Turpin,2016-08-25 In A New Moral Vision Andrea L Turpin explores how the entrance of women into U S colleges and universities shaped changing ideas about the moral and religious purposes of higher education in unexpected ways and in turn profoundly shaped American culture In the decades before the Civil War evangelical Protestantism provided the main impetus for opening the highest levels of American education to women Between the Civil War and World War I however shifting theological beliefs a growing cultural pluralism and a new emphasis on university research led educators to reevaluate how colleges should inculcate an ethical outlook in students just as the proportion of female collegians swelled In this environment Turpin argues educational leaders articulated a new moral vision for their institutions by positioning them within the new landscape of competing men s women s and coeducational colleges and universities In place of fostering evangelical conversion religiously liberal educators sought to foster in students a surprisingly more gendered ideal of character and service than had earlier evangelical educators Because of this moral reorientation the widespread entrance of women into higher education did not shift the social order in as egalitarian a direction as we might expect Instead college graduates who formed a disproportionate number of the leaders and reformers of the Progressive Era contributed to the creation of separate male and female cultures within Progressive Era public life and beyond Drawing on extensive archival research at ten trend setting men s women s and coeducational colleges and universities A New Moral Vision illuminates the historical intersection of gender ideals religious beliefs educational theories and social change in ways that offer insight into the nature and cultural consequences of the moral messages communicated by institutions of higher education today

Gendered Futures in Higher Education Becky Ropers-Huilman,2012-02-01 This volume addresses the ways in which gender takes shape in and is shaped by higher education environments Focusing on historical knowledge and contemporary experience the contributors identify several key gender issues affecting students faculty and leaders in higher education They examine such diverse topics as what lessons women s colleges have to offer violence on campus women faculty and part time employment and intersecting identities of race and gender and they apply critical perspectives to suggest needed change While they may not agree on the necessary strategies to improve higher education environments they do agree that those environments are currently deeply and problematically gendered Women in Higher Education, 1850-1970 E. Lisa Panayotidis,Paul Stortz,2017-09-19 This edited collection illustrates the way in which women s experiences of academe could be both contextually diverse but historically and culturally similar It looks at both the micro individual women and universities and macro level comparative analyses among regions and countries within regional national trans national and international contexts The contributors integrally advance knowledge about the university in history by exploring the intersections of the lived experiences of women students and professors practices of co education and intellectual and

academic cultures They also raise important questions about the complementary and multidirectional flow and exchange of academic knowledge and information among gender groups across programmes disciplines and universities Historical inquiry and interpretation serve as efficacious ways with which to understand contemporary events and discourses in higher education and more broadly in community and society This book will provide important historical contexts for current debates about the numerical dominance and significance of women in higher education and the tensions embedded in the gendering of specific academic programs and disciplines and university policies missions and mandates *A History of the Position of Dean of Women in a Selected Group of Co-educational Colleges and Universities in the United States* Lulu Haskell Holmes, 1939

**American Academic Cultures** Paul H. Mattingly, 2017-11-23 At a time when American higher education seems ever more to be reflecting on its purpose and potential we are more inclined than ever to look to its history for context and inspiration But that history only helps Paul H Mattingly argues if it is seen as something more than a linear progress through time With *American Academic Cultures* he offers a different type of history of American higher learning showing how its current state is the product of different varied generational cultures each grounded in its own moment in time and driven by historically distinct values that generated specific problems and responses Mattingly sketches out seven broad generational cultures evangelical Jeffersonian republican nondenominational industrially driven progressively pragmatic internationally minded and the current corporate model What we see through his close analysis of each of these cultures in their historical moments is that the politics of higher education both inside and outside institutions are ultimately driven by the dominant culture of the time By looking at the history of higher education in this new way Mattingly opens our eyes to our own moment and the part its culture plays in generating its politics and promise *Women in Higher Education* Ana M. Martínez Alemán, Kristen A. Renn, 2002-12-13 The only comprehensive encyclopedia on the subject of women in higher education America's first wave of feminists Susan B Anthony Elizabeth Cady Stanton and others included expanded opportunities for higher education in their Declaration of Sentiments at the first Women's Rights Convention in Seneca Falls New York in 1848 By then the first American institutions to educate women had been founded among them Mt Holyoke Seminary in 1837 However not until after the Civil War did most universities admit women and not for egalitarian purposes War casualties had caused a drop in enrollment and the states needed teachers Women students paid tuition but as teachers were paid salaries half that of men By the late 20th century there were more female than male students of higher education but women remained underrepresented at the higher levels of educational leadership and training This volume covers everything from historical and cultural context and gender theory to women in the curriculum and as faculty and administrators
