popular books as *Life on a Little Known Planet Wasp Farm* and *Pioneer Naturalists* Evans was a master entomologist who seems only to have been truly comfortable in places where the bugs called there he found his beauty his magic and his poetry In this collection which he completed just before his death at 83 it appears Evans knew all 900 000 species of his gems that to others were only insects along with the lowly magpie and the birds of Australia as well Edward O Wilson one of the world's preeminent biologists is the author of more than twenty five books including *Sociobiology* the Pulitzer Prize winning *The Ants* and the best selling novel *Anthill* A professor emeritus at Harvard University he lives in Lexington Massachusetts
