Avison, Jane D. McLeod, Bernice A. Pescosolido, 2007-08-19 In 2004 the discipline of sociology celebrated the 100th anniversary of the founding of the American Sociological Association In 2005 the Section on Medical Sociology celebrated 50 years since the formation of the Committee on Medical Sociology within the ASA And in 2003 the Section on the Sociology of Mental Health celebrated ten years since its founding within the American branch of the discipline This brief accounting marks the American based or nizational landmarks central to concerns about how social factors shape the mental health problems individuals face as well as the individual and system responses that follow This history also lays a trail of how the focus on mental health and illness has narrowed from a general concern of the discipline to a more intense substantively focused community of scholars targeting a common set of specific theoretical and empirical questions While mental health and illness figured prominently in the writings of classical sociologists contem rary sociologists often view research on mental health as peripheral to the real work of the discipline The sentiment real or perceived is that the sociology of mental health along with its sister medical sociology may be in danger of both losing its prominence in the discipline and losing its connection to the ma stream core of sociological knowledge Pescosolido Kronenfeld 1995      *Family Life Education* Stephen F. Duncan, H. Wallace Goddard, 2016-04-20 A practical how to guide to developing implementing evaluating and sustaining effective family life education programs Drawing on the best scholarship and their own years of professional experience the authors of this thoroughly updated Third Edition begin by discussing the foundations of family life education and encourage readers to develop their own outreach philosophies The book then helps readers learn principles and methods for reaching out to the public and how to form and use community collaborations and use principles of social marketing to promote programs      Healthy American Families John H. Scanzoni, 2010-04-22 This fascinating book compares progressive and more religiously conservative views and their differing impacts on the health of families Rejecting the definition of family promulgated by the Religious Right Healthy American Families A Progressive Alternative to the Religious Right offers an innovative approach to understanding 21st century families Proactive rather than reactive it explores the ways families have changed over the past 200 years and builds on that to elucidate the larger forces that continue to redefine male and female roles and the shape of the modern family unit Part one of the book shows that the Religious Right s claim that a Golden Age of Families existed when our country began is fallacious Instead families have been changing since the days of the Puritans

Part two picks up the threads to show how in the wake of those changes most of today's families are healthier than families at the time of our country's founding. Healthy families, the book asserts, spring from a blend of conservative ideals: responsibility and accountability and liberal ideals: innovation and change. The result is responsible change that benefits both the individual and society.

**The Craft of Teaching About Families** Deborah L. Berke, Steven K. Wisensale, 2013-09-05

Learn how to develop and teach effective courses on the vital issues of family life. *The Craft of Teaching About Families* presents a variety of course designs, evaluation methods, and teaching techniques and strategies that can be used to address the complexities of family life. This unique book prepares students for the challenges they'll face as they leave the campus for the classroom, providing them with the problem-solving skills they'll need for success. The book's contributors, a distinguished panel of family scientists, sociologists, public policy analysts, psychologists, and extension specialists, examine a range of topics including family law and policy, advocacy, parenting skills, international families, and diversity. One of the few books geared to teaching family studies, particularly family policy and family law, *The Craft of Teaching About Families* reaffirms the importance of teaching in a time when controversial family issues receive constant attention from the media, the courts, and the legislatures. In addition to articles on family policy, family law, marriage, and the family, family interaction and dynamics, and cultural diversity, the book addresses empirical assessments of internships and service-learning activities in family-oriented courses, the effectiveness of various teaching strategies including role playing, classroom simulations, and Web-based assignments. Divided into three sections for ease of use, *The Craft of Teaching About Families* examines:

- Family Law and Family Policy**: how to build writing skills through the preparation of court briefs and policy memos; how to use cooperative learning research teams to teach family law; how to design better courses by understanding students' perceptions of family policy issues; how cooperative extension can help involve families in the policymaking process.
- Family Dynamics**: how to develop a course in father-daughter relationships; how to incorporate parenting education workshops into a parent-child relationship course; how to prepare students to become competent multicultural educators; how to develop a course on international families from a family strengths perspective; how to develop a new framework for teaching family resources management.
- Teaching Techniques in Family Science**: how to incorporate effective role playing into the syllabus; how to use small group work to create a positive experience in the classroom; how to educate future teachers about psychological abuse; how to teach students about forgiveness toward those who have hurt them; how to analyze the results of service-learning assignments in family diversity.

College Women In The Nuclear Age Babette Faehmel, 2011-09-08. In the popular imagination, American women during the time between the end of World War II and the 1960s, the era of the so-called feminine mystique, were ultraconservative and passive. *College Women in the Nuclear Age* takes a fresh look at these women, showing them actively searching for their place in the world while engaging with the larger intellectual and political movements of the times. Drawing from the letters and diaries of young women in the Cold War era, Babette Faehmel seeks to restore their unique voices and to chronicle their collective ambitions. She also explores the shifting roles that higher education played in establishing these hopes and dreams, making the case that the GI Bill served to diminish the ambitions of many American women even as it opened opportunities for many American men. A treasure trove of original research, the book should stimulate scholarly discussion and captivate any reader interested in the thoughts and lives of American women.

*Challenges of Aging on U.S. Families* Richard K. Caputo, 2005. Respected authorities discuss in detail long-term care and the standard of living of families with a focus on the effects of changing family structures on families themselves and society at large. Detailed tables provide clarity of thought, while comprehensive bibliographies offer further opportunity for study.
